1 INTRODUCTION

Welcome to the BlueCross BlueShield of Western New York (BlueCross BlueShield) network provider family. We’re pleased you have joined the BlueCross BlueShield network, which represents some of the finest health care practitioners in the state of New York.

We bring the best expertise available nationally to operate local, community-based health care plans with experienced local staff to complement our operations. We are committed to assisting you in providing quality health care.

We believe hospitals, physicians and other providers play a pivotal role in managed care. We can only succeed by working collaboratively with you and other caregivers. Earning your loyalty and respect is essential to maintaining a stable, high-quality provider network.

If you are interested in participating in any of our quality improvement committees or learning more about specific policies, please contact us. Most committee meetings are prescheduled at times and locations intended to be convenient for you. Please call Provider Services at 1-866-231-0847 with any suggestions, comments or questions that you may have. Together, we can arrange for and provide an integrated system of coordinated, efficient and quality care for our members and your patients.

BlueCross BlueShield complies with all New York state (NYS) Medicaid and federal guidelines and incorporates them into our policies and procedures. As such, we require providers rendering care to our members to adhere to these guidelines, policies and procedures.

Please note this provider manual will be amended as our operational policies change. We will notify you by mail, phone or email.

If you believe you do not have our most current edition of our manual, please call us at 1-866-231-0847 to receive a new one.
2 OVERVIEW

Who is BlueCross BlueShield?
BlueCross BlueShield of Western New York (BlueCross BlueShield) is a division of HealthNow New York Inc., an independent licensee of the BlueCross and BlueShield Association. Since 1936, BlueCross BlueShield has helped millions of people lead healthier lives. BlueCross BlueShield offers a full range of insured, self-insured and government programs.

Child Health Plus (CHPlus) and Medicaid Managed Care (MMC), the government-sponsored health insurance programs, provide services to eligible members in Allegany, Cattaraugus, Chautauqua, Erie, Orleans, Niagara and Wyoming counties. Services cover families and individuals. BlueCross BlueShield also offers dental and vision plans. As a community-based, not-for-profit health plan, BlueCross BlueShield contributes significantly to organizations that strengthen and enrich the health of our community.

We’re dedicated to improving the quality of life of each member by providing the best and most reliable health care to the communities we serve.

Mission
Our mission is to operate a community-focused managed care company with an emphasis on the public sector health care market. We will coordinate members’ physical and behavioral health care, offering a continuum of education, access, care and outcome programs that we believe results in lower costs, improved quality and better health statuses for these members.

Strategy
Our strategy is to:
- Improve access to preventive primary care services by ensuring the selection of a primary care provider (PCP) who will serve as provider, care manager and coordinator for all basic medical services
- Educate members about their benefits and responsibilities and the appropriate use of health care services
- Encourage stable, long-term relationships between providers and members
- Discourage medically inappropriate use of specialists and emergency rooms
- Commit to community-based enterprises and community outreach
- Facilitate the integration of physical and behavioral health care
- Foster quality improvement mechanisms that actively involve providers in re-engineering health care delivery
- Encourage a customer service orientation with regular measurement of member and provider satisfaction

Summary
Escalating health care costs are driven in part by a pattern of fragmented, episodic care and, quite often, unmanaged health problems of members. We strive to educate members, to encourage the appropriate use of the managed care system and to be involved in all aspects of their health care.
3 QUICK REFERENCE INFORMATION

Please call Provider Services at the National Customer Care department for precertification/notification, health plan network information, member eligibility, claims information, inquiries and recommendations you may have about improving our processes and managed care program.

### Member Eligibility

- BlueCross BlueShield provides an online resource designed to significantly reduce the time your office spends verifying eligibility, claims status and authorization status. Log in to our website and browse through the *Claims* section for more details.
- If you are unable to access the internet, you may receive claims status, eligibility verification and authorization status over the telephone at any time by calling our toll-free, automated Provider Inquiry Line at **1-866-231-0847**.

### Medical Appeal Information

- Medical appeals must be filed within 90 calendar days of the date of the notice of action.
- File a standard medical appeal at:
  - BlueCross BlueShield Medical Appeals
  - P.O. Box 62429
  - Virginia Beach, VA 23466-2429
- Fax an expedited appeal to **1-844-759-5954**.

### Payment Disputes

- You have 45 calendar days from receipt of Explanation of Payment (EOP) to request an informal claim dispute resolution review. BlueCross BlueShield will send a determination letter within 30 business days of receiving all necessary information. If you’re dissatisfied with the resolution, you may submit an appeal of the resolution within 30 calendar days of receipt of the notification.
- File a payment dispute at:
  - BlueCross BlueShield
  - Payment Disputes
  - P.O. Box 61599
  - Virginia Beach, VA 23466-1599
- You can also file a payment dispute on our website at [www.Availity.com](http://www.Availity.com). Select *Claims & Payments > Claim Status*, then submit an inquiry for the claim. Once you have found the claim, select *Dispute Claim*. Providers who have questions about Availity registration or as they begin to use the new functionality should contact Availity Client Services at **1-800-282-4548**.

### Provider Grievances

- Provider grievances should be submitted to:
  - BlueCross BlueShield
  - Provider Relations – Central Intake Unit
  - Grievances and Appeals
  - 9 Pine St., 14th Floor
  - New York, NY 10005

### Provider Changes

Providers should immediately submit any changes to demographics, specialty, practice information, TIN, billing, office hours or appointment scheduling phone number directly to BlueCross BlueShield. The *Practice Profile Form* can be downloaded from the

4 PRIMARY CARE PROVIDERS

Primary Care Providers

The PCP is a provider who serves as the entry point into the health care system for the member. The PCP is responsible for the complete care of his or her patient, including but not limited to providing primary care, coordinating and monitoring referrals to specialty care, authorizing hospital services, and maintaining the continuity of care.

PCP responsibilities shall include, at a minimum:

- Managing the medical and health care needs of members to ensure all medically necessary services are made available in a timely manner.
- Monitoring and following up on care provided by other medical service providers for diagnosis and treatment to include services available under fee-for-service (FFS) Medicaid.
- Providing the coordination necessary for the referral of patients to specialists and for the referral of patients to services that may be available through FFS Medicaid.
- Maintaining a medical record of all services rendered by the PCP and other referral providers.
- Screening and treating patients for sexually transmitted diseases (STDs), reporting cases of STDs to the local public health agency, and cooperating in contact investigations in accordance with existing state and local laws and regulations.
- Educating patients about the risk and prevention of STDs.

A PCP must be a physician or network provider/subcontractor who provides or arranges for the delivery of medical services, including case management, to ensure all services found to be medically necessary are made available in a timely manner. The PCP may practice in a solo or group setting or may practice in a clinic (for example, a federally qualified health center [FQHC] or rural health center [RHC]) or outpatient clinic.

We encourage enrollees to select a PCP who provides preventive and primary medical care, as well as authorization and coordination of all medically necessary specialty services. We encourage our members to make an appointment with their PCPs within 30 calendar days of their effective date of enrollment.

Provider Specialties

Physicians with the following specialties can apply for enrollment with us as a PCP:

- Family practitioner
- General practitioner
- General pediatrician
- General internist
- Nurse practitioners certified as specialists in a family practice or pediatrics
- FQHCs and RHCs
- Obstetrics/gynecology

To contract as a PCP, you must practice at the location listed in the enrollment agreement.
PCP Onsite Availability

We’re dedicated to ensuring access to care for our members, and this depends upon the accessibility of network providers. Our network providers are required to abide by the following standards:

- Enrollees must have access to an after-hours live voice for PCP and OB/GYN emergency consultation and care.
- PCPs must offer 24-hour-a-day, 7 day-a-week telephone access for members.
- A 24-hour telephone service may be used if it is:
  - Answered by a designee such as an on-call physician or nurse practitioner with physician backup, or an answering service or answering machine. Note: If an answering machine is used, the message must direct the member to a live voice.
  - Maintained as a confidential line for member information and/or questions; an answering machine is not acceptable.
- The PCP or another physician/nurse practitioner must be available to provide medically necessary services.
- Covering physicians are required to follow the preauthorization guidelines.
- It is not acceptable to automatically direct the member to the emergency room when the PCP is not available.
- We encourage our PCPs to offer after-hours office care in the evenings and on weekends.

Member Enrollment

Member enrollment into BlueCross BlueShield is voluntary. Members who meet the state’s eligibility requirements for participation in managed care are eligible to join Child Health Plus and Medicaid Managed Care through our health care plan. Eligible members are enrolled without regard to health status.

Nondiscrimination Statement

BlueCross BlueShield does not engage in, aid or perpetuate discrimination against any person by providing significant assistance to any entity or person that discriminates on the basis of race, color or national origin in providing aid, benefits or services to beneficiaries. BlueCross BlueShield does not utilize or administer criteria having the effect of discriminatory practices on the basis of gender or gender identity. BlueCross BlueShield does not select site or facility locations that have the effect of excluding individuals from, denying the benefits of or subjecting them to discrimination on the basis of gender or gender identity. In addition, in compliance with the Age Act, BlueCross BlueShield may not discriminate against any person on the basis of age, or aid or perpetuate age discrimination by providing significant assistance to any agency, organization or person that discriminates on the basis of age.

BlueCross BlueShield provides health coverage to our members on a nondiscriminatory basis, according to state and federal law, regardless of gender, gender identity, race, color, age, religion, national origin, physical or mental disability, or type of illness or condition.

Members who contact us with an allegation of discrimination are informed immediately of their right to file a grievance. This also occurs when a BlueCross BlueShield representative working with a member identifies a potential act of discrimination. The member is advised to submit a verbal or written account of the incident and is assisted in doing so, if the member requests assistance. We document, track and trend all alleged acts of discrimination.
Members are also advised to file a civil rights complaint with the U.S. Department of Health and Human Services Office for Civil Rights (OCR):

- Through the OCR complaint portal at https://ocrportal.hhs.gov/ocr/portal/lobby.jsf
- By mail to: U.S. Department of Health and Human Services, 200 Independence Ave. SW, Room 509F, HHH Building, Washington, DC 20201
- By phone at: 1-800-368-1019 (TTY/TTD: 1-800-537-7697)

Complaint forms are available at www.hhs.gov/ocr/office/file/index.html.

BlueCross BlueShield provides free tools and services to people with disabilities to communicate effectively with us. BlueCross BlueShield also provides free language services to people whose primary language isn’t English (for example, qualified interpreters and information written in other languages). These services can be obtained by calling the customer service number on their member ID card.

If you or your patient believe that BlueCross BlueShield failed to provide these services, or discriminated in any way on the basis of race, color, national origin, age, disability, gender or gender identity, you can file a grievance with our grievance coordinator via:

- Mail: BlueCross BlueShield, Member Complaint and Appeals Department, P.O. Box 62429, Virginia Beach, VA 23466-2429
- Phone: 1-866-231-0847 (TTY/TDD: 711)

**Equal Program Access on the Basis of Gender**

BlueCross BlueShield provides individuals with equal access to health programs and activities without discriminating on the basis of gender. BlueCross BlueShield must also treat individuals consistently with their gender identity, and is prohibited from discriminating against any individual or entity on the basis of a relationship with, or association with, a member of a protected class (that is, race, color, national origin, gender, gender identity, age or disability).

BlueCross BlueShield may not deny or limit health services that are ordinarily or exclusively available to individuals of one gender, to a transgender individual based on the fact that a different gender was assigned at birth, or because the gender identity or gender recorded is different from the one in which health services are ordinarily or exclusively available.

**Americans with Disabilities Act Requirements**

Our policies and procedures are designed to promote compliance with the Americans with Disabilities Act (ADA) of 1990. Providers are required to take reasonable actions to remove an existing barrier and/or to accommodate the needs of members who are qualified individuals with a disability. This action plan includes:

- Street-level access
- An elevator or accessible ramp into facilities
- Access to a lavatory that accommodates a wheelchair
- Access to an examination room that accommodates a wheelchair
- Handicap parking clearly marked, unless there is street-side parking
Health Plan Products and Benefits

Child Health Plus (CHPlus) is a New York state-sponsored, free or low-cost health insurance program available to members ages 0 to 19 of low-income families who are not eligible for Medicaid and do not have other health insurance.

Medicaid Managed Care is available to eligible Medicaid recipients residing within the BlueCross BlueShield service area.

Member Disenrollment

A member can be disenrolled from the health plan in limited circumstances. If you believe a member should be disenrolled for a medical reason or for noncompliance, please contact Member Services at 1-866-231-0847 for assistance.

Note: CHPlus is a voluntary program. A member may choose to disenroll from BlueCross BlueShield at any time.

Newborn Enrollment

We will enroll and provide coverage for eligible newborn children effective from the date of birth. Upon notification of the birth by the hospital, the New York State Department of Health (NYSDOH) will enroll the newborn in the mother’s health care plan. If the newborn is not identified as SSI or SSI-related and therefore excluded from a health care plan pursuant to Section 2(b) (xi), the newborn will be retroactively enrolled to the first day of the month of birth.

Based on the transaction date of the enrollment of the newborn, the newborn will appear on either the next month’s roster or the subsequent month’s roster.

Member Eligibility Listing

You should verify each member receiving treatment in your office actually appears on your membership listing. Accessing your panel membership listing via our provider website is the most accurate way to determine member eligibility. You will have secure access to an electronic listing of your panel of assigned members, once registered and logged in to www.bcbswny.com/stateplans or through https://www.availity.com. (Select Payer Spaces > Applications > Provider Online Reporting)

To request a hard copy of your panel listing be mailed to you, call Provider Services at 1-866-231-0847.
Member Identification Cards

Our members are given identification (ID) cards identifying them as participants in our program within 14 calendar days of their effective dates of enrollment with us. To ensure immediate access to services, you must accept members’ Medicaid Managed Care ID cards or the BlueCross BlueShield temporary member ID cards as proof of enrollment in BlueCross BlueShield until they receive BlueCross BlueShield member ID cards. The holder of the BlueCross BlueShield member ID card should be the member or the guardian of the member. The ID card will include:

- The member’s ID number
- The member’s name (first name, last name and middle initial)
- The member’s date of birth
- The member’s enrollment effective date
- Toll-free phone numbers for information and/or authorizations
- Toll-free 24/7 NurseLine, available 24 hours a day, 7 days a week
- Descriptions of procedures to be followed for emergency or special services
- BlueCross BlueShield address and telephone number
- PCP name and telephone number

Our members also have access to:

- Print-on-demand ID cards: By logging in to our website, members can download and print their ID cards from home.
- Mobile ID card smartphone application: Via our new application, available for both iOS and Android users, members can download an image of their current ID cards and fax or email you a copy.

ID cards should be treated the same as you would treat the original plastic card. Remember to verify eligibility through our website at every visit, no matter which type of card a member presents.

The following is a sample of a Medicaid Managed Care member ID card:

Medically Necessary Services

Medically necessary health services are defined as health services that meet all or one of the following conditions:

- Services are essential to prevent, diagnose, prevent the worsening of, alleviate, correct or cure medical conditions that endanger life, cause suffering or pain, cause physical deformity or
malfunction, threaten to cause or aggravate a handicap, result in illness or infirmity of a member, or interfere with such person’s capacity for normal activity.

- Services are provided at an appropriate facility and at the appropriate level of care for the treatment of the member’s medical condition.
- Services are provided in accordance with generally accepted standards of medical practice.

**Note:** We do not cover the use of any experimental procedures or experimental medications except under certain preauthorized circumstances.

If experimental or investigational services are requested, the attending physician will:

- Certify that the member has a life-threatening or disabling condition for which:
  - The standard service/procedure has been ineffective or would be medically inappropriate.
  - A more beneficial standard service or procedure covered by the plan doesn’t exist.
  - There is a clinical trial that is open, the member is eligible to participate, and the member has or will likely be accepted.
- Attest that the service or procedure is likely to be more beneficial to the member than any standard service or procedure, based on two documents grounded in credible medical or scientific evidence (copies of these documents must be enclosed with the request).

**Member Complaint Procedures**

A complaint is an expression of dissatisfaction by a member or provider on a member’s behalf about care and treatment that does not amount to a change in scope, amount or duration of service.

**Filing a Complaint**

A complaint may be issued verbally or in writing. Verbal complaints should be made by contacting us at 1-866-231-0847 or in writing at the following address:

BlueCross BlueShield
Member Complaint Specialist
Quality Management Department
P.O. Box 38
Buffalo, NY 14240-0038

We will designate one or more qualified staff members who were not involved in any previous level of review or decision-making to review the complaint, and if the complaint pertains to clinical matters, licensed, certified or registered health care professionals will be involved.

Complaints that can be immediately decided (the same day) to the member’s satisfaction will not be responded to in writing. We will document the complaint and decision, and log and track the complaint and decision for quality improvement purposes. If the complaint cannot be decided immediately, we will determine if a complaint is to be expedited or standard.

Expeditied complaints may be requested when we determine, or you indicate, that a delay in decision-making could seriously jeopardize the member’s life or health or ability to attain, maintain or regain maximum function. A member may also request an expedited review of a complaint.
Expedited and Standard Complaints Time Frames
We must acknowledge the complaint in writing within 15 business days of receipt of the complaint. If a decision is reached before the written acknowledgement is sent, we may include the written acknowledgement with the notice of decision (one notice).

All complaints must be decided as fast as a member’s condition requires, but no longer than the following time frames:

- **Expedited:** 72 hours from receipt of all necessary information for urgent, preservice and concurrent services.
- **Standard:** Non-urgent preservice within 14 calendars days from receipt of all necessary information, and post-service within 30 calendar days from receipt of the complaint.

The member or someone on behalf of the member has the right to file a complaint at any time with the NYSDOH at 1-800-206-8125.

Appealing a Complaint Decision
If the member is not satisfied with the decision made concerning a complaint, the member may request a second review of his or her issue by filing a complaint appeal. The member must file a complaint appeal in writing within 60 business days of receipt of the initial decision. Once the written appeal is received, we establish if the appeal is expedited or standard. You or the member may also request an expedited review of a complaint appeal. The member will receive a written acknowledgement informing him or her of the name, address and telephone number of the individual designated to respond to the appeal within 15 business days of receiving his or her request for appeal. If a decision is reached before the written acknowledgement is sent, the plan may include the written acknowledgement with notice of decision.

All complaint appeals will be conducted by appropriate professionals who are of the same or similar specialty within BlueCross BlueShield than the person who made the complaint determination and not a subordinate of the original practitioner. Complaint appeal determinations with a clinical basis must be made by personnel qualified to review the appeal, including licensed, certified or registered health care professionals who did not make the initial determination, at least one of whom must be a clinical peer reviewer.

For preservice appeals, the appeal decision is reached within 30 calendar days after we receive all necessary information to make the decision, or as fast as the member’s condition requires. For post service appeals, the appeal decision is reached within 60 calendar days after we receive all necessary information to make the decision. For expedited complaint appeals, the appeal decision is reached within 72 hours of receipt of necessary information, or as fast as the member’s condition requires. For both standard and expedited complaint appeals, we will provide the member with written notice of the decision. The notice will include the detailed reasons for the decision and, in cases involving clinical matters, the clinical rationale for the decision.

A clinical reviewer other than the clinical reviewer who rendered the adverse determination will review expedited and standard appeals.

Documentation of Complaints and Complaint Appeals
We will maintain a file on each complaint and associated appeal, if any, that will at a minimum include:

- The date the complaint/complaint appeal was filed and a copy of the complaint/complaint appeal
• The date of receipt and a copy of the enrollee’s acknowledgement letter, if any, of the complaint/complaint appeal
• All member/provider requests for expedited complaints/complaint appeals and plan decisions about the request
• Necessary documentation to support any extensions (no exceptions on complaint appeals)
• Our determination, including the date of the determination, titles and, in the case of a clinical determination, the credentials of our personnel who reviewed the complaint/complaint appeal
5 BLUECROSS BLUESHIELD HEALTH CARE BENEFITS

BlueCross BlueShield Covered Services

All services and benefits are subject to plan provisions and must be medically necessary. Services other than primary care, obstetrics-gynecology (OB-GYN), mental health/substance abuse, self-referral and free-access services may require precertification. Details about which services require precertification can be found on our website.

Where applicable, differences between the Medicaid Managed Care and Child Health Plus (CHPlus) covered services are discussed in this section. If no differentiation is made for a particular type of service, the coverage of those services can be considered equal for all of our products.

Physician Services

Physician services include the full range of preventive, primary care medical services and physician specialty services that fall within a licensed physician’s scope of practice under New York state law. Physician’s assistants’ services are included within the scope of physician services, as they act as extenders to physician services.

In addition to the full range of medical services, the following benefits are also included:

- Certain specified laboratory procedures performed in the office during the course of treatment (refer to laboratory services)
- Family planning health services including diagnosis, treatment and related counseling furnished under the supervision of a physician (fertility services are not covered)
- Child/Teen Health Plan (C/THP) services (that is, comprehensive primary care services provided to children and adolescents under age 21 and behavioral health screening by PCPs for all members as appropriate)
- Physical examinations, including those necessary for employment, school and camp
- Physical and/or mental health or alcohol and substance abuse examinations as requested by the local Department of Social Services to fulfill its statutory responsibilities for the protection of children and adults and for children in foster care
- Health and mental health assessments for the purpose of making recommendations regarding a recipient’s disability status for federal SSI applications
- Physical health and/or mental health or alcohol and substance abuse assessments for the purpose of making recommendations regarding a recipient’s ability to work when requested by a local social services district; Medicaid requires psychosocial assessment to be conducted on each member to include economic, social, psychosocial and emotional problems, as well as domestic violence or sexual assault

Preventive Care

Preventive care means the evaluation and treatment to avert disease/illness and/or its consequences. There are three levels of preventive care: primary, such as immunizations for preventing disease; secondary, such as disease screening programs for early detection of disease; and tertiary, such as physical therapy for restoring function after disease has occurred. An accepted standard of professional/patient care services is required when treating Medicaid Managed Care members.
**Prenatal Care Services**
Prenatal and obstetrical services may be accessed directly by the member and/or after the PCP confirms a pregnancy and refers the member to a participating obstetrical provider. For Medicaid Managed Care, ongoing risk assessment for both maternal and fetal risk should occur for all pregnant women to include genetic, nutritional, psychosocial, historical, and emergency obstetrical and med-surgical risk factors. Pregnant women are also allowed up to eight smoking cessation counseling sessions within a 12-month period.

**Gynecological Care Services**
Gynecological services may be accessed by all female members without a PCP referral. For Medicaid Managed Care, covered services include one routine examination per member annually, treatment of all acute gynecological conditions and follow-up treatment visits.

**Free Access Services: Family Planning and Reproductive Health Services**
Medicaid Managed Care: Family planning/reproductive services for contraception, sterilization, screening and treatment for sexually transmitted diseases, and HIV pretest counseling with clinical recommendation of testing for all pregnant women are covered by the plan. Members and their newborns must have access to services for positive management of HIV disease, psychosocial support and case management for medical, social and addictive services. Members may self-refer to access family planning services from a BlueCross BlueShield provider or any provider who accepts Medicaid. Infertility services are not covered.

**Emergency Services**
Emergency services coverage includes services needed to evaluate or stabilize an emergency medical condition. Criteria used to define an emergency medical condition are consistent with the prudent layperson standard and comply with federal and state requirements.

Emergency medical condition means a medical or behavioral condition, the onset of which is sudden, that manifests itself by symptoms of sufficient severity, including severe pain that a prudent layperson, possessing an average knowledge of medicine and health, could reasonably expect the absence of immediate medical attention to result in:

a) Placing the health of the person afflicted with such condition in serious jeopardy, or in the case of a behavioral condition, placing the health of such person or others in serious jeopardy;

b) Serious impairment to such person’s bodily functions;

c) Serious dysfunction of any bodily organ or part of such person; or

d) Serious disfigurement of such person.

Members do not need to call their PCP or BlueCross BlueShield before seeking emergency care. Members can access the nearest emergency room regardless of location or network participation. Precertification is not required for services in a medical or behavioral health emergency. Access to emergency services is not restricted, and emergency services may be obtained from nonparticipating providers without penalty. Members are required to notify us or their PCP within 48 hours after receiving emergency care and obtain precertification for any follow-up care delivered pursuant to the emergency. Nothing in this provider manual or policies and procedures precludes us from entering into contracts with providers or facilities that require providers or facilities to provide notification to us after members present for emergency services and are subsequently stabilized.
Inpatient Hospital Care
Inpatient stay pending alternate level of medical care means continued care in a hospital pending placement in an alternative lower medical level of care, consistent with provisions of 18 NYCRR 505.20 and 10 NYCRR, Part 85.

Acute care in a general hospital is covered up to 365 days a year, encompassing a full range of necessary diagnostic and therapeutic care, including surgical, medical, nursing, radiological and rehabilitative services. Precertification is required for elective inpatient hospital care and must be obtained at a minimum of 72 hours before the scheduled admission.

Outpatient Hospital Services
Outpatient hospital services are provided through ambulatory care facilities. Ambulatory care facilities include diagnostic and treatment centers, hospital outpatient departments and emergency rooms. These facilities may provide those necessary medical, surgical and rehabilitative services and items authorized by their operating certificates. Outpatient services (clinics) also include mental health, chemical dependency, alcohol, C/THP and family planning services provided by ambulatory care facilities.

Second Opinion Services
Members may be referred to other providers for second opinions within our provider network, for diagnosis of a condition, treatment and surgical procedures. Precertification is not required for in-network referrals.

Home Health Services
Home health services encompass services provided by a certified home health care agency in the member’s home and include therapeutic and preventive nursing, home health aides, medical supplies, equipment and appliances, rehabilitative therapies (that is, physical, occupational and speech), social work services, or nutritional services.

Home health coverage also includes two postpartum visits for high-risk infants and mothers, at least one visit to women who stay in the hospital less than 48 hours after birth and at least one visit to women who stay in the hospital less than 96 hours after a Cesarean delivery. In each case, the first visit is to occur within 48 hours of discharge.

Child Health Plus Home Health Care Benefits
Benefits are limited to 40 home health care visits per calendar year for services provided by a certified home health care agency. The service is covered only if the member would have to be admitted to a hospital or skilled nursing facility if home care was not provided. Four hours of home health aide services equals one visit.

All home health services require prior authorization.

Personal Care Services
Personal care services (PCS) are covered for members enrolled in the Temporary Assistance for Needy Families (TANF) and SSI programs only. PCS require precertification and a completed DOH-4359 (physician order). Upon receipt of the DOH-4359, a home assessment visit will be conducted to determine the level and type(s) of service(s) needed. A notice of determination will be sent to the member and provider and is subject to all applicable appeal rights should the determination differ from
the services requested. Interim home-care services may be approved pending determination of PCS based on clinical information provided by the physician.

**Consumer-Directed Personal Assistance Services (CDPAS)**

CDPAS refers to the provision of some or total assistance with personal care services (PCS), home health aide services and skilled nursing tasks by a consumer-directed personal assistant under the instruction, supervision and direction of a consumer or the consumer’s designated representative.

Consumers are defined as medical assistance recipients (enrollees) who are assessed by the health plan and determined to be eligible to participate in CDPAS. A completed DOH-4359 (physician order) is also required to participate in CDPAS.

**Personal Emergency Response System (PERS)**

PERS is covered when medically necessary and must be made in accordance and coordination with authorization for PCS or home care services.

**Behavioral Health Services**

**Covered Benefits for Children**

The table below outlines the changes to covered benefits for all members under 21 years of age, which are effective January 1, 2019. More specific information related to each service is outlined below the table.

**Additional Considerations for Children Receiving Home- and Community-Based Services (HCBS) and Long-Term Services and Supports (LTSS)**

For children transitioning from a 1915(c) waiver program, BlueCross BlueShield will continue to authorize covered HCBS and LTSS in accordance with the most recent plan of care for at least 180 days following the date of transition of children’s specialty services newly carved into managed care. Service frequency, scope, level, quantity and existing providers at the time of the transition will remain unchanged (unless such changes are requested by the enrollee or the provider refuses to work with BlueCross BlueShield) for no less than 180 days during which time a new plan of care is developed.

Note: During the initial 180-day transition, BlueCross BlueShield will authorize any children’s specialty services newly carved into managed care added to the plan of care under a person-centered process without conducting utilization review.

For 24 months from the date of transition of the children’s specialty services carve-in, for FFS children in receipt of HCBS at the time of enrollment, BlueCross BlueShield will continue to authorize covered HCBS and LTSS in accordance with the most recent plan of care for at least 180 days following the effective date of enrollment. Service frequency, scope, level, quantity and existing providers at the time of enrollment will remain unchanged (unless such changes are requested by the member or the provider.
refuses to work with BlueCross BlueShield) for no less than 180 days during which time a new plan of care is developed.

To facilitate a smooth transition of HCBS and LTSS authorizations for children in receipt of HCBS, BlueCross BlueShield will begin accepting plans of care:

- On October 1, 2019, for our members or a child for whom the health home care manager or independent entity has obtained consent to share the plan of care with BlueCross BlueShield, and the family demonstrates the MCO selection process has been completed.
- On July 1, 2020, for a child in the care of a local department of social services (LDSS)/licensed Voluntary Foster Care Agencies (VFCA), and LDSS/VFCA confirms the MCO selection process has been completed.

BlueCross BlueShield will continue to accept plans of care for children in receipt of HCBS in advance of the effective date of enrollment when BlueCross BlueShield is notified by another MCO, a health home care manager or the independent entity that there is consent to share the plan of care with us, and the family demonstrates the MCO selection process has been completed. For a child in the care of a LDSS/licensed VFCA, we’ll continue to accept plans of care in advance of the effective date of enrollment if the LDSS/VFCA confirms the MCO selection process has been completed.

**Mental Health: Medicaid Managed Care Members’ Scope of Benefit**

All inpatient mental health services, including voluntary or involuntary admissions, are covered. Outpatient services are covered and may be provided in the member’s home, in an office or in the community. All behavioral health treatment services are expected to be person-centered, strength-based and recovery-focused.

All members may self-refer for behavioral health and substance use services. Behavioral health services visits are coordinated by calling 1-866-231-0847. Precertification is not required for some behavioral health services when provided by a network provider. A provider or hospital must be contracted with BlueCross BlueShield to provide these services. For questions on precertification requirements, please call 1-866-231-0847.

Medicaid SSI members obtain their mental health benefits through the state’s FFS program.

**Detoxification: Medicaid Managed Care**

Medically managed inpatient detoxification is covered on an inpatient basis. Specific services include, but are not limited to:

- Medical assessment within 24-hours of admission
- Medical supervision of intoxication and withdrawal conditions
- Biopsychosocial assessment
- Individual and group counseling and linkages to other services as necessary

Maintenance on methadone while a patient is being treated for withdrawal from other substances may be provided.

Treatment for moderate withdrawal on an outpatient basis is also covered.

Detoxification and withdrawal services are a covered benefit for all Medicaid Managed Care members, including SSI.
Chemical Dependency: Medicaid Managed Care
Chemical dependence inpatient rehabilitation and treatment services are covered and can be provided in a hospital or freestanding facility.

Screening, brief intervention and referral to treatment (SBIRT) for chemical dependency provided in hospital outpatient departments, freestanding diagnostic and treatment centers, and primary care settings must be in accordance with protocols issued by the New York State Department of Health (NYSDOH). SBIRT is considered a preventive/screening service. PCPs who offer these services must meet the Office of Alcohol and Substance Abuse Services required training and comply with documentation standards, which include information on services provided, patient screening-tool scores and a copy of the screening tool used.

Medicaid Managed Care Outpatient Chemical Dependency Services
Medically supervised ambulatory chemical dependence outpatient clinics programs, as well as medically supervised chemical dependence outpatient rehabilitation programs, are covered.

CHPlus Mental Health and Chemical Dependence Benefits
There are no limitations for inpatient or outpatient visits for CHPlus members. Both inpatient and outpatient mental health and substance abuse services in the CHPlus program are covered without limitations on the level of coverage.

Autism Spectrum Disorder (ASD) Screening, Diagnosis and Treatment
ASDs are pervasive developmental disorders defined in the most recent edition of the diagnostic and statistical manual of mental disorders, including:
- Autistic disorder (also called autism)
- Asperger’s disorder (or Asperger’s syndrome)
- Rett syndrome
- Childhood disintegrative disorder
- Pervasive developmental disorder
- Related disorders not otherwise specified

CHP members diagnosed with an ASD by a licensed physician or psychologist are eligible for:
- Behavioral health treatments
- Psychiatric care
- Psychological care
- Medical care provided by a licensed health care provider
- Therapeutic care, even if deemed habilitative or nonrestorative
  - Covered and may be provided in the member’s home, an office or the community
- Pharmacy care
- Assistive communication devices
  - Covered when ordered or prescribed by a licensed physician or psychologist for members unable to communicate through speech or in writing
  - Communication boards and speech-generating devices may be rented or purchased and are subject to prior approval
  - Dedicated communication devices are not useful to a person in absence of communication impairment; laptops, desktops and tablet computers are not covered items, but the software
and/or applications enabling them to function as a speech-generating device are covered under the Durable Medical Equipment benefit; use the Precertification Lookup tool on our website for specific requirements.

The maximum applied behavioral health analysis benefit is $45,000 per calendar year.

**Mobile Crisis Services**

**Telephonic Crisis Triage and Response**

Upon contact by the individual or referent, a provider will answer the call to determine the appropriate service response to the crisis. Referents may include families, providers, crisis hotlines, 911 operators, law enforcement or other sources, depending on what resources are available. Telephonic crisis triage and response coverage must be available 24 hours a day, 7 days a week and 365 days a year. A provider can only bill for telephonic crisis triage and response if they provide this service to an individual enrolled in Medicaid Managed Care or a collateral.

**Mobile Crisis Response**

Mobile crisis teams are dispatched to an individual’s home or any community setting where a crisis may be occurring, to provide brief intervention and facilitate access to other crisis/behavioral health services. They provide appropriate care and support while avoiding unnecessary law enforcement involvement, emergency department use and hospitalization. However, mobile crisis response may include co-response with local law-enforcement, if possible and appropriate.

**Mobile and Telephonic Follow-Up Services**

Mobile Crisis service providers may bill MMCOs for mobile and telephonic follow-up services provided to a member of a qualifying crisis service. Follow-up services are eligible for reimbursement if provided within 14 days of the qualifying crisis episode. Follow-up services may be delivered face-to-face or through telephonic contact.

**Comprehensive Psychiatric Emergency Program (CPEP)**

This licensed, hospital-based psychiatric emergency program establishes a primary entry point to the mental health system for individuals who may be mentally ill to receive emergency observation, evaluation, care and treatment in a safe and comfortable environment. Emergency visit services include provision of triage and screening, assessment, treatment, stabilization and referral, or diversion to an appropriate program. Brief emergency visits require a psychiatric diagnostic examination and may result in further CPEP evaluation or treatment activities, or discharge from the CPEP program. Full emergency visits, which result in a CPEP admission and treatment plan, must include a psychiatric diagnostic examination, psychosocial assessment and medication examination. Brief and full emergency visit services are reimbursable through Medicaid.

CPEP Crisis Intervention is one of four program components which, when provided together, form the OMH licensed Comprehensive Psychiatric Emergency Program (CPEP), and the code to which the license is issued. The other program components of the CPEP are:

- CPEP Extended Observation Beds (1920): Beds operated by the Comprehensive Psychiatric Emergency program, which are usually located in or adjacent to the CPEP emergency room, are available 24 hours a day, seven days a week to provide extended assessment and evaluation.
- CPEP Crisis Outreach: A mobile crisis intervention component of the CPEP offering crisis outreach and interim crisis service visits to individuals outside an emergency room setting; the
setting can be in the community in natural (for example, homes), structured (for example, residential programs), or controlled (for example, instructional) environments.

- **CPEP Crisis Beds:** A residential (24 hour/day) stabilization component of the CPEP, which provides supportive services for acute symptom reduction and the restoration of patients to a precrisis level of functioning.

The following services **do not** require prior authorization:

- ER services, crisis services and a CPEP
  - While there is no medical necessity review completed for ER or CPEP, providers are encouraged to notify BlueCross BlueShield to assist with discharge planning.
- Initial assessments and most outpatient clinic services
  - For opioid treatment (methadone maintenance), only notification is required.

**Continued Day Treatment**
A continuing day treatment program shall provide active treatment and rehabilitation designed to maintain or enhance current levels of functioning and skills, maintain community living, and develop self-awareness and self-esteem through the exploration and development of patient strengths and interests. A continuing day treatment program shall provide the following services: assessment and treatment planning, discharge planning, medication therapy, medication education, case management, health screening and referral, psychiatric rehabilitation readiness development, psychiatric rehabilitation readiness determination, and referral and symptom management.

**Partial Hospitalization**
A partial hospitalization program shall provide active treatment designed to stabilize and ameliorate acute symptoms, serve as an alternative to inpatient hospitalization, or reduce the length of a hospital stay within a medically supervised program. A partial hospitalization program shall provide the following services: assessment and treatment planning, health screening and referral, symptom management, medication therapy, medication education, verbal therapy, case management, psychiatric rehabilitation readiness determination and referral, crisis intervention services, activity therapy, discharge planning, and clinical support services.

**Intensive Psychiatric Rehabilitation Treatment (IPRT)**
The Intensive psychiatric rehabilitation treatment program is designed to assist persons in forming and achieving mutually agreed upon goals in living, learning, working and social environments with intervention, using psychiatric rehabilitation technologies to overcome functional disabilities and improve environmental supports.

**Outpatient Mental Health**
Refers to periodic visits to a psychiatrist or other behavioral health practitioner for consultation in his or her office, or at a community-based outpatient clinic for mental health treatment.

**Outpatient Drug and Alcohol**
Refers to assistance for individuals who suffer from chemical abuse or dependence and their family members and/or significant others. This includes outpatient rehabilitation services, which are designed to serve individuals with more chronic conditions who have inadequate support systems and either have substantial deficits in functional skills or health care needs requiring attention or monitoring by health care staff.
Personalized Recovery-Oriented Services (PROS)
PROS is a comprehensive recovery-oriented program for individuals with severe and persistent mental illness. The goal of the program is to integrate treatment, support and rehabilitation in a manner that facilitates the individual’s recovery. Goals for individuals in the program are to: improve functioning, reduce inpatient utilization, reduce emergency services, reduce contact with the criminal justice system, increase employment, attain higher levels of education and secure preferred housing. A Limited License PROS program provides only ongoing rehabilitation and support and intensive rehabilitative services.

Assertive Community Treatment (ACT) Teams
ACT teams provide mobile intensive treatment and support to people with psychiatric disabilities. The focus is on improving an individual's quality of life in the community and reducing the need for inpatient care by providing person-centered, intense community-based treatment services by an interdisciplinary team of mental health professionals. Building on the successful components of the Intensive Case Management (ICM) program, the ACT program has low staff-outpatient ratios; 24/7 availability; enrollment of consumers and flexible service dollars. Treatment is focused on individuals who have been unsuccessful in traditional forms of treatment.

Intensive Case Management/Supportive Case Management
Intensive case management (ICM) promotes optimal health and wellness for adults diagnosed with severe mental illness and children diagnosed with severe emotional disorders. Wellness and recovery goals are attained by implementing a person-centered approach to service delivery and ensuring linkages to and coordination of essential community resources. With respect to and affirmation of recipients’ personal choices, case managers foster hope where there was little before. Case managers work in partnership with recipients to advance the process of individuals gaining control over their lives and expanding opportunities for engagement in their communities. All case management programs are organized around goals aimed at providing access to services that encourage people to:
- Resolve problems that interfere with their attainment or maintenance of independence or self-sufficiency
- Maintain themselves in the community rather than in an institution

Health Home Care Coordination and Management
Health home care managers provide comprehensive, integrated medical and behavioral health care management to Medicaid-enrolled adults and children with chronic conditions to ensure access to appropriate services, improve health outcomes, prevent hospitalizations and emergency room visits, and avoid unnecessary care. HHCM services include person-centered, recovery-focused care plans that may include health promotion; transitional care, including appropriate follow-up from inpatient to other settings; patient and family support; and referral to community and social support services.

Inpatient Psychiatric Services - Inpatient Hospital Stay to Treat Psychiatric Disorders

SUD Services
Include participant-centered inpatient and residential services consistent with the beneficiary’s assessed treatment needs, with a rehabilitation and recovery focus designed to promote skills for coping with and managing psychiatric and SUD symptoms and behaviors.
Medically Supervised Outpatient Withdrawal

- **Outpatient SUD services (OASAS BH solo/group practice)**: Outpatient services include participant-centered services consistent with the individual’s assessed treatment needs with a rehabilitation and recovery focus designed to promote skills for coping with and managing symptoms and behaviors associated with substance use disorders. These services are designed to help individuals achieve and maintain recovery from SUDs. Services should address an individual’s major lifestyle and attitudinal/behavioral problems that have the potential to undermine the goals of treatment. Outpatient services are delivered on an individual, family or group basis in a wide variety of settings, including site-based facility, in the community or in the individual’s place of residence.
  - These services may be provided on site or on a mobile basis as defined by the New York State Office of Alcoholism and Substance Abuse Services (OASAS).

- **Opioid treatment program (OPT) — methadone maintenance**: OTPs are federally regulated programs that include direct administration of daily medication (opioid agonists: methadone or buprenorphine or antagonists following a successful agonist taper: naltrexone and injectable (Vivitrol) as well as a highly structured psychosocial program that addresses major lifestyle and attitudinal/behavioral issues that could undermine recovery-oriented goals. The participant does not have a prescription for the methadone or buprenorphine, but receives daily medication from the OTP.

Rehabilitation Services for Residential SUD Treatment Supports (OASAS Service)
In this setting, medical staff is available in the residence. However, it is not staffed with 24-hour medical/nursing services. This setting provides medical and clinical services including: medical evaluation, ongoing medication management and limited medical intervention, medication-assisted substance use treatment when medically necessary, psychiatric evaluation and ongoing management, group, individual and family counseling focused on rehabilitation and increasing coping skills until the patient is able to manage feelings, urges and cravings, and co-occurring psychiatric symptoms and medical conditions within the community. The treatment includes at least 30 hours of structured treatment of which at least 10 hours are individual, group or family counseling. Programs are characterized by their reliance on the treatment community as a therapeutic agent. It is also to promote abstinence from substance use and interpersonal behaviors to effect a global change in participants’ lifestyles, attitudes, and values. Individuals typically have multiple functional deficits, which may include substance-related disorders, criminal activity, psychological problems, impaired functioning and disaffiliation from mainstream values. Level-of-Care Alcohol and Drug Treatment Referral (LOCADTR) criteria are used to determine level of care.

Rehabilitation Services for Residents of Community Residences (Year 2 – OMH Service)
Refers to service-enriched, licensed, extended-stay housing with on-site services for individuals who want private living units but who have minimal self-maintenance and socialization skills. Living units are usually designed as studio apartments or as suites with single bedrooms around shared living spaces. A CR/SRO must maintain 24-hour front desk security and make services available (for example, case management, life skills training, etc.).

Rehabilitation

- **Psychosocial Rehabilitation**: PSR services are designed to assist the individual with compensating for or eliminating functional deficits and interpersonal and/or environmental barriers associated with their behavioral health condition (that is, SUD and/or mental health). Activities included must be intended to achieve the identified goals or objectives as set forth in
the individual’s Recovery Plan. The intent of PSR is to restore the individual’s functional level to the fullest possible (that is, enhancing SUD resilience factors), and as necessary for integration of the individual as an active and productive member of his or her family.

- **Crisis Intervention**: Crisis intervention services are provided as part of a comprehensive specialized psychiatric services program available to all Medicaid-eligible adults with significant functional impairments meeting the need levels in the 1915(i)-like authority resulting from an identified mental health or co-occurring diagnosis. Crisis Intervention services are provided to a person who is experiencing or is at imminent risk of having a psychiatric crisis and are designed to interrupt and/or ameliorate a crisis, including a preliminary assessment, immediate crisis resolution and de-escalation. Services will be geared toward preventing the occurrence of similar events in the future and keeping the person as connected as possible with the environment/activities. The goals of Crisis Intervention services are engagement, symptom reduction and stabilization. All activities must occur within the context of a potential or actual psychiatric crisis.

**Children’s Crisis Intervention**

Refers to services provided to children/youth who are identified as experiencing an acute psychological/emotional change which results in a marked increase in personal distress and which exceeds the abilities and the resources of those involve to effectively resolve it. The services are designed to interrupt and/or ameliorate the crisis experience; include an assessment that is culturally and linguistically sensitive; result in immediate crisis resolution and de-escalation; and the development of a crisis plan. The goals are engagement, symptom reduction, stabilization, and restoring individuals to a previous level of functioning or developing the coping mechanisms to minimize or prevent the crisis in the future. The service is recommended by a licensed medical or behavioral health practitioner. All activities must occur within the context of a potential or actual behavioral health crisis. Services are delivered in a trauma-informed, culturally and linguistically competent manner.

**Children’s Community Psychiatric Supports and Treatment (CPST)**

CPST services are goal-directed supports and solution-focused interventions intended to address challenges associated with a behavioral health need and to achieve identified goals or objectives as set forth in a child’s treatment plan. This includes the implementation of interventions using evidence-based techniques drawn from cognitive-behavioral therapy and/or other evidence-based psychotherapeutic interventions. CPST refers to community-based services provided to children and families who may have difficulty engaging in formal office settings but can benefit from community based rehabilitative services. The service may include rehabilitative psychoeducation, intensive interventions, strength-based treatment planning, rehabilitative supports, crisis avoidance and/or intermediate term crisis management. The service is recommended by a licensed medical or behavioral health practitioner. Services are delivered in a trauma informed, culturally and linguistically competent manner.

**Children’s Family Peer Support Services (FPSS)**

Family Peer Support Services are an array of formal and informal activities and supports provided to families caring for/raising a child who is experiencing social, emotional, medical, developmental, substance use, and/or behavioral challenges in their home, school, placement, and/or community. FPSS provide a structured, strength-based relationship between a family peer advocate and the parent/family member/caregiver for the benefit of the child/youth. The service may include transition support, self-advocacy, parent skill development, and/or community connections and natural supports. The
service is recommended by a licensed medical or behavioral health practitioner. Services are delivered in a trauma-informed, culturally and linguistically competent manner.

**Children’s Other Licensed Practitioner (OLP)**
A nonphysician licensed behavioral health practitioner who is available to provide interventions using evidence-based techniques drawn from cognitive-behavioral therapy and/or other evidence-based psychotherapeutic interventions approved by New York state. OLP does not require a diagnosis and can be provided by a recommending licensed practitioner without diagnosis. This service allows for the delivery of services in the community in order to effectively engage children and youth. Activities include recommending treatment that also considers trauma-informed, cultural variables and nuances; and individual, family and/or group outpatient psychotherapy and behavioral health assessment, evaluation and testing. Services should be offered in the setting best suited for desired outcomes including home, or other community-based setting in compliance with state practice law (including telemedicine). Services are delivered in a trauma-informed, culturally and linguistically competent manner.

**Children’s Psychosocial Rehabilitation (PSR)**
Children’s psychosocial rehabilitation services are designed to restore, rehabilitate, and support a child’s/youth’s developmentally appropriate functioning as necessary for the integration of the child/youth as an active and production member of their family and community with the goal of achieving minimal ongoing professional intervention. Services assist with implementing interventions on a treatment plan to compensate for, or eliminate, functional deficits and interpersonal and/or behavioral health barriers associated with a child/youth’s behavioral health needs. Activities are “hands on” and task-oriented, intended to achieve the identified goals or objectives as set forth in the child/youth’s individualized treatment plan. PSR services are to be recommended by a licensed practitioner and a part of a treatment plan. Services are delivered in a trauma-informed, culturally and linguistically competent manner.

**Children’s Youth Peer Support and Training**
Children’s youth peer support and training services are formal and informal services and supports provided to youth who are experiencing social, medical, emotional, developmental, substance use, and/or behavioral challenges in their home, school, placement, and/or community centered services. These services provide the training and support necessary to ensure engagement and active participation of the youth in the treatment planning process and with the ongoing implementation and reinforcement of skills. Services are delivered in a trauma-informed, culturally and linguistically competent manner.
**Community First Choice Option (CFCO)**

TBD, the following CFCO services will be available:
- Assistive Technology
- Community Transitional Services
- Environmental Modification
- Home Delivered Meals
- Moving Assistance
- Skill Acquisition Maintenance and Enhancement/Community Habilitation
- Vehicle Modification

An individual eligible to receive CFCO services must:
1. Be Medicaid eligible for community coverage with community-based long term care (with or without a spend down) or be Medicaid eligible for coverage for all care and services;
2. Have an assessed institutional level of care; and
3. Reside in his/her own home, or the home of a family member.

**Eye Care and Low-Vision Services**

For a list of providers, please contact 1-866-231-0847 or visit [www.bcbswny.com/stateplans](http://www.bcbswny.com/stateplans). The vision benefit allows for an exam by a participating optometrist once every 24 months or as medically necessary. Standard eyeglasses may be obtained once every two years or as medically necessary when the optometrist prescribes them for the member. Our members can pay as private customers for nonstandard lenses, which are not covered.

Coverage for contact lenses and low-vision aids are limited to specific medically appropriate conditions. No referral is necessary for optometry visits. A member who is diagnosed with diabetes is eligible for an annual dilated eye (retinal) examination.

Members are financially responsible for upgrades of frames and/or lenses not medically necessary (for example, personal preference upgrades).

Optometry services are also provided by Article 28 clinics affiliated with the College of Optometry of the State University of New York. Enrollees may access optometry services directly without prior approval and without regard to network participation.

**CHPlus Eye Care and Low-Vision Services:** The CHPlus vision benefit is as described above, except vision examinations and eyeglasses are covered every 12 months. Eyeglasses may be obtained once every 24 months unless otherwise justified as medically necessary.

**Hearing Services**

Hearing evaluations, diagnostic tests and selective amplification procedures necessary to certify an individual for a hearing aid device, hearing aids and repair services are included. Hearing aid services
are available by PCP referral to participating providers. Hearing aid batteries are also included as part of this benefit.

**Ambulatory Rehabilitation Therapies**
Physical, occupational and speech therapy are covered for the reduction of disability and the restoration of best functional level. Precertification is required for these services. Limitations apply based on line of business. Refer to “Therapy” under the *Other Covered Services* section below.

**Durable Medical Equipment, Prosthetics/Orthotics**
Durable medical equipment (DME) is defined as devices and equipment in the home (other than medical/surgical supplies, enteral formula, and prosthetic or orthotic appliances) for repeated use for the purpose of aiding in treating illness and improving the function of a body part.

- DME and rehabilitative equipment require precertification.
- Coverage includes all items listed on the NYS Fee Schedule.
- Coverage includes equipment servicing but excludes disposable medical supplies.
- DME is not indicated in the absence of illness or injury.
- Orthotic devices are those which are used to support a weak or deformed body or to restrict or eliminate motion in a diseased or injured part of the body.
- Prosthetic appliances are those appliances and devices ordered by a qualified practitioner that replace any missing part of the body.
- Unlisted (‘dump’) codes require an invoice be submitted with the claim and reimbursement is based upon the Amerigroup IPA fee schedule.
- This benefit also includes software or computer applications, allowing devices to generate speech for CHP members diagnosed with ASDs; it does not cover the devices (for example, laptops, tablets or desktop computers) themselves.

**Enteral Formula and Nutritional Supplements**
Enteral formula and nutritional supplements are covered for:

- Children who have metabolic or absorption disorders
- Children who require medical formulas due to mitigating factors in growth and development.
- Individuals who have rare, inborn metabolic disorders
- Tube-fed individuals who cannot chew or swallow

Enteral formula and nutrition supplements will only be covered under the DME benefit. It requires prior authorization and must be obtained through a DME provider rather than a pharmacy.

**Laboratory, Diagnostic and Radiology Services**
Only participating laboratories and radiology services may be authorized by the PCP. A referral form is required. Participating laboratory testing sites providing services must have a permit issued by the NYSDOH and a Clinical Laboratory Improvement Act (CLIA) identification number in addition to one of the following: a CLIA certificate of waiver, a Physician-Performed Microscopy Procedures (PPMP) certificate or a certificate of registration. Those laboratories with certificates of waiver or a PPMP certificate may perform only those specific tests permitted under the terms of the waiver. Laboratories with certificates of registration may perform a full range of laboratory tests for which they have been certified. Physicians providing laboratory testing may perform only those specific limited laboratory procedures identified in the *Physician’s Medicaid Management Information Systems* (MMIS) manual. Radiology services include the provision of diagnostic radiology, diagnostic ultrasound, nuclear
medicine, radiation oncology and MRI. These services may only be performed upon the order of a qualified medical professional, including dentists. Refer to the Precertification Lookup Tool online, as these services may require precertification and clinical review.

Note: Mammograms do not require precertification.

**Podiatry Services**

Services include routine foot care when the enrollee’s physical condition poses a hazard due to the presence of localized illness, injury or symptoms involving the foot or when performed as a necessary and integral part of the treatment of diabetes, ulcers and infections.

Covered podiatry services exclude routine foot care, the treatment of corns and calluses, nail trimming and other foot-related hygienic care in the absence of a pathological condition, unless precertified.

**Private Duty Nursing Services**

Private duty nursing services must be provided in the home and are covered only if authorized as medically necessary by the PCP and upon precertification from us. Private duty nursing is a noncovered benefit for CHP members. Custodial care is not covered by the plan.

**Dental Services — Liberty Dental**

Dental care for members will be handled through Liberty Dental. Liberty Dental will assign your patient to a primary care dentist who will be responsible for all of their general dental needs. This includes checkups, cleanings, routine fillings, extractions and referrals for necessary specialty care. Dental procedures requiring anesthesia and/or planned inpatient admissions or services at an outpatient ambulatory center must first be approved by Liberty Dental. Upon completion of treatment, all facility and anesthesia charges must be billed separately to us. For benefit information, contact the Liberty Dental Provider Hotline at 1-888-352-7924.

**Emergent and Nonemergent Transportation: Medical Answering Services, LLC (MAS)**

In an emergency, members are instructed to call 911. Emergency transportation by air or ambulance is covered without precertification for all members. Planned air transportation (airplane or helicopter) requires precertification.

We and the state of New York partner with MAS to coordinate nonemergency transportation appointments and provide routine transportation to our members in New York. Contact MAS regarding transportation needs for our members in your care. Members can work directly with MAS to ensure they fulfill their scheduled, nonemergent appointments.

**Medicaid Managed Care**: Emergency and nonemergency transportation services are provided by MAS and covered by regular Medicaid. To arrange nonemergency transportation for a member, you or the member should call MAS. If possible, call MAS at least **three days** before the medical appointment and provide:

- Member’s Medicaid identification number (that is, AB12345C)
- Member’s appointment date and time
- Name and address of the provider the member is seeing

For more information, you may also visit the MAS website at [https://www.medanswering.com](https://www.medanswering.com). For county-specific information, call:
• Allegany County: 1-866-271-0564
• Cattaraugus County: 1-866-371-4751
• Chautauqua County: 1-855-733-9405
• Erie County: 1-800-651-7040
• Genesee County: 1-855-733-9404
• Niagara County: 1-866-753-4430
• Orleans County: 1-866-260-2305
• Wyoming County: 1-855-733-9403

The enrollee may have to pay for any service that includes:
• Noncovered services
• Unauthorized services
• Services provided by nonparticipating providers

**Pharmacy Services**

Medicaid Managed Care and CHPlus members should obtain their prescription/nonprescription drugs through the appropriate BlueCross BlueShield preferred drug list. See the Pharmacy section under BlueCross BlueShield covered benefits for more details.

Our pharmacy benefit covers medically necessary medications from licensed prescribers for the purpose of saving lives in emergency situations or during short-term illness, sustaining life in chronic or long-term illness, or limiting the need for hospitalization. Please note certain medication requires prior authorization. Our members have access to most national pharmacy chains and many independent retail pharmacies. Our pharmacy network consists of over 2000 pharmacies in Allegany, Cattaraugus, Chautauqua, Erie, Orleans, Genesee, Niagara and Wyoming counties. It includes CVS Pharmacy, Rite Aid Pharmacy, Tops Pharmacy, Wegmans Pharmacy, and national chains and independent retailers throughout the state.

All members must use a BlueCross BlueShield network pharmacy when filling prescriptions in order for benefits to be covered. To locate a network pharmacy, go to: [http://www.bcbswny.com/stateplans](http://www.bcbswny.com/stateplans).

**Copays**

<table>
<thead>
<tr>
<th>Prescription item</th>
<th>Copay amount</th>
<th>Copay details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Brand-name prescription drugs</td>
<td>$3.00/$1.00</td>
<td>One copay charge for each new prescription and each refill</td>
</tr>
<tr>
<td>Generic prescription drugs</td>
<td>$1.00</td>
<td></td>
</tr>
<tr>
<td>Over the counter drugs (e.g., for smoking cessation and diabetes)</td>
<td>$0.50</td>
<td>Per medication</td>
</tr>
</tbody>
</table>

Copays do not apply to the members and services below:
• Members younger than 21 years old
• Pregnant members; they’re exempt during pregnancy and for the two months after the month in which the pregnancy ends
• Consumers in an OMH or OPWDD Home and Community Based Services (HCBS) Waiver Program
• Consumers in a DOH HCBS Waiver Program for Persons with Traumatic Brain Injury (TBI)
• Family planning drugs and supplies like birth control pills and male or female condoms
• Generic copays (if plan is waiving copay)
• Drugs to treat mental illness (psychotropic) and tuberculosis
• Members belonging to a federally recognized Native American tribe

**Pregnant Women**
Pregnant members are exempt from copays. In some circumstances, it may be necessary for the Pharmacy to enter a “2” in Prior Authorization Type Code field in order to identify the prescription as copayment-exempt.

**Monthly Limits**
Most prescriptions are limited to a maximum 30-day supply per fill.

Members on select asthma controller medications, such as Flovent and Breo Ellipta, are eligible to receive a 90 day supply at a retail pharmacy.

**Covered Drugs**
Our pharmacy program uses a Preferred Drug List (PDL), a list of preferred drugs within the most commonly prescribed therapeutic categories. The PDL is comprised of drug products reviewed and approved by our Pharmacy and Therapeutics (P&T) committee. The P&T committee is comprised of network physicians, pharmacists and other health care professionals who evaluate safety, efficacy, adverse effects, outcomes and total pharmacoeconomic value for each drug product reviewed. Over-the-counter (OTC) medications specified in the NYS Medicaid plan are included in the PDL and are covered if prescribed by a physician.

The PDL is posted on our provider self-service site. For a hard copy, contact the Pharmacy department at 1-866-231-0847.

The following are examples of the covered items:
• Legend drugs
• Insulin
• Disposable insulin needles/syringes
• Disposable blood/urine and glucose/acetone testing agents
• Lancets and lancet devices
• Compounded medication of which at least one ingredient is a legend drug and listed on the BlueCross BlueShield PDL
• Any other drug listed on the BlueCross BlueShield PDL which, under applicable state law, may only be dispensed upon the written prescription of a physician or other lawful prescriber

**Branded versus generic products**
The pharmacy benefit for BlueCross BlueShield members is a mandatory generic program for brand products where there is an equivalent generic. Brand name medications can be available through the PA process. Select medications are excluded from the mandatory generic program, including certain narrow therapeutic index medications.

**Contraceptives**
The pharmacy benefit covers oral contraceptives, contraceptive devices and OTC contraceptives. The member may receive up to a 12 month supply in a single fill.

**Infertility medications**
BlueCross BlueShield will now cover some drugs for infertility including bromocriptine, clomiphene, letrozole, and tamoxifen. This benefit will be limited to coverage for three cycles of treatment per lifetime. In addition, quantity limits and age restrictions apply. Please refer to the Formulary on the provider site for detailed information.

Please refer to the Pharmacy Hot Tips on our website to easily identify preferred products for common therapeutic categories.

**Over-the-Counter (OTC) Drugs**
We have an OTC medication benefit. Our members may obtain a prescription for OTC or nonlegend drugs. The following are examples of OTC medication classes covered. Please refer to our PDL for a list of covered items.
- Analgesics/antipyretics
- Antacids
- Antibacterials, topical
- Antidiarrheals
- Antiemetics
- Antifungals, topical
- Antifungals, vaginal
- Antihistamines
- Contraceptives
- Cough and cold preparations
- Decongestants
- Laxatives
- Pediculocides
- Respiratory agents (including spacing devices)
- Topical anti-inflammatories

**Prior Authorization Drugs**
We strongly encourage you to write prescriptions for preferred products as listed on the appropriate PDL. If, for medical reasons, a member cannot use a preferred product, you’re required to contact Pharmacy Services to obtain prior authorization (PA). Please note that certain drugs on the PDL may be subject to PA.

PA may be requested by submitting an electronic PA through [www.covermymeds.com](http://www.covermymeds.com) or by logging on to Availity. Members will be able to verify the status of a PA on the portal after electronic submission.

PA may be requested by calling Provider Services at 1-866-231-0847. Be prepared to provide relevant clinical information regarding the member’s need for a nonpreferred product or a medication requiring PA. Decisions are based on medical necessity and are determined according to certain established medical criteria.
Please use the appropriate telephone number, as outlined above, to obtain a Prior Authorization Form. A Prior Authorization Form can also be found on our website at www.bcbswny.com/stateplans.

**PA review time frames**

PA requests are reviewed and notification of a decision is made within 24 hours of receipt of a completed request.

To ensure timely processing of requests, all relevant clinical information and previous drug history must be included and/or provided with the request.

**Emergency supply**

BlueCross BlueShield network pharmacies may provide a 72-hour emergency supply of medication to members who have an immediate need to start a medication that is being reviewed for coverage through the PA process. The network pharmacy may enter the designated override code IngenioRx provides and submits a claim for the 72-hour supply of medication. You don’t need to call to request the emergency supply. Emergency supplies are dispensed with no copay. If we approve the PA request, the pharmacy collects the copay when the balance of the prescription is filled. Exclusions may apply.

**Excluded Drugs**

The following drugs are examples of medications that are excluded from the pharmacy benefit:

- Weight control products (except Alli)
- Anti-wrinkle agents (for example, Renova)
- Drugs used for cosmetic reasons or hair growth
- Enteral nutrition products
- Growth hormones used for idiopathic short stature (ISS)
- Drugs used for experimental or investigational indication
- Immunizing agents – except influenza vaccine, pneumococcal vaccine and Synagis
- Infertility medications – except bromocriptine, clomiphene, letrozole, tamoxifen
- Implantable drugs and devices (Norplant, Mirena IUD)
- Erectile dysfunction drugs to treat impotence
- Non-CMS rebatable drugs
- Non-FDA approved drugs

**Specialty Medications**

Specialty medications are high-cost injectable drugs that generally require close supervision and monitoring of the drug therapy. These drugs often require special handling, such as temperature-controlled packaging and overnight delivery and are often unavailable at retail pharmacy stores.

Please refer to the Specialty Drugs on our website for additional information.

**Specialty Drug Program**

Specialty pharmacies are different. A specialty pharmacy does more than just fill prescriptions. These pharmacies serve members with complex or chronic conditions. Specialty medications are used to treat these conditions and often require special storage or extra support. Specialty pharmacies have highly trained pharmacists and nurses to provide personal care and guidance to help you manage your condition.
If you have a specialty condition, you have the option to use IngenioRx Specialty Pharmacy for your specialty medications. These medications are delivered to your home or shipped to a local pharmacy for pickup.

With IngenioRx Specialty Pharmacy, members get:
- Free shipping with confidential, on-time delivery
- 24/7 access to trained professionals
- Individualized care

To schedule delivery for specialty medications, you can contact IngenioRx at 1-833-255-0646.

The list of approved specialty pharmacy providers is subject to changes.

Prescribers can send electronic prescription to IngenioRx Specialty Pharmacy, and may also need to fill out a specialty pharmacy form in addition to calling or fax in in a valid New York State prescription to the pharmacy that the member has chosen.

Certain medical injectables require prior authorization. To determine whether the medical injectable you are prescribing requires prior authorization, please refer to the Precertification Lookup tool online at www.bcbswny.com/stateplans.

**Restricted Recipient Program — Pharmacy**

BlueCross BlueShield and the other MCOs in New York are responsible for managing members in the state’s Restricted Recipient Program (RRP) for enrollees who have been identified as abusing the Medicaid system in some way.

If this monitoring reveals a member’s potential over-usage of providers, pharmacies and prescription medications within a narrow time frame, the member is referred to the Restricted Recipient Program and assigned to a single pharmacy for all drug therapy requirements.

Once we assign a member to a single pharmacy, BlueCross BlueShield notifies the member of the assignment by letter. This notification letter includes the assigned pharmacy’s contact information as well as a brief explanation of our action. Additionally, this letter notifies the member of the option to file an appeal if the member does not agree with our decision to restrict pharmacy access. BlueCross BlueShield also sends letters to the assigned pharmacy and the member’s PCP notifying them of the assignment and the reasons why we are restricting that member’s pharmacy access.

A one-time emergency exception can be made to assure the provision of necessary medication required in an interim/urgent basis when the assigned pharmacy does not immediately have the medication prescribed or when a new prescription is medically needed at a time when the assigned pharmacy is closed. BlueCross BlueShield is able to allow for a 72-hour emergency supply of medication to be filled by a pharmacy other than the designated lock-in pharmacy.

Additional information on the program can be found under Restricted Recipient Program.

**Vaccines**
Coverage for children through 18 years of age continues to be provided through the Vaccine for Children (VFC) program. Participating pharmacies in the VFC program can now submit claims for the administration fee of the flu vaccine through the health plan. The cost of the flu vaccine is covered by the VFC program; however, administration fees can be reimbursed by the health plan when submitted thru the ingredient cost field.

BlueCross BlueShield covers certain pharmacy vaccines for individuals 19 years of age and older as part of the Pharmacy Benefit. These vaccines include:
- Flu
- Pneumonia
- Shingles

**Nurse Practitioner Services**

Nurse practitioners may provide preventive services, diagnose illness and physical conditions and perform therapeutic and corrective measures. A nurse practitioner must have a collaborative agreement and practice protocols with a licensed physician in accordance with the requirements of the NYS Department of Education. A certified nurse practitioner may be used as a PCP.

**Other Covered Services**

**Vaccines for Children Program**
The New York State Department of Health requires physicians and other providers to obtain all vaccines for their Medicaid and Child Health Plus patients through the Vaccines for Children (VFC) program. Providers who are not enrolled in VFC must enroll in order to receive vaccines. Providers who do not participate in the VFC program will not receive free vaccines, nor will they receive payment from BlueCross BlueShield for the cost of the vaccine. BlueCross BlueShield Medicaid and Child Health Plus members cannot be billed for vaccine costs.

For information about VFC enrollment in WNY, contact the VFC program at **1-212-447-8175** Monday through Friday from 9 a.m. to 5 p.m. For information about VFC enrollment in all other locations, contact the New York State VFC program at **1-800-KID SHOTS (1-800-543-7468)** Monday through Friday from 9 a.m. to 5 p.m. More information on VFC can also be found at: [https://www.health.ny.gov/prevention/immunization/vaccines_for_children](https://www.health.ny.gov/prevention/immunization/vaccines_for_children).

**Therapy**

Occupational, physical and speech rehabilitation services rendered for the purpose of maximum reduction of physical or mental disability and restoration of the member to his or her best functional level are covered. Rehabilitation services include care and services rendered by occupational therapists, physical therapists and speech-language pathologists.

Coverage of outpatient physical therapy for MMC and BlueCross BlueShield members are limited to 40 visits per service type per calendar year except for children younger than 21 years of age, members with developmental disabilities and those with brain injuries.

Coverage of outpatient, occupational and speech therapies for MMC and BlueCross BlueShield members are limited to 20 visits per service type per calendar year except for children younger than 21 years of age, members with developmental disabilities and those with brain injuries.
Precertification is not required for outpatient therapy services.

**Midwife Services**
These services apply to the health care management of mothers and newborns throughout the maternity cycle (normal pregnancy, childbirth and the immediate postpartum period of six weeks) and to primary preventive reproductive health care as specified in a written practice agreement, including newborn evaluation, resuscitation and referral for infants. Prenatal and postpartum care may be provided in a hospital on an inpatient basis or outpatient basis, in a diagnostic and treatment center, in the office of the midwife or collaborating physician, or in the member’s home, as appropriate. Deliveries must take place in a hospital setting. The certified nurse midwife must be licensed in accordance with the current NYS rules and regulations governing a midwifery practice.

Refer to your individual contract for further details on covered services related to capitation or inclusive agreements.

**Hearing Aid Services**
Hearing aid devices furnished to alleviate disability caused by the loss or impairment of hearing.

**Court-Ordered Services**
We will provide any benefit package services to members as ordered by a court of competent jurisdiction, regardless of whether such services are provided by participating providers within the plan or by a nonparticipating provider in compliance with such court order. We will reimburse the nonparticipating provider at the Medicaid fee schedule. We’re responsible for court-ordered services to the extent that such court-ordered services are covered by and reimbursable by Medicaid.

**Federally Qualified Health Center Services**
Services provided by a federally qualified health center (FQHC) in accordance with care delivery policies and coverage as outlined in this manual.

**Prescription Footwear**
The prescription footwear benefit covers the following:
- Orthopedic footwear required by children under 21
- Shoes attached to a lower-limb orthotic brace
- Footwear that is a component of a comprehensive diabetic treatment plan to treat amputation, ulcerations, preulcerative calluses, peripheral neuropathy with evidence of callous formation, foot deformities or poor circulation

**Compression Stockings**
Specific gradient compression stockings are covered when prescribed:
- As treatment for open venous ulcers
- For pregnant members

**Smoking Cessation Counseling (SCC)**
SCC is now a covered benefit for all enrollees who smoke. Each Medicaid Managed Care member is allowed eight counseling sessions during any 12 continuous months, which must be provided on a face-to-face basis. SCC complements the use of prescription and nonprescription smoking cessation products. These products are also covered by Medicaid.
**Blood Lead Screening**

Providers will furnish a screening program for the presence of lead toxicity in pregnant women and children that consists of a screening and blood test. During every well-child visit for children between the ages of 6 months and 6 years old, the PCP will screen each child for lead poisoning. A blood test will be performed at 12 months and 24 months of age to determine lead exposure and toxicity. In addition, children over the age of 24 months up to 72 months should receive a blood lead screening if there is not a past record of a test. Individual and group private practices must be certified as Physician Office Laboratories (POLs); facilities must be registered as Limited Services Laboratories (LSLs) to be authorized to conduct blood lead testing onsite and receive reimbursement. LSLs and POLs must bill the health plan for in-office lead testing using CPT-4 procedure code 83655. Reimbursement will be in accordance with agreements between the provider and the health plan.

**Outpatient Laboratory and Radiology Services**

All outpatient laboratory tests, except for CLIA-approved office tests, should be performed at a network facility outpatient lab or at one of the BlueCross BlueShield preferred network labs (LabCorp or Quest Diagnostics). Visit the CMS website at [www.cms.hhs.gov](http://www.cms.hhs.gov) for a complete list of approved accreditation organizations under CLIA.

**Noncovered Services**

The following services are not covered:

- Certain noncovered behavioral health services
- Certain noncovered mental health services
- Certain rehabilitation services provided to residents of the Office of Mental Health licensed community residences and family-based treatment programs
- Office of Mental Retardation Developmental Disabilities services
- The following pharmacy services:
  - Hemophilia blood factors for TANF, CHPlus members
  - Hemophilia blood factors, risperidone microspheres (Risperdal Consta), paliperidone palmitate (Invega Sustenna) and olanzapine (Zyprexa Relprevv) for SSI members
- Preschool supportive health services
- School supportive health services
- Comprehensive Medicaid case management

Infertility services are not covered by BlueCross BlueShield (also stated under the Excluded Drugs Section) or by FFS Medicaid.

**Note:** The coverage of any experimental procedures or experimental medications is determined on a case-by-case basis.

**New Baby, New Life℠ Program**

New Baby, New Life is a proactive case management program for all expectant mothers and their newborns. It identifies pregnant women as early in their pregnancies as possible through review of state enrollment files, claims data, lab reports, hospital census reports, provider notification of pregnancy and delivery notification forms, and self-referrals. Once pregnant members are identified, we act quickly to
assess obstetrical risk and ensure appropriate levels of care and case management services to mitigate risk.

Experienced case managers work with members and providers to establish a care plan for our highest risk pregnant members. Case managers collaborate with community agencies to ensure mothers have access to necessary services, including transportation, WIC, home-visitor programs, breastfeeding support and counseling. When it comes to our pregnant members, we are committed to keeping both mom and baby healthy.

All identified pregnant women receive:
- Individualized, one-on-one case management support for women at the highest risk.
- Care coordination for moms who may need a little extra support.
- Educational materials and information on community resources.
- Rewards to keep up with prenatal and postpartum checkups and well-child visits after the baby is born.

As part of the New Baby, New Life program, members are also offered the My Advocate® program. This program provides pregnant women proactive, culturally appropriate outreach and education through interactive voice response (IVR), text or smart phone application. This program does not replace the high-touch case management approach for high-risk pregnant women; however, it does serve as a supplementary tool to extend our health education reach. The goal of the expanded outreach is to identify pregnant women who have become high-risk, to facilitate connections between them and our case managers and improve member and baby outcomes. Eligible members receive regular calls with tailored content from a voice personality (Mary Beth). For more information on My Advocate visit https://myadvocatehelps.com.

Notification of pregnancy and delivery to BlueCross BlueShield at 1-800-964-3627 is required at the first prenatal visit and following birth.

You should also complete the Availity platform’s Maternity HEDIS Form.
- Perform an Eligibility and Benefits request on a member and choose one of the following benefit service types: Maternity, Obstetrical, Gynecological, Obstetrical/Gynecological.
- Before you see the benefit results screen you will be asked if the member is pregnant and given a Yes or No option. If you indicate “Yes” you will be asked what the estimated due date is and can fill that date out if you have an estimate or leave it blank if you do not.
- After you submit your answer you will be taken to the benefits page like normal. In the background a HEDIS Maternity form will have been generated for this patient in the Maternity application in the Payer Spaces for the health plan. 

Our case managers are here to help you. If you have a member in your care that would benefit from case management, please call us at 1-866-231-0847, ext. 61000. Members can also call our 24-hour Nurse Helpline at 1-866-231-0847 (TTY 711), available 24 hours a day, 7 days a week.

Notification at 1-866-231-0847 is required at the first prenatal visit. You can also arrange to notify the health plan directly on a weekly basis. Ask your Provider Relations representative how to get started.
You and Your Baby in the NICU

For parents with infants admitted to the neonatal intensive care unit (NICU), we offer the You and Your Baby in the NICU program and a NICU post traumatic stress disorder (NICU PTSD) program. Parents receive education and support to be involved in the care of their babies, visit the NICU, interact with hospital care providers and prepare for discharge. Parents are provided with an educational resource outlining successful strategies they may deploy to collaborate with the care team. The NICU PTSD program seeks to improve outcomes for families of babies who are in the NICU by screening and facilitating referral to treatment for PTSD in parents. This program will support mothers and families at risk for PTSD due to the stressful experience of having a baby in the NICU.

Self-Referral Services

The following services do not need a referral from a PCP:

- Emergency care (regardless of network status with BlueCross BlueShield)
- Family planning (Medicaid Managed Care members have free access to either network or non-network FFS providers. CHPlus members have direct access to network providers)
- Behavioral health assessments (nonparticipating providers must seek prior approval from BlueCross BlueShield)
- OB care (nonparticipating providers must seek prior approval from BlueCross BlueShield)
- Well-woman/GYN care (nonparticipating providers must seek prior approval from BlueCross BlueShield)
- EPSDT/well-child (nonparticipating providers must seek prior approval from BlueCross BlueShield)
- Tuberculosis, STD, HIV/AIDS testing and counseling services (regardless of network status with BlueCross BlueShield)

Restricted Recipient Program

BlueCross BlueShield and the other MCOs in New York are responsible for managing members in the state’s Restricted Recipient Program (RRP) for enrollees who have been identified as abusing the Medicaid system in some way.

These members will have one or more of the following restrictions in place:

- Primary medical provider (this can be a physician, physician group or clinic)
- Primary pharmacy (an additional pharmacy can be added if the member needs a specialty item available only at said pharmacy)
- Primary hospital provider
- Primary dental provider (may be a dental clinic or a dentist)
- Primary DME provider
- Primary podiatrist (rarely used)
**Who is a Restricted Recipient?**

Enrollees are identified as restricted recipients if they have demonstrated a pattern of abusing or misusing covered services. Some of the members may be restricted for engaging in fraudulent or unwarranted pharmacy utilization. Restricted recipients may be enrolled in TANF, SSI and within a New York Medicaid program. Enrollees may be restricted to one or more RRP providers for receipt of medically necessary services included in the benefit package.

For example, if a restricted recipient has excessive visits with multiple primary care providers, the restricted recipient will be assigned to one primary care provider for a determined time frame. **A member may have more than one restriction.**

**Restricted Recipients and Continuity of Care**

We will manage the member’s restriction. BlueCross BlueShield restricts the member to the PCP, pharmacy or provider and duration of the restriction.

For members receiving services from nonparticipating providers, BlueCross BlueShield will authorize continued visits for the 60-day provision. Members will then be transitioned and restricted to an in-network provider.

Members will have access to providers outside the specific provider restriction type. The member’s PCP will manage his or her care and provide referrals as appropriate.

Please note: Restrictions can be placed by an MCO such as BlueCross BlueShield or the Office of the Medicaid Inspector General; therefore, BlueCross BlueShield providers must check EPACES prior to rendering services to verify eligibility and identify any restriction a member may have.

**Member Rights and Responsibilities**

Members have rights and responsibilities when participating with an MCO. Our Member Services representatives serve as advocates for BlueCross BlueShield members. The following lists the rights and responsibilities of members.

**Members have the right to:**

- Be cared for with respect, without regard for health status, gender, gender identity, race, color, religion, national origin, age, marital status or sexual orientation. If you have any questions or concerns about this right, call **1-866-231-0847** or visit [www.bcbswny.com/stateplans](http://www.bcbswny.com/stateplans).
- Be told where, when and how to get the services they need from BlueCross BlueShield.
- Be told by their PCP or another practitioner what is wrong, what can be done for them and what will likely be the result, in a language they understand.
- Get a second opinion about their care.
- Give their approval to any treatment or plan for their care after that plan has been fully explained to them.
- Refuse care and be told what the risks are if they refuse care.
- Get a copy of their medical records, talk about it with their PCP or another practitioner and ask that their medical record be amended or corrected, if needed.
- Be sure their medical records are private and will not be shared with anyone except as required by law, contract or with their approval.
• Get a copy of the Notice of Privacy Practices that explains patient rights on Protected Health Information (PHI) and the responsibility of BlueCross BlueShield to protect PHI. This includes the right to know how BlueCross BlueShield handles, uses and gives out PHI.
  o PHI is defined by HIPAA Privacy Regulations as information that:
    ▪ Identifies a member or can be used to identify a member.
    ▪ Comes from a member or has been created or received by a health care provider, a health plan, employer or a health care clearinghouse.
    ▪ Has to do with physical or mental health condition, providing health care to a member, or paying for providing health care to a member.
• Use the BlueCross BlueShield complaint and appeal system to settle any complaints or appeals or to complain to the NYSDOH or the local Department of Social Services anytime a member feels he or she has not been treated fairly, or about the organization or the care it provides.
• Use the state fair hearing system (except for CHPlus members).
• File an action appeal as a result of BlueCross BlueShield denying a service authorization request from a member or their doctor.
• Appoint someone (relative, friend, lawyer, etc.) to speak for them if they are unable to speak for themselves about their care and treatment or if they simply want someone else to speak for them.
• Have access to a PCP or a backup PCP 24 hours a day, 365 days a year for urgent care; this information is on their BlueCross BlueShield member ID card.
• Choose a PCP, choose a new PCP and have privacy during a visit with a health care provider.
• Be referred to a non-network provider if BlueCross BlueShield does not have an appropriately trained provider in our network.
• Receive needed medical services within a reasonable amount of time.
• Take part in making decisions about their health care with their health care provider.
• Receive information on available treatment options and alternatives, regardless of cost or benefit coverage.
• Receive considerate, respectful care in a clean, safe environment free of unnecessary restraints.
• Choose any of our BlueCross BlueShield network specialists after getting a referral from their PCP.
• Be referred to specialists who are experienced in treating disabilities, if needed.
• Receive information about BlueCross BlueShield, its services, policies and procedures, providers, member rights and responsibilities, and any changes made.
• Know about all benefits and medical services available from BlueCross BlueShield.
• Request information about the plan, including clinical review criteria used by the plan in a utilization review decision on a specific disease or condition.
• Get a current directory of providers within the BlueCross BlueShield network.
• Know how BlueCross BlueShield pays providers so members know if there are financial incentives or disincentives tied to medical decisions.
• Decide ahead of time the kind of care they want if they become sick, injured or seriously ill by making a living will.
• If younger than age 18, expect they will be able to participate in and make decisions about their own and their child’s health care if they are married.
• Continue as members of BlueCross BlueShield despite their health status or need for care.
• Call our 24/7 NurseLine toll free at 1-866-231-0847.
• Call our Member Services department toll free at 1-866-231-0847 from 8:30 a.m. to 6 p.m. ET Monday through Friday (except for state holidays).
• Discuss questions they may have about their medical care or services with BlueCross BlueShield by calling Member Services at 1-866-231-0847.
• Get help from someone who speaks their language.
• Make suggestions about the BlueCross BlueShield member rights and responsibilities policy.

Members have the responsibility to:
• Learn about how their health care plans work.
• Carry their BlueCross BlueShield ID cards at all times; members should report any lost or stolen cards to BlueCross BlueShield immediately and contact BlueCross BlueShield if card information is wrong or if their name, address or marital status changes.
• Show their ID cards to providers and tell BlueCross BlueShield about any providers they are currently seeing.
• Work with their PCPs or other practitioners to guard and improve their health.
• Give BlueCross BlueShield, their PCPs or other practitioners the information they need to take care of their medical needs.
• Listen to advice from practitioners and ask questions when they are in doubt.
• Know and get involved in their health care; members should talk with their PCPs or other practitioners about recommended treatment and follow the plans and instructions for care agreed upon, to the best of their ability.
• Get information and understand their health problems and consider treatments so they can participate in developing mutually agreed upon treatment goals before services are performed.
• Call or go back to their PCPs or other practitioners if they do not get better.
• Ask for a second opinion.
• Treat health care staff with the same respect the member expects.
• Tell BlueCross BlueShield if they have problems with any health care staff by calling Member Services.
• Keep their appointments; if they must cancel, call as soon as they can.
• Only use emergency rooms for true emergencies.
• Receive their covered, nonemergency medical services from BlueCross BlueShield providers.
• Call their PCPs when they need medical care, even if it is after office hours.
• Get PCP referrals before they go to or take their children to a hospital or a specialist (except for emergencies and self-referral services).
• Know how to take their medicines the right way.
• Be responsible for copays as described in their member handbook.
• Be aware that refusing the treatment suggested by their providers may have serious consequences for their health or the health of their children.
• Inform their PCPs about their health or the health of their children.
• Authorize PCPs to get copies of their medical records and those of their children.
• Learn about and follow BlueCross BlueShield health plan membership rules.
• Clearly state their complaints or concerns.
6 BEHAVIORAL HEALTH SERVICES

Overview

The BlueCross BlueShield Behavioral Health program was created to manage the needs of members seeking treatment for substance use and mental health problems.

BlueCross BlueShield complies with state Medicaid guidance including managed care policy documents, relevant performance improvement specification documents or manuals, and policies governing prior authorization, concurrent or retrospective review. Specifically, we incorporate the following resources into our policies and procedures:

- Office of Mental Health’s Clinic Standards of Care ([www.omh.ny.gov/omhweb/clinic_standards/care_anchors.html](http://www.omh.ny.gov/omhweb/clinic_standards/care_anchors.html))
- Office of Health Insurance Programs’ Policy and Proposed Changes to Transition Children in Direct Placement Foster Care into Medicaid Managed Care, April 2013 ([https://www.health.ny.gov/health_care/medicaid/redesign/docs/policy_and_proposed_changes_fc.pdf](https://www.health.ny.gov/health_care/medicaid/redesign/docs/policy_and_proposed_changes_fc.pdf))
- Office of Health Insurance Programs’ Principles for Medically Fragile Children, July 2014
- OPWDD HCBS waiver and other services available to persons with developmental disabilities ([https://opwdd.ny.gov](https://opwdd.ny.gov))

Each member’s treatment should be individualized/person-centered and focused on improving the member’s overall well-being. Providers should deliver care in a manner which adheres to recovery-oriented principles.

This should involve coordination of care with the member’s PCP, other treating providers and referrals for community support services when necessary. Members do not need a referral from their PCP to access behavioral health services; however, the PCP should actively engage in identifying the need for behavioral health services for their patients and remain involved in treatment planning for all patients with behavioral health issues. If a member is using a behavioral health clinic that also provides primary care services, the member may select the lead provider to be his or her PCP. Providers must use the Level-of-Care for Alcohol and Drug Treatment Referral (LOCADTR) 3 assessment tool for level-of-care determination or Office of Alcoholism and Substance Abuse Services (OASAS). For all mental health services, BlueCross BlueShield and MCG Care Guidelines medical necessity criteria will be used to assess medical necessity. For all substance use services, state approved LOCADTR 3 criteria will be used.

PCPs must actively collaborate and maintain documentation of these efforts with behavioral health practitioners when:

- The PCP is prescribing psychotropic medication.
- A medical condition exists that complicates a behavioral condition.
• There is a potential for adverse reaction between prescribed medications.
• The treating psychiatrist is prescribing a psychotropic medication that requires medical monitoring.

Collaboration is strongly encouraged to provide optimal care and successfully identify and ensure the safety of the patient. Without collaboration, members may remain untreated if PCPs do not recognize members at risk for, or with, active mental or addictive disorders. Effective working relationships between providers and other treatment partners and service sites will result in improved continuity and coordination of care, increased member satisfaction and higher quality, efficiency and effectiveness of services. All collaboration efforts should be documented in the medical record.

BlueCross BlueShield promotes behavioral health/medical integration for children, including at-risk populations as defined by the state.
• Providers can access Provider Services for information related to referral and linkage support for child and adolescent patients.
• The Health Home or BlueCross BlueShield will coordinate access to rapid consultation from child and adolescent psychiatrists. Staff will assist in reviewing urgent medical need and make necessary linkages to behavioral health providers to best serve the child/family need.

Behavioral health care practitioners should communicate with the member’s PCP:
• For the exchange of clinical information, when necessary, that may aid in diagnosis and/or treatment
• When the PCP’s support for a treatment plan would enhance member satisfaction and/or compliance
• When there are possible medical comorbidities and/or medication interactions that need to be considered
• When the PCP has requested immediate feedback

BlueCross BlueShield will be conducting annual site visits at select providers’ offices to provide education and to perform a chart review to verify that collaboration of care and clinical documentation is occurring. In addition, BlueCross BlueShield will educate providers regarding the plan support for provider access to 1) rapid consultations from child and adolescent psychiatrists and 2) referral and linkage support for child and adolescent patients. Training will be part of the initial orientation and ongoing trainings for providers.

**Meeting the Needs of Children and Youth Members**

BlueCross BlueShield ensures participating providers have expertise in caring for medically fragile children (including children with co-occurring developmental disabilities) so they receive services from appropriate providers. We expanded our current provider training curriculum to reflect the expanded children's benefit and populations. BlueCross BlueShield has initial training available of newly contracted providers or provider groups within 30 calendar days of participating status date or contract effective date, whichever is later. This includes all new plan providers who join the network and work with the expanded children benefit and populations, including OMH licensed, OASAS certified and VFCA. We also conduct ongoing training as deemed necessary in order to ensure compliance with NYS regulations and in trainings that promote member wellness and recovery. Trainings will be offered in person, via WebEx or online (website or other online options). These trainings will be offered at a date and time convenient to the provider.
BlueCross BlueShield will communicate sessions offered to all providers via mailings and/or provider website postings and will be updated regularly.

Participating providers should refer to appropriate, in-network community and facility providers to meet the needs of the child or seek authorization from BlueCross BlueShield for out-of-network providers when participating providers can’t meet the child’s needs. BlueCross BlueShield authorizes these services in accordance with established time frames in the Medicaid Managed Care Model Contract and Office of Health Insurance Program’s Principles for Medically Fragile Children (under EPSDT, HCBS, and CFCO rules) as well as with consideration for extended discharge planning.

BlueCross BlueShield works to comprehensively meet the needs of children and youth under 21 years of age with behavioral health and HCBS. This includes addressing the needs of medically fragile children, children with behavioral health diagnosis(es) and children in foster care with developmental disabilities.

**Special Considerations for Transitioning Services**

Effective January 1, 2019, new New York state Medicaid state plan services transitioned to managed care to more fully integrate children and youths’ access to physical and behavioral health care (for more information on covered benefits being transitioned, see the Covered Benefits for Children section in the BlueCross BlueShield Health Care Benefits chapter). HCBS covered under fee for service (FFS) are transitioning October 1, 2019.

For continuity of care purposes, transitioning 1915(c) waiver children remain eligible for HCBS until at least one year after their initial Health Home Child and Adolescent Needs and Strengths Assessment — New York version (CANS-NY) without the need for the new HCBS level of care eligibility determination. Children will continue with their existing providers including medical, behavioral health and HCBS providers for a continuous episode of care after October 1, 2019. This requirement will be in place for the first 24 months of the transition and applies only to episodes of care that were ongoing during the transition period from FFS to managed care. Similarly, children will not be required to change Health Homes or their Health Home care management agency at the time of the transition. If the existing Health Home is out-of-network, BlueCross BlueShield will pay on a single-case basis. This linkage between care managers, children and families help to preserve care manager/agency relationships with the child and their family, continuity of care and ensure a seamless transition. Also, the transitioning children will have a plan of care that crosswalks 1915(c) waiver services to 1115 or state plan for continued authorization.

The state will contract with an independent entity (IE) that will have administration of processes and quality oversight related to children’s HCBS processes. The role of the IE will be to accept referrals of 1915(c) waiver transitioning children who are eligible or in receipt of HCBS and who opt out of enrolling into a Health Home. For children enrolled with the plan, the plan will monitor access to care and coordinate with the IE to maintain the HCBS plan of care.

Children who are already enrolled in Medicaid who are believed to be HCBS eligible and or in need of HCBS will be referred to a Health Home. Health Home care managers will work with the child, family and providers to determine HCBS eligibility. The level of care determination is comprised of meeting three factors: target population, risk factors and functional criteria as outlined in the state requirements for the children’s 1115 waiver demonstration.
Provider Reimbursements Throughout the Transition
BlueCross BlueShield will reimburse at least the Medicaid FFS fee schedule for 24 months or as long as New York state mandates (whichever is longer) for the following services/providers:

1. New state plan services including OLP; crisis intervention; CPST; PSR; family peer support services and youth peer support and training; and preventive residential supports.
2. OASAS clinics (Article 32 certified programs)
3. All OMH licensed ambulatory programs (Article 31 licensed programs)
4. Home and community-based services (HCBS)

BlueCross BlueShield will execute single case agreements with nonparticipating providers to meet clinical needs of children when in-network services are not available. BlueCross BlueShield will reimburse the Medicaid FFS fee schedule for 24 months for all single-case agreements.

Providers who historically delivered care management services under one of the 1915(c) waivers being eliminated, and who will provide care management services that are being transitioned to Health Home, may receive a transitional rate for no more than 24 months. The transitional rates will be as financially equivalent as practical to the interim rates (and as reconciled) established under the former waivers and in place immediately prior to their transition to Health Home.

BlueCross BlueShield will contract with OASAS residential programs and pay their allied clinical service providers on a single case or contracted basis for members who are placed in an OASAS certified residential program to ensure access to and continuity of care for patients placed outside of the BlueCross BlueShield service area.

New State Plan Service and Aligned Home and Community-based Services Eligibility

The State Plan Service and Home and Community-Based Services (HCBS) waiver is a federally approved initiative permitting the state of New York to make certain services available under Medicaid, not typically included in the Medicaid state plan for a targeted group of individuals with specific health needs and who meet specific eligibility criteria. HCBS will be managed in compliance with CMS HCBS Final Rule and any applicable state guidance.

HCBS are designed to allow children/youth to participate in a vast array of habilitative services by granting access to a series of Medicaid funded services. New York has affirmed its commitment to serving individuals in the least restrictive environment by providing services and supports to children and their families to enable them to remain at home and in the community. HCBS are designed for people who (but for these services) require the level of care provided in a more restrictive environment such as in a long-term care facility or psychiatric inpatient care and for those at risk of elevating to that level of care.

The new state plan services will provide services that focus on:

- Prevention and wellness
- Improving integration of behavioral health and health-focused services earlier in a child’s life
- Allowing interventions to be delivered in natural community-based settings where children and their families live
- Making available lower intensity services for children that present the need for more restrictive settings and higher intensity services.
The new state plan services are rehabilitative services under the EPSDT benefit and available to children/youth under the age of 21 who are Medicaid eligible, that meet medical necessity. These services known as Children and Family Treatment and Support Services (CFTSS) can be delivered in the community where the child/youth lives, attends school, and/or engages in services. These services include: other licensed professional (OLP), crisis intervention, community psychiatric supports and treatment (CPST), psychosocial rehabilitation services, family peer support services, youth peer advocacy and training.

**Who May Provide Care?**

An incorporated, not-for-profit agency or governmental entity may apply to be a provider of the new state plan services. A certification process exists for both licensed and unlicensed OASAS or OMH providers. Providers must apply for designation and, if necessary, apply for OMH license and OASAS certification.

Interested agencies currently OMH licensed and OASAS certified should sign the *Attestation for Currently Certified OASAS Providers and Currently Licensed OMH Providers Form* at [https://www.oasas.ny.gov/legal/CertApp/capphome.cfm](https://www.oasas.ny.gov/legal/CertApp/capphome.cfm).

The Department of Health website [https://www.health.ny.gov/health_care/medicaid/redesign/behavioral_health/children/proposed_s pa.htm](https://www.health.ny.gov/health_care/medicaid/redesign/behavioral_health/children/proposed_s pa.htm)

- Contains information regarding the CFTSS including webinars, trainings and timelines, the CFTSS manual and HCBS service definitions and criteria.

- Contains information regarding HCBS; Children’s 1115 Waiver Amendment and HCBS manual and rates.

**HCBS Care Process**

The plan collaborates with Health Homes, medical providers and behavioral health providers to ensure children are appropriately reviewed for eligibility of HCBS services; a plan of care is developed with the child and family; appropriate referrals to service providers are made; services are provided and the level of care for the child is met.

The HCBS care process involves the following steps:

- The individual is determined to be eligible or reassessed annually for HCBS services.
- A plan of care is developed with the child and the family that meets the specific needs of the member whether the child is developmentally disabled, medically fragile or with specific behavioral health needs.
- Referrals are made to HCBS providers. These providers are certified by the state and are also contracted with the plan’s network.
- The child will access the services and the service provider will ensure the child’s level of care is assessed and communicated to the plan.
- The plan will perform ongoing monitoring of the child’s plan of care to ensure that services are being accessed and that the child is progressing with the plan of care goals.
Description of referral process for HCBS and HCBS eligibility assessment

There are potentially three points of referral for a child into HCBS services who are currently not engaged with HCBS services:

- Community/medical providers — may identify in collaboration with the family that the child could benefit from the HCBS array of services. These providers may include the child’s PCP, specialist, community supports and government agencies (for example, foster care; OPWDD).

- Health Homes — a child enrolled with a Health Home may not be currently engaged with HCBS services. A Health Home may, through review of the child’s care plan, identify that the child may benefit from specific HCBS services.

- The Health Plan identifies children who could potentially be eligible for services through plan claims’ data. These children are referred to a Health Home who then reaches out to the family regarding the HCBS services and their benefit to the child.

Children who are currently engaged with 1915(c) waiver services prior to the effective date of the Children’s Transition October 1, 2019, will be transitioned into 1115 waiver services as defined by the state’s transition time line and will be coordinated by the Health Home and evaluated using the CANS-NY assessment. More information related to the state’s timeline and the transition process can be found on the state website at https://www.health.ny.gov/health_care/medicaid/redesign/behavioral_health/children/index.htm.

The referral to HCBS services may be submitted on one of two ways: 1) submitted in writing using the Universal Referral Form or 2) submitted online using one of the available Health Home portals. A copy of the Universal Referral Form is available on the plan website in the Health Home section for the provider’s convenience. The referral form is accepted by the Health Home who completes the initial eligibility assessment for the level of care and level of need of the child.

Both level of care and level of need determinations involve/require the completion of a common assessment tool, the CANS-NY (except for LOC DD). The results of a comprehensive CANS-NY will play a role in determining functional deficits and identifying risk factors for the child. The target criteria, risk factors and functional limits are to be documented in the Uniform Assessment System.

Once determined to be eligible, the child is referred to an in-network HCBS service provider who meets with the child/family to begin the service delivery process. The HCBS provider will complete an intake/assessment regarding their particular service area to determine frequency, scope, and duration in conjunction with the family/child. The HCBS provider will coordinate with the Health Home care manager or independent entity to provide them with these details to inform and update the plan of care. The child will access the services and the HCBS service provider will ensure the child’s level of care is assessed and communicated to the plan.

Plan of care by Health Home care managers

For children enrolled in an MMCP, within 30 calendar days from the completion and signed (initial) plan of care (POC), the HHCM must send the POC to the MMCP with whatever information is available at that time.
If the POC that is sent to the MMCP is an HCBS only POC, then when the HHCM develops a comprehensive POC that complies with Health Home Serving Children standards (within 60 days of Health Home enrollment), the POC must be resent to the MMCP.

- If the F/S/D has not been reported from each of the providers or services, then the POC must still be updated and sent to the MMCP within the 30-calendar day timeframe.
  - Once the remaining providers and or services have been reported with F/S/D, then the POC will be updated again with the new information within 10 business days of being notified by the HCBS provider of the F/S/D on the Children’s HCBS Authorization and Care Manager Notification Form and the updated POC is shared with the MMCP.
  - If a new need and or service is identified by the HHCM, child/family, involved providers, etc., then the above outlined steps would be followed and the HHCM sends the updated POC to the MMCP within 30 calendar days of the revision.

Note: If the member is in urgent need of services and/or will go over the initial 60 days/96 units/24 hours prior to the POC being sent to the MMCP, once the MMCP received the Children’s HCBS Authorization and Care Manager Notification Form the MMCP will contact the HHCMA/HHCM to verify the POC.

Plan of care by C-YES:

C-YES must develop an HCBS POC using information from the HCBS/LOC Eligibility Determination, and a person-centered discussion that identifies personal goals and how specific HCBS may support the child in achieving those goals.

- For children who are in fee-for-service Medicaid and not in a Health Home: C-YES will develop an HCBS POC with Frequency, Scope, and Duration, updating the HCBS POC using the information provided by the HCBS providers from the Children’s HCBS Authorization and Care Manager Notification Form. C-YES will conduct person-centered meetings with the child and family at least quarterly or upon significant change and update the POC as necessary.
- For children who are enrolled in an MMCP and not in a Health Home: C-YES must send the HCBS POC to the MMCP within 15 calendar days of its development with whatever information is available at that time. The MMCP is required to update the HCBS POC with the child/family using the information provided by the HCBS providers from the Children’s HCBS Authorization and Care Manager Notification Form and related service authorization determinations. The MMCP will meet with the child and family as needed to maintain the POC with person-centered service planning and care management for children with special needs as per the Model Contract.

C-YES will determine annual HCBS/LOC Eligibility and conduct an annual review and will coordinate with the MMCP to update the HCBS POC, with signatures based upon the HCBS/LOC reassessment.

The plan will be prompted to automatically authorize HCBS upon notification by the HCBS provider that the child has engaged in care. It is required that the Health Home care manager submits a plan of care listing the specific HCBS prior to the date of the first HCBS appointment — this serves as notice to the plan and will permit initial authorization of the service.

The initial authorization will be effective for 60 days from the date of initial receipt. The automatic authorization permits by service and includes 96 units or a total of 24 hours of service, not to exceed 60 calendar-day duration. BlueCross BlueShield will require concurrent review if the HCBS exceeds 60 days/96 units/24 hours of service (whichever is first). The HCBS provider will submit the Authorization
Form to BlueCross BlueShield to request additional service. The request must include the recommended scope, frequency and duration of the service. To avoid disruption in service, the HCBS provider is encouraged to submit this request as soon as it is apparent that the service will exceed the limit. Requests submitted less than 14 days before expiration of service may not be authorized before runout. BlueCross BlueShield will review the request and issue a concurrent review determination within the authorization request time frames described in the Medicaid Managed Care Model Contract. BlueCross BlueShield may request additional information related to the service authorization request from the HCBS provider to ensure that the service is appropriate and meets the needs of the child.

BlueCross BlueShield will notify the child, parent, guardian, and legally authorized representative, HCBS provider and the Health Home care manager of the service authorized and timeframe of authorization.

The plan will perform ongoing monitoring of the child’s plan of care to ensure that services are being accessed and that that the child is progressing with the plan of care goals.

Plan will ensure the following:

- Children who are eligible for HCBS have care management and a care plan for their HCBS services.
- Health Home care managers develop a single Health Home comprehensive plan of care that includes all services the member needs (health, behavioral health, community and social supports, specialty services, etc.).

**Targeted Population for HCBS**

To access HCBS, a child must be determined eligible based on meeting target and risk factors in addition to functional deficits measured by the CANS-NY assessment. Children already receiving HCBS through enrollment in a 1915(c) waiver will have continued access to HCBS for as long as the child continues to meet the eligibility criteria for the 1915(c) waiver.

Children and youth seeking HCBS must be under 21 years old and eligible for Medicaid. HCBS eligibility is comprised of three components: 1) target criteria, 2) risk factors and 3) functional criteria.

There are 2 HCBS eligibility groups:
1. Level of care: children that meet institutional placement and
2. Level of need: children who are at risk of institutional placement.

The services are accessible to the child once a provisional Plan of Care (POC) is in place. The Plan will ensure that the POC was developed in a person-centered manner, compliant with federal regulations and state guidance, and meets individual needs.

Both level of care and level of need determinations involve/require the completion of a common assessment tool, the CANS-NY (except for LOC DD).

The results of a comprehensive CANS-NY will play a role in determining functional deficits and identifying risk factors.
Whether a child meets the level of care or the level of need criteria, eligible children, youth and their families will have access to the same array of HCBS services which will be provided in a person-centered manner.

**Providers of HCBS and the new state plan services must also be enrolled in the Medicaid program for billing and reimbursement purposes.**

**Targeted Population for State Plan Services**
The new state plan services are rehabilitative services under the EPSDT benefit and available to children/youth under the age of 21 who are Medicaid eligible, that meet medical necessity. The medical necessity criteria is specific to each SPA service.

**Office of Persons with Developmental Disabilities**
The Office of Persons with Developmental Disabilities (OPWDD) Home- and Community-Based Services (HCBS) waiver is a federally approved initiative permitting the state of New York to make certain services available under Medicaid not typically included in the Medicaid state plan for a targeted group of individuals with developmental disabilities and who meet specific eligibility criteria.

The waiver is intended to decrease the risk of institutionalization by providing personalized services in the community. These services are based on the needs, preferences and personal goals of the consumer.

Waiver-funded services emphasize individualized services, community inclusion, independence and productivity. The OPWDD HCBS waiver was designed to reduce costs while increasing choice and flexibility in service.

**Who May Provide Care?**
An incorporated, not-for-profit agency or governmental entity may apply to be a provider of waiver services. Individuals interested in becoming an authorized provider must obtain not-for-profit status. Evidence of article of incorporation noting the practitioner will provide services to persons with developmental disabilities will be required.

Interested agencies should contact the OPWDD Developmental Disabilities Services Office (DDSO) in their county.

**Targeted Population**
To be eligible to participate in the OPWDD HCBS waiver, an individual must:
- Be diagnosed with a developmental disability.
- Be eligible for intermediate care facility (ICF)/mental retardation (MR) level of care.
- Be eligible for Medicaid.
- Choose HCBS waiver services over institutional care.

An individual with a developmental disability and residing in New York can request enrollment in the HCBS waiver by contacting their county’s DDSO.
Providers of waiver services must also be enrolled in the Medicaid program for billing and reimbursement purposes.

For additional information regarding the OPWDD HCBS waiver and other services available to persons with developmental disabilities, visit the OPWDD website at www.opwdd.ny.gov.

For a listing of DDSOs, visit http://www.opwdd.ny.gov.

Service Utilization Review of HCBS and new State Planned Services

The plan will review service utilization to ensure compliance with the approved plan of care. The plan will develop reports with the goal of identifying service patterns which are inconsistent with the plan of care. Report results will be reviewed with applicable parties (for example, behavioral health provider, health home and plan staff) to ensure that services are delivered per the plan of care and to discuss circumstances surrounding variations in care.

Behavioral Health Prior Authorization

Many behavioral health services do not require prior authorization but do require either notification or concurrent reviews. The following services require prior authorization after January 1, 2017:

- All inpatient services
- All residential services
- Community day treatment
- PROS
- ACT
- Partial hospitalization
- Intensive outpatient treatment
- Psychological and neuropsychological testing
- Intensive psychiatric rehabilitation
- Some rehabilitation services
- Some outpatient services
- Applied behavior analysis (ABA) services (CHPlus)
- Medically managed detoxification (hospital based)*
- Medically supervised inpatient detox (Effective January 1, 2017, plan cannot review.)*

* As of January, 2017, New York state regulations states that plans cannot review for medical necessity for up to 14 days when an in-network provider notifies the plan of the admission within 48 hours of the admission and sends over the LOCADTR and the initial treatment plan. This is not applicable if the provider does not notify and send the needed information within 48 hours of the admission or if the provider is out-of-network.

Services will be authorized based on medical necessity. BlueCross BlueShield case managers will assist providers with linking members to lower levels of care when a member is ready for discharge. If a member is ready for discharge and an alternate level has been identified, the provider is expected to discharge the member. In the event the discharge does not happen, a denial may be issued after the doctor reviews.
The following services do not require prior authorization:

- Emergency room (ER) services, crisis services and a comprehensive psychiatric emergency program including extended observation beds which do not require authorization
  - While there is no medical necessity review completed for ER or CPEP, providers are encouraged to notify BlueCross BlueShield to assist with discharge planning.
- Initial assessments and some outpatient clinic services
- Some outpatient mental health (OMH) and substance use disorder (SUD) services
- Opioid treatment (methadone maintenance) – notification only

The following table provides guidance for OMH Clinical Standards of Care and OASAS Clinical Guidance:

<table>
<thead>
<tr>
<th>Service</th>
<th>Prior authorization required?</th>
<th>Concurrent review authorization</th>

**Emergency Pharmacy Protocols**
Except where otherwise prohibited by law, for members with a behavioral health condition we will:
- Allow immediate access, without prior authorization, to a 72-hour emergency supply of a prescribed drug or medication when the member experiences an emergency condition, as defined within this manual.
- Immediately authorize a seven-day supply of a prescribed drug or medication associated with the management of opioid withdrawal and/or stabilization.

For additional information regarding Pharmacy covered services, please see Chapter 5 of this manual.

**Member Services**
Member Services is available Monday to Friday, 8:30 a.m. to 6 p.m. ET. After 6 p.m., providers can call and get authorizations for inpatient behavioral health services. Members can also call, and our clinicians are available to assess and direct members to the needed supports.

**Behavioral Health Access and Availability**
All providers are expected to meet the federal and state accessibility standards and those defined in the Americans with Disabilities Act (ADA) of 1990. Health care services provided through BlueCross BlueShield must be accessible to all members.
BlueCross BlueShield is dedicated to arranging access to care for our members. BlueCross BlueShield’s ability to provide quality access depends upon the accessibility of network providers. Providers are required to adhere to the following access standards:

<table>
<thead>
<tr>
<th>Appointment type</th>
<th>Appointment standard</th>
</tr>
</thead>
<tbody>
<tr>

Providers must have policies and procedures addressing enrollees who present for unscheduled, nonurgent care with the aim of promoting enrollee access to appropriate care.
Behavioral Health Case Management

BlueCross BlueShield offers case management services. Providers can refer members who may benefit from case management to BlueCross BlueShield. Typically, members who are in case management are those members who have complex needs or are in need of community supports to support their plan of care. If a member is in need of case management and is not enrolled in a Health Home, the plan will link the member to the Health Home or will work with the provider to ensure this happens. Members who are experiencing homelessness, are restricted, have had their first break (FEP), are transitioning from foster care or aging out of the children's system (TAY) are some of the members who are offered case management services. Providers are expected to link these members who have complex needs to supports. If the provider is unable to link a member to these supports directly, the provider is expected to reach out to the health plan to ensure member needs are met.

The plan expects providers to work with Health Homes if a member is enrolled with a Health Home. If there are challenges, the plan will coordinate with the provider and the Health Home as needed. Some examples when this type of coordination should occur are when a member is discharged from an IP stay and when there are gaps in a member’s care.

The plan of care is expected to be person-centered, strength-based and recovery-focused, and is expected to take member’s wishes and choices into consideration. The health plan will work with Health Homes to collaborate and support them to improve member outcomes. More details regarding the behavioral health case management program can be referenced in the Medicaid Business Unit Western New York Case Management policy.

Members in Foster Care

Initial Health Assessments
A series of assessments provide a complete picture of the foster care child’s health needs and is the basis for developing a comprehensive plan of care. Initial health activities include all of the following:

- An immediate screening of the child’s medical condition including assessment for child abuse/neglect
- A comprehensive health evaluation that includes all EPSDT elements as required by the state Medicaid program; specifically for children in foster care, EPSDT screenings must be completed within 30 days of entering care in conjunction with the comprehensive health evaluation. The EPSDT screening must include federally mandated aspects related to the following:
  - A comprehensive health and developmental history including a physical exam, immunizations, laboratory tests (including lead toxicity screening) and health education
  - Hearing
  - Dental (including ongoing preventive and restorative care)
  - Mental health/substance use disorder
  - Vision
  - Follow-up health evaluation and treatments that incorporate information from the five initial assessments
  - Ongoing efforts to obtain the child’s existing medical records and document medical activities

BlueCross BlueShield will ensure there is sufficient network capacity to complete the required foster care initial health assessments within the time frames listed in the following table:
<table>

**Relocations**

If a BlueCross BlueShield member in foster care is placed in another county and BlueCross BlueShield operates in the new county, the child can transition to a new PCP and other health care providers without disrupting the care plan in place. If the member is placed outside BlueCross BlueShield’s service area, BlueCross BlueShield will ensure access to providers with expertise in treating children involved in foster care. This ensures continuity of care and the provision of all medically necessary services.

**Behavioral Health Credentialing**

BlueCross BlueShield credentials OMH- and OASAS-licensed providers. State designation of providers will suffice for the plan’s credentialing process. We will accept OMH and OASAS licenses and certifications in place of any credentialing process for individual employees, subcontractors or agents of such providers. We will not separately credentialing individual staff members in their capacity as employees of these programs. The provider shall collect, and will accept, program integrity-related information as part of the licensing and certification process.

We require all OMH- and OASAS-licensed providers not employ or contract with any employee, subcontractor or agent who has been debarred or suspended by the federal or state government, or otherwise excluded from participation in the Medicare or Medicaid program.
BlueCross BlueShield requires that such providers do not employ or contract with any employee, subcontractor or agent who has been debarred or suspended by the federal or state government, or otherwise excluded from participation in the Medicare or Medicaid program.

For additional information regarding the credentialing process, please see Chapter 11 of this manual.

**Behavioral Health Quality Management**

We maintain a comprehensive Behavioral Health Quality Management program to objectively monitor and systematically evaluate the care and service provided to members. The scope and content of the program reflects the demographic and epidemiological needs of the population served. Members and providers have opportunities to make recommendations for areas of improvement. Through the health plan’s Quality Management program, we support improvement strategies, monitor and evaluate quality, safety and appropriateness of medical and behavioral health care and services offered by the health network, and identify and act on opportunities for improvement.

The plan’s Utilization and Quality Management program description and work plan speaks to the Utilization Management and Quality Management activities that the plan focuses on for the year. The work plan activities, including those by the Behavioral Health Quality Management committee, are monitored and reported to the Medical Advisory and Quality Management committees. Providers, peer specialists, members, family members, youth and family peer support specialists, and child-serving providers are part of the committee. The committee members guide and provide feedback on our activities.

The Behavioral Health Quality Management Committee is accountable to and reports regularly to Quality Oversight Committees and ultimately to the governing board. Our behavioral health quality management director leads the committee and maintains records. Focused discussions, tracking, trending, analysis and follow up will be documented as a separate item in Behavioral Health Quality Management Committee agendas and minutes if they’re related to the following:

- Physical health services for medically fragile children
- Physical health services for children with complex conditions
- Behavioral health services and HCBS for children

The committee reviews and analyzes data and information which impacts the care members receive, and recommends action plans to improve quality performance impacting members and providers. Areas include:

- Service delivery
- Program development
- System planning
- Partnerships
- The provider network
- Program quality and effectiveness

**Quality Services**

BlueCross BlueShield encourages all of our providers to review the clinical practice guidelines the plan develops and posts on our website. BlueCross BlueShield follows behavioral health guidelines recommended by the American Psychiatric Association (APA) and the American Academy of Child and
Adolescent Psychiatry (AACAP). When developing or updating our behavioral health clinical practice guidelines, BlueCross BlueShield uses the following sources:

- Substance and Mental Health Services Administration (SAMHSA)
- National Institute of Mental Health (NIMH)
- American Society of Addiction Medicine
- National Institute on Drug Abuse
- National Alliance of Mental Illness
- United States Department of Health and Human Services

BlueCross BlueShield applies current, relevant and researched recommendations across the states we serve. We disseminate and monitor fidelity to clinical practice guidelines through our ongoing care management process and peer-to-peer engagement with providers. Through this process, care managers:

- Assess whether a member’s care meets clinical practice guidelines and then address concerns with providers.
- Engage providers to access CPGs on the provider website and in newsletters.
- Discuss specific guidelines with providers and Health Homes.
- Host periodic, topic-specific provider webinars to address identified trends.
- Maintain ongoing contact with members, their families, caregivers, treating providers and Health Homes to monitor progress and refine the plan of care.
- Deliver and monitor interventions to meet care plan goals and share member progress toward achieving those goals.

BlueCross BlueShield enlists all providers to participate in our care planning process. During this process, our care manager engages the member’s PCP and any other treating providers by calling them to gather information on the member’s history and health care needs and solicit input into the care plan. Our care managers maintain communication and collaboration with the member’s PCP, other active specialty providers, and other members of the health care team to assess progress in meeting care plan goals.

Providers are encouraged to use existing training resources such as web-based evidence-based practice training available through New York’s Center for Practice Innovations (CPI) at Columbia University. Trainings can be completed by BlueCross BlueShield on these guidelines when requested by the provider. PCPs should screen for behavioral health conditions (screening tools are posted on our website), and members should be linked to in-network behavioral health providers.

The plan will conduct initial training of newly contracted behavioral health providers or provider groups within 30 calendar days of participating status date or contract effective date, whichever is later. This includes all new providers who join the network to support children including voluntary foster care agencies. The material to be covered in the initial training includes subject areas covered in the provider manual and those outlined in policy BlueCross BlueShield provider training and follow-up.

The plan will also conduct ongoing training as deemed necessary in order to ensure compliance with New York state regulations and in trainings that promote member wellness and recovery. Trainings will be offered in person, via WebEx or online (website or other online options). These trainings will be offered at a date and time convenient to the provider.
BlueCross BlueShield will communicate sessions offered to all providers via mailings and/or provider website postings. Training will be offered in either large group settings, virtually via webinars or in person as scheduled.

Other trainings on the following topics will be offered by BlueCross BlueShield:

- Covered services for enrollees including expanded benefits for children
- Recovery principles
- Person-centered planning including plan of care development and review
- HCBS overview, eligibility assessment and services
- Treatment of medically fragile children
- Billing, coding, data interface, documentation requirements, provider profiling programs and utilization management requirements for children’s services
- Cultural competency
- Federal requirements for EPSDT
- Family-driven, youth guided, person-centered treatment planning and service provision
- Therapies: Trauma-focused cognitive behavioral therapy
  - Trauma informed child-parent psychotherapy
  - Multisystemic therapy
  - Functional family therapy
  - Multi-dimensional treatment foster care
  - Dialectical behavior therapy
  - Multidimensional family therapy
  - Seven challenges
  - Adolescent community reinforcement
  - Assertive continuing care

Providers are expected to attend either an offered training or another acceptable training on these topics.

BlueCross BlueShield expects providers to support the state and BlueCross BlueShield on transforming the behavioral health system. Providers are expected to adopt and offer services that are person-centered and recovery-focused. Providers are expected to follow the evidenced-based practice for First Episode Psychosis for members who experience their first break.

Providers are required to develop policies and procedures that cover the following topics and assure confidentiality of mental health and substance use-related information. The policies and procedures must include:

- Initial and annual in-service education of staff, contractors
- Identification of staff allowed access and limits of access
- Procedure to limit access to trained staff (including contractors)
- Protocol for secure storage (including electronic storage)
- Procedures for handling requests for behavioral health and substance use information protocols to protect persons with behavioral health and/or substance use disorder from discrimination
- Members who present for unscheduled nonurgent care, with the aim of promoting enrollee access to appropriate care

We are required to submit a quarterly report of any deficiencies in performance and corrective action taken to OMH and OASAS, with respect to OMH- and OASAS-licensed, certified or designated
providers. BlueCross BlueShield will report any serious or significant health and safety concerns to OMH and OASAS immediately upon discovery.

**Emergency Behavioral Health Calls**

When a member in crisis contacts BlueCross BlueShield using the toll-free number, the member may bypass the prompts and be connected directly to a call center agent. The member in crisis is then connected to the first available behavioral health agent. If the member does not choose this option, the member has the option to select the type of assistance needed – either physical or behavioral health. If the member chooses the physical health option and the Member Services agent determines the member may be in crisis, the call is then transferred to a Behavioral Health agent.

The Behavioral Health agent will determine if the call is a true crisis situation. In the event it is a crisis, the call is transferred to a licensed clinician to handle the call. The member is kept on the phone until a clinician comes on the line. The clinician engages the member and based on the discussion, the clinician may determine the member needs to be screened at the emergency room. If the clinician makes the determination that the member needs to be screened, the clinician will obtain the assistance of a backup clinician or agent to assist with the call to 911 while the clinician keeps the member on the phone until emergency services arrive to assist the member.

The clinician who services the call will document the call and contact the health plan case manager, or the case management manager if the member is in Case Management, for further assistance. This allows the member to receive additional follow-up and services as needed to prevent future crisis situations.

Crisis calls are handled the same way during normal business hours, after-hours and weekends. All crisis calls are answered by a live person.

**Behavioral Health Claims**

**Electronic Claims Submission**

Providers have the option to submit claims electronically with these payer IDs:

- Emdeon: 27514
- Capario: 28804
- Availity: 2637

Providers can also become a direct trading partner with Availity and submit their own claims via batch or use the single claim entry on the Availity portal.

You can use your existing login or go to [www.availty.com](http://www.availty.com) > Register

To initiate the electronic claims submission process or obtain additional information, please contact the EDI Hotline at [1-800-470-9630](tel:1-800-470-9630). If filing electronically, check the confirmation reports for acceptance of the claim you receive from your EDI or practice management vendor.

**Paper Claims Submission**

Providers also have the option of submitting paper claims. BlueCross BlueShield uses optical character reading (OCR) technology as part of our front-end claims processing procedures. To use OCR technology, claims must be submitted on original red claim forms (not black and white or photocopied...
forms), and laser printed or typed (not handwritten) in a large, dark font. You must submit a properly completed UB-04 or CMS-1500 (current form) within 120 days from the date of service.

BlueCross BlueShield cannot accept claims with alterations to billing information. Claims that have been altered will be returned with an explanation of the reason for the return. We will not accept entirely handwritten claims. Paper claims must be submitted within 120 days of the date of service and submitted to the following address:

BlueCross BlueShield
New York Claims
P.O. Box 62509
Virginia Beach, VA 23466-2509

Facility claims must be submitted with the following:
- Form type for Medicare and Medicaid: UB-04 submission
- Valid value code, if applicable
- Valid rate code, if applicable
- Valid revenue code
- Valid CPT code
- Valid diagnosis code that falls within the mental health category
- Bill type, which must be 731 for initial claims or 737 for corrected claims

Individual/group practice claims must be submitted with the following:
- Form type for Medicare and Medicaid: UB-1500 submission
- Valid CPT code

Placement of value and rate codes:
- Value code is 24 (39a.)
- Rate code should be placed before the dotted line and followed by 00 after the dotted line

Rejected and Denied Claims
Providers will receive a notice if a claim is rejected or denied. A rejected claim is a claim that does not enter the adjudication system due to missing or incorrect information. A denied claim is a claim that goes through the adjudication process but is denied for payment.
Routine Claim Inquiries
BlueCross BlueShield’s Provider Experience Program ensures provider claim inquiries are handled efficiently and in a timely manner. Calls are handled by a specially trained call agent in Provider Services. Providers may call 1-866-231-0847 for claims inquiries.

Electronic Remittance Advices (ERA) and Electronic Funds Transfers (EFT)
If you sign up for ERA/EFT, you can:
- Start receiving ERAs and import the information directly into your patient management or patient accounting system.
- Route EFTs to the bank account of your choice.
- Create your own custom reports within your office.
- Access reports 24/7.

Behavioral Health Denials, Grievances and Appeals
All denial, grievance and appeal decisions are conducted by a peer and are subject to specific behavioral health requirements, including:
- A physician board-certified in general psychiatry at the plan reviews all inpatient level of care denials for psychiatric treatment
- A physician certified in addiction treatment reviews all inpatient level of care denials for SUD treatment
- A physician board-certified in child psychiatry reviewing all inpatient denials for psychiatric treatment and denials for behavioral health medications for members under 21 years of age.
- A physician reviewing all denials for services for a medically fragile child taking the needs of the family/caregiver into consideration.

BlueCross BlueShield will not deny coverage of an ongoing course of care unless an appropriate provider of alternate level care is approved. For additional information on the denial, grievance and appeals processes, please see Chapter 9 of this manual.

Behavioral Health Resources

Welcome Call

As part of our member management strategy, we offer a welcome call to new members. During the welcome call, new members who have been identified through their health risk assessment as possibly needing additional services are educated regarding the health plan and available services. Additionally, Member Services representatives offer to assist the member with any current needs, such as scheduling an initial checkup, assisting new members whose health care provider is not a member of the network and requesting to continue an ongoing course of treatment with the member’s current provider. Circumstances would include if the member has:

- A life-threatening disease or condition or a degenerative and disabling disease or condition (the transitional period is up to 60 days).
- Entered the second trimester of pregnancy at the effective date of enrollment (the transitional period includes provision of postpartum care related to the delivery).

Appointment Scheduling

BlueCross BlueShield, through our participating providers, ensures members have access to primary care services for routine, urgent and emergency services and to specialty care services for chronic and complex care. Providers will respond to a BlueCross BlueShield member’s needs and requests in a timely manner. The PCP should make every effort to schedule BlueCross BlueShield members for appointments using the guidelines outlined in the PCP Access and Availability section of this manual.

24/7 NurseLine

The BlueCross BlueShield 24/7 NurseLine is a service designed to support the provider by offering information and education about medical conditions, health care and prevention to members after normal physician practice hours. The 24/7 NurseLine provides triage services and helps direct members to appropriate levels of care. The BlueCross BlueShield 24/7 NurseLine telephone number is 1-866-231-0847 and is listed on the member’s ID card. This ensures members have an additional avenue of access to health care information when needed. Features of the 24/7 NurseLine include:

- Constant availability — 24 hours a day, 7 days a week
- Access to information based upon nationally recognized and accepted guidelines
- Free translation services for 200 different languages and for members with difficulty hearing
- Education for members about appropriate alternatives for handling nonemergent medical conditions
- Provider updates — A nurse faxes the member’s assessment report to the provider’s office within 24 hours of the call

Interpreter Services

Interpreter services are available for our members if needed. Contact your Provider Relations representative for details.
Health Promotion

BlueCross BlueShield strives to improve healthy behaviors, reduce illness and improve the quality of life for our members through comprehensive programs. Educational materials are developed or purchased and disseminated to our members, and health education classes are coordinated with community organizations and network providers who are contracted with BlueCross BlueShield.

BlueCross BlueShield manages projects that offer our members education and information regarding their health. Ongoing projects include:

- Member newsletter
- Creation and distribution of Health Tips, the BlueCross BlueShield health education tool used to inform members of health promotion issues and topics
- Health Tips on Hold (educational telephone messages while the member is on hold)
- Development of health education curricula and procurement of other health education tools (for example, breast self-exam cards)
- Relationship development with community-based organizations to enhance opportunities for members

Health Home

A Health Home is a care management service model whereby all of a patient’s caregivers communicate with one another so that all needs are addressed in a comprehensive manner. This is done primarily through a dedicated care manager who oversees and provides access to all of the services the patient needs to ensure he or she receives everything necessary to stay healthy, out of the emergency room and out of the hospital. Health records are shared (either electronically or on paper) among providers so that services are not duplicated or neglected. The Health Home services are provided through a network of organizations — providers, health plans and community-based organizations. When all the services are considered collectively, they become a virtual Health Home.

New York state (NYS), following CMS approval, initiated a Health Home program for Medicaid members with chronic medical and behavioral conditions. Health Home eligibility criteria requires members to have one or more of the following:

- Two or more chronic conditions (for example, substance use disorder, asthma, diabetes) or
- One single qualifying chronic condition (HIV/AIDS) or
- Serious mental illness (adults) or
- Serious emotional disturbance or complex trauma (children)

Case Management

Case management is designed to proactively respond to a member’s needs when conditions or diagnoses require care and treatment for long periods of time. When a member is identified (usually through precertification, admission review and/or provider or member request), the case manager (a BlueCross BlueShield nurse or social worker) helps to identify medically appropriate alternative methods or settings in which care may be delivered.

A provider, on behalf of the member, may request participation in the program. The case manager will work with the member, provider and/or hospital to identify the necessary:

- Intensity level of case management services needed
- Appropriate alternate settings where care may be delivered
• Health care services required
• Equipment and/or supplies required
• Community-based services available
• Communication required (that is, between member and PCP)

The BlueCross BlueShield case manager will assist the member, Utilization Review team and PCP and/or hospital in developing the discharge plan of care, ensuring the member’s medical needs are met and linking the member with community resources and BlueCross BlueShield programs for outpatient case and/or disease management. BlueCross BlueShield case managers are available from 8 a.m. to 5 p.m. ET. For more information regarding case management services or to refer a member, contact Provider Services at 1-866-231-0847.

A member or a member designee can request case management services by calling Member Services at 1-866-231-0847.

**Disease Management/Population Health**

The BlueCross BlueShield Disease Management (DM) is based on a system of coordinated care management interventions and communications designed to assist physicians and other health care professionals in managing members with chronic conditions. DM services include a holistic, member-centric care management approach that allows case managers to focus on multiple needs of members. Our disease management programs include:

• Asthma
• Bipolar Disorder
• Chronic Obstructive Pulmonary Disease
• Coronary Artery Disease
• Congestive Heart Failure
• Diabetes
• HIV/AIDS
• Hypertension
• Major Depressive Disorder – Adult
• Major Depressive Disorder – Child and Adolescent
• Schizophrenia
• Substance Use Disorder

In addition to these condition-specific programs, our member-centric, holistic approach allows us to assist members with weight management and smoking cessation education.

Program features include:

• Proactive population identification processes
• Chronic disease care gap processes
• Evidence-based national practice guidelines
• Collaborative practice models to include physician and support-service providers in treatment planning for members
• Continuous patient self-management education, including primary prevention, coaching related to healthy behaviors and compliance/monitoring, and case management for high-risk members
• Ongoing process and outcomes measurement, evaluation and management
- Ongoing communication with primary and ancillary providers regarding patient status

The BlueCross BlueShield disease management programs are based on nationally approved evidence-based clinical practice guidelines located at [www.bcbswny.com/stateplans](http://www.bcbswny.com/stateplans). To view these guidelines, simply log in to the secure site by entering your username and password and select the Clinical Practice Guidelines link from the Clinical Policy and Guidelines section on the top navigation menu. You can print a copy of the guidelines right from the site, or you can request a hard copy by calling Provider Services at 1-866-231-0847.

**Who is Eligible?**

All BlueCross BlueShield members with the above diagnoses are eligible for DM services. Members are identified through continuous case finding efforts to include but not be limited to case findings, claims-mining and referrals. Providers can also refer patients who can benefit from additional education and care management support. Members identified for participation in any of the programs are assessed and stratified based on the severity of their diseases. Once enrolled in a program, the member is provided with continuous education on self-management concepts, which include primary prevention, coaching related healthy behaviors, and compliance/monitoring, as well as care management for high-risk members. Program evaluation outcome measurement and process improvement are built into all the programs. Providers are given updates regarding patient status and progress.

**DM Provider Rights and Responsibilities**

The provider has the right to:

- Have information about BlueCross BlueShield services, its staff’s qualifications and any contractual relationships.
- Decline to participate in or work with BlueCross BlueShield programs and services for their patients, if the client’s contract allows.
- Be informed of how BlueCross BlueShield coordinates interventions and treatment plans for individual patients.
- Know how to contact the person responsible for managing and communicating with the provider’s patients.
- Be supported by the organization when interacting with patients to make decisions about their health care.
- Receive courteous and respectful treatment from BlueCross BlueShield staff.
- Communicate complaints to BlueCross BlueShield.

**Hours of Operation**

BlueCross BlueShield case managers are registered nurses and are available from 8:30 a.m. to 5:30 p.m. ET, Monday through Friday. Confidential voicemail is available 24 hours a day. The 24/7 NurseLine is available for our members 24 hours a day, 7 days a week.

**Contact Information**

You can call a DM team member at 1-888-830-4300. Members and providers can find out more about our DM programs by visiting [www.bcbswny.com/stateplans](http://www.bcbswny.com/stateplans). Printed copies of the content are available upon request.
Health Education Advisory Committee

The health education advisory committee provides advice to BlueCross BlueShield regarding health education and outreach-related program development. The committee strives to ensure materials and programs meet cultural competency requirements and are both understandable to the member and address the member’s health education needs.

The health education advisory committee’s responsibilities are to:

- Identify health education needs of the membership based on review of demographic and epidemiologic data.
- Identify cultural values and beliefs that must be considered in developing a culturally competent health education program.
- Assist in the review, development, implementation and evaluation of the member health education tools for the outreach program.
- Review the health education plan and make recommendations on health education strategies.

Women, Infants and Children Program

The mission of the Division of Women, Infants and Children (WIC) Services in the Bureau of Maternal and Child Health is to provide leadership that assures the health and well-being of women, infants and children.

The WIC program impacts the health of mothers and children in the medically needy population. Optimal nutritional status during pregnancy and early childhood provides the best chance for the future of New York residents. For more information, please visit [www.health.state.ny.us/prevention/nutrition/wic](http://www.health.state.ny.us/prevention/nutrition/wic). Network providers are expected to coordinate with the WIC program. Coordination includes referring potentially eligible women, infants and children and reporting appropriate medical information to the WIC program.
PROVIDER RESPONSIBILITIES

Medical Home

The PCP is the foundation of the medical home, responsible for providing, managing and coordinating all aspects of the member’s medical care and providing all care that is within the scope of his or her practice. The PCP is responsible for coordinating member care with specialists and conferring and collaborating with the specialists, using a collaborative concept known as a medical home.

BlueCross BlueShield promotes the medical home concept to all of our members. The PCP is the member and family’s initial contact point when accessing health care. The PCP, member and member’s family — together with the health care practitioners within the medical home and the extended network of consultants and specialists with whom the medical home works — have an ongoing and collaborative contractual relationship. The providers in the medical home are knowledgeable about the member and family’s special, health-related social and educational needs and are connected to necessary resources in the community that will assist the family in meeting those needs. When a member is referred for a consultation or specialty/hospital services or health and health-related services by the PCP through the medical home, the medical home provider maintains the primary relationship with the member and family. He or she keeps abreast of the current status of the member and family through a planned feedback mechanism with the PCP who receives them into the medical home for continuing primary medical care and preventive health services.

Responsibilities of the PCP

The PCP is a network physician who has the responsibility for the complete care of his or her members, whether providing it himself or herself or by referral to the appropriate provider of care within the network. Federally qualified health centers (FQHCs) and rural health clinics (RHCs) may be included as PCPs.

The PCP shall:

- Manage the medical and health care needs of members, including monitoring and following up on care provided by other providers (including FFS).
- Identify specialist providers within the network for each instance when such services are determined to be necessary for the member.
- Coordinate referrals to specialists and FFS providers (both in- and out-of-network); and maintain a medical record of all services rendered by the PCP and other providers.
- Provide 24-hour-a-day, 7-day-a-week coverage; regular hours of operation should be clearly defined and communicated to members.
- Provide services ethically and legally, provide all services in a culturally competent manner and meet the unique needs of members with special health care needs.
- Participate in any system established by BlueCross BlueShield to facilitate the sharing of records, subject to applicable confidentiality and HIPAA requirements.
- Make provisions to communicate in the language or fashion primarily used by his or her membership.
- Participate and cooperate with BlueCross BlueShield in any reasonable internal and external quality assurance, utilization review, continuing education and other similar programs established by BlueCross BlueShield.
• Participate in and cooperate with the BlueCross BlueShield complaint and grievance procedures (BlueCross BlueShield will notify the PCP of any member grievance).
• Not balance-bill members; however, the PCP is entitled to collect applicable copayments, coinsurance or permitted deductibles for certain services.
• Continue care in progress during and after termination of his or her contract for up to 90 days until a continuity-of-care plan is in place to transition the member to another provider or through 60 days postpartum care for pregnant members in accordance with applicable state laws and regulations.
• Comply with all applicable federal and state laws regarding the confidentiality of patient records
• Develop and have an exposure control plan in compliance with Occupational Safety and Health Administration standards regarding blood-borne pathogens.
• Establish an appropriate mechanism to fulfill obligations under the Americans with Disabilities Act.
• Support, cooperate and comply with the BlueCross BlueShield Quality Improvement Program initiatives and any related policies and procedures and provide quality care in a cost-effective and reasonable manner.
• Inform BlueCross BlueShield if a member objects to provisions of any counseling, treatments or referral services for religious reasons.
• Treat all members with respect and dignity.
• Provide members with appropriate privacy and treat member disclosures and records confidentially, giving the members the opportunity to approve or refuse their release.
• Provide members with complete information concerning their diagnosis, evaluation, treatment and prognosis and give members the opportunity to participate in decisions involving their health care. Except when contraindicated for medical reasons, the information will be made available to an appropriate person acting on the member’s behalf.
• Advise members about their health status, medical care or treatment options, regardless of whether benefits for such care are provided under the program, and advise members on treatments that may be self-administered.
• When clinically indicated, contact members as quickly as possible for follow-up regarding significant problems and/or abnormal laboratory or radiological findings.
• Have a policy and procedure to ensure proper identification, handling, transport, treatment and disposal of hazardous and contaminated materials and wastes to minimize sources and transmission of infection.
• Agree to maintain communication with the appropriate agencies such as local police, social services agencies and poison control centers to provide high-quality patient care.
• Agree that any notation in a patient’s clinical record indicating diagnostic or therapeutic intervention as part of the clinical research shall be clearly contrasted with entries regarding the provision of non-research-related care.

**Note:** BlueCross BlueShield does not cover the use of any experimental procedures or experimental medications except under certain preauthorized circumstances.

**Provider Access and Availability**

All providers are expected to meet the federal and state accessibility standards and those defined in the Americans with Disabilities Act (ADA) of 1990. Health care services provided through BlueCross BlueShield must be accessible to all members.
BlueCross BlueShield is dedicated to arranging access to care for our members. The ability of BlueCross BlueShield to provide quality access depends upon the accessibility of network providers. Providers are required to adhere to the following access standards:

<table>
<thead>
<tr>
<th>Appointment Type</th>
<th>Appointment Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>Emergent or emergency visits</td>
<td>Immediately upon presentation</td>
</tr>
<tr>
<td>Urgent visits</td>
<td>Within 24 hours of request or sooner as clinically indicated</td>
</tr>

<table>
<thead>
<tr>
<th>24-Hour Access to PCP and OB-GYN (After Hours)</th>
<th>Appointment Standard</th>
</tr>
</thead>
<tbody>
<tr>
<td>Call/contact with service/office representative</td>
<td>Enrollees must have access to an after-hours live voice for PCP and OB/GYN emergency consultation and care (if the provider uses an answering machine, the message must direct the enrollee to a live voice).</td>
</tr>
</tbody>
</table>

Note: For appointment and availability standards for behavioral health services, refer to the Behavioral Health Services chapter.

Providers must have policies and procedures addressing enrollees who present for unscheduled, nonurgent care with the aim of promoting enrollee access to appropriate care.

Providers may not use discriminatory practices such as preference to other insured or private pay patients and/or separate waiting rooms or appointment days.
BlueCross BlueShield will routinely monitor providers’ adherence to the access to care standards.

To ensure continuous 24-hour coverage, PCPs must maintain one of the following arrangements for their members to contact the PCP after normal business hours:

- Have the office telephones answered after-hours by an answering service, which can contact the PCP or another designated network medical practitioner. Have the office telephone answered after normal business hours by a recording in the language of each of the major population groups served by the PCP, directing the member to call another number to reach the PCP, or another provider designated by the PCP. Someone must be available to answer the designated provider’s telephone; another recording is not acceptable.
- Have the office telephone transferred after office hours to another location where someone will answer the telephone and be able to contact the PCP or a designated BlueCross BlueShield network medical practitioner.

The following telephone answering procedures are not acceptable:

- Office telephone is only answered during office hours.
- Office telephone is answered after hours by a recording that tells members to leave a message.
- Office telephone is answered after hours by a recording which directs members to go to an emergency room for any services needed.

**Appointment Access and Availability Studies**

NYSDOH requires BlueCross BlueShield to conduct access and availability studies quarterly to ensure appointment and access standards are met. A random sample is periodically selected from our provider network. BlueCross BlueShield staff place calls to the selected providers’ offices both during and after hours to ensure our members (your patients) may access care within state-mandated guidelines.

BlueCross BlueShield reviews and records the results of the study at the end of the call. A passing score denotes the office has met or exceeded the standard for a particular appointment type or after-hours coverage. In the event a provider fails to meet the established guidelines at the time of the study (meaning the appointment was not scheduled within the prescribed time), BlueCross BlueShield provider relations staff educates providers regarding the failure. Staff attempt a second call to noncompliant providers to check for appointment timeliness following provider education. If provider continues to fail, BlueCross BlueShield issues a written notice. The notice requests a written explanation of the provider’s policy on 24-hour coverage and appointment availability, as well as a plan of correction addressing the specific measure(s) failed. BlueCross BlueShield reviews the correction plan and resurveys the provider for compliance within two months. If a provider is found to be noncompliant on the second survey, the provider’s panel is immediately closed to new members. A plan of correction is requested, and a third survey is conducted. Failure of the third compliance survey results in the immediate termination of the provider.

**PCP Panel Capacity**

Physicians operating as PCPs within the BlueCross BlueShield provider network may not have more than 1,500 members assigned to their panels. BlueCross BlueShield monitors our provider network monthly to ensure no practice location exceeds the aforementioned limit. When a physician reaches 1,250 members, a letter is sent to the physician advising him or her of the 1,500-patient threshold.
A physician who employs a registered physician assistant (PA) or a certified nurse practitioner (NP) is able to increase his or her panel threshold to 2,400 patients. The physician should alert BlueCross BlueShield of the presence of a PA or an NP at the time of credentialing via the standard application. If the PA or NP is employed after the initial credentialing date, the physician must notify BlueCross BlueShield by letter.

NPs acting as PCPs are able to service a panel of 1,000 members. The same procedure applies for panel capacity, except that the practitioner is notified when his or her panel reaches 750 members. **An NP is not able to increase panel capacity by employing a PA.**

**Minimum Office Hours**

General requirements are that PCPs must practice a minimum of 16 hours a week at each primary care site. The minimum office hour’s requirement may be waived under certain circumstances. A request for a waiver must be submitted by the physician to the Plan. The Plan will then submit the request to the Medical Director of the Office of Health Insurance Programs for review and approval; and the physician must be available at least eight hours/week; the physician must be practicing in the Health Provider Shortage Area (HPSA) or other similarly determined shortage area; the physician must be able to fulfill the other responsibilities of the PCP (as described in this Section); and the waiver request must demonstrate there are systems in place to guarantee continuity of care and to meet all access and availability standards (24-hour/7 days per week coverage, appointment availability, etc.).

**Member Missed Appointments**

BlueCross BlueShield members may sometimes cancel or not appear for necessary appointments and fail to reschedule the appointment. This can be detrimental to their health. BlueCross BlueShield requires providers to attempt to contact members who have not shown up for or canceled an appointment without rescheduling the appointment. The contact must be by telephone and should be designed to educate the member about the importance of keeping appointments and to encourage the member to reschedule the appointment.

BlueCross BlueShield members who frequently cancel or fail to show up for an appointment without rescheduling the appointment may need additional education in appropriate methods of accessing care. In these cases, please call your Provider Relations representative. BlueCross BlueShield staff will contact the member and provide more extensive education and/or case management as appropriate. Our goal is for members to recognize the importance of maintaining preventive health visits and to adhere to a plan of care recommended by their PCP.

**Noncompliant BlueCross BlueShield Members**

BlueCross BlueShield recognizes providers may need help in managing nonadherent members. If you have an issue with a member regarding behavior, treatment cooperation and/or completion of treatment and/or making or appearing for appointments, please contact Provider Services at **1-866-231-0847**.

BlueCross BlueShield will contact the member by telephone, or a BlueCross BlueShield representative will visit the member to provide the education and counseling to address the situation. We will report the outcome of any counseling efforts to you.
PCP Transfers

To maintain continuity of care, BlueCross BlueShield encourages members to remain with their PCP. However, members may request to change their PCP for any reason by contacting Member Services at 1-866-231-0847. The member’s name will be provided to the PCP on the membership roster.

Members can call to request a PCP change any day of the month. Retroactive PCP changes are allowed within 30 days of the PCP visit if the member was not previously seen by their PCP on record. PCP change requests will be processed generally on the same day or by the next business day. Members will receive a new ID card within 10 days.

**Note:** Members who have been placed on a PCP restriction can change PCP without cause every six months.

Continuity of Care (Provider Termination)

Continuity of care (provider termination) applies in its entirety to all programs, including CHPlus and Medicaid Managed Care products.

If a provider leaves the network for reasons other than a determination of fraud, imminent harm to patient care or a final disciplinary action by a state licensing board that impairs the health professional’s ability to practice, BlueCross BlueShield will permit a member to continue an ongoing course of treatment with that provider under the following circumstances:

- If the member has a life-threatening, disabling or degenerative condition, a rare disease, or is in an ongoing course of treatment, he or she may see the provider for 90 days from when the provider’s contract expires.
- If the member is in the second or third trimester of pregnancy, she may see the provider for all prenatal, delivery and postpartum care directly related to the pregnancy.

In all cases, the provider must agree to BlueCross BlueShield policies, procedures and reimbursement rates.

BlueCross BlueShield will immediately remove any provider from the network who is unable to provide health care services due to final disciplinary action. Medicaid Managed Care providers who are sanctioned by the DOH’s Medicaid program will be excluded from participation in the BlueCross BlueShield Medicaid panel.

Covering Physicians

During a provider’s absence or unavailability, the provider needs to arrange for coverage for his or her members. The provider will either make arrangements with:

- One or more network providers to provide care for his or her members
- Another similarly licensed and qualified provider who has appropriate medical staff privileges at the same network hospital or medical group, as applicable, to provide care to the members in question

In addition, the covering provider will agree to the terms and conditions of the Network Provider Agreement, including, without limitation, any applicable limitations on compensation, billing and
participation. Providers will be solely responsible for a non-network provider’s adherence to such provisions. Providers will be solely responsible for any fees or monies due and owed to any non-network provider, providing substitute coverage to a member on the provider’s behalf.

**Specialists as PCPs**

Under certain circumstances, when a member requires the regular care of a specialist, a specialist may be approved by BlueCross BlueShield to serve as a member’s PCP. The criteria for a specialist to serve as a member’s PCP include the member having a chronic, life-threatening illness or condition of such complexity whereby:

- The need for multiple hospitalizations exists.
- The majority of care needs to be given by a specialist.
- The administrative requirements arranging for care exceed the capacity of the nonspecialist PCP; this includes members with complex neurological disabilities, chronic pulmonary disorders, HIV/AIDS, complex hematology/oncology conditions, cystic fibrosis, etc.

The specialist must meet the requirements for PCP participation (including contractual obligations and credentialing), provide access to care 24 hours a day, 7 days a week and coordinate the member’s treatment plan, including preventive care along with the member’s PCP and BlueCross BlueShield. When such a need is identified, the member or specialist must contact the BlueCross BlueShield Case Management department and complete a *Specialist as PCP Request* form. A BlueCross BlueShield case manager will review the request and submit it to the BlueCross BlueShield medical director. BlueCross BlueShield will notify the member and the provider of our determination in writing within 30 days of receiving the request. Should BlueCross BlueShield deny the request, BlueCross BlueShield will provide written notification to the member and provider outlining the reason(s) for the denial of the request within one day of the decision. If the specialist or other health care provider needed to provide ongoing care for a specific condition is not available in the BlueCross BlueShield network, the referring physician will request authorization from BlueCross BlueShield for services outside the network.

The referral must be approved by BlueCross BlueShield and will be made pursuant to an approved treatment plan approved by BlueCross BlueShield, the member’s PCP and nonparticipating physician. The member may not use a nonparticipating specialist unless there is no specialist in the network that can provide the requested treatment. Services are provided to the member at the same cost as if they received the services from an in-network provider. Specialists serving as PCPs will continue to be paid FFS while serving as the member’s PCP. The designation cannot be retroactive.

Members may self-refer for unlimited behavioral health and substance use assessments (except for Assertive Community Treatment [ACT], inpatient psychiatric hospitalization, partial hospitalization and HCBS services). Visits for behavioral health services are coordinated by calling **1-866-231-0847**. A provider or hospital must be contracted with BlueCross BlueShield to provide these services; precertification is not required for behavioral health services when provided by a network provider.

**Specialty Referrals**

To reduce the administrative burden on the provider’s office staff, BlueCross BlueShield has established procedures designed to permit a member with a condition requiring ongoing care from a specialist physician or other health care provider to request an extended authorization.
The provider can request an extended referral authorization by contacting the member’s PCP. The provider must supply the necessary clinical information that will be reviewed by the PCP to complete the authorization review.

On a case-by-case basis, an extended authorization will be approved. In the event of termination of a contract with the treating provider, the continuity of care provisions in the provider’s contract with BlueCross BlueShield will apply. The provider may renew the authorization by submitting a new request to the PCP. Additionally, BlueCross BlueShield requires the specialist physician or other health care provider to provide regular updates to the member’s PCP (unless acting also as the designated PCP for the member). Should the need arise for a secondary referral, the specialist physician or other health care provider must contact BlueCross BlueShield for a coverage determination.

If the specialist or other health care provider needed to provide ongoing care for a specific condition is not available in the BlueCross BlueShield network, the referring physician shall request authorization from BlueCross BlueShield for services outside the network. Access will be approved to a qualified non-network health care provider within a reasonable distance and travel time at no additional cost if medical necessity is met.

If a provider’s application for an extended authorization is denied, the member (or the provider on behalf of the member) may appeal the decision through the BlueCross BlueShield medical appeal process. See the Adverse Determinations/Reconsideration/Appeals section of this manual for more information.

**Specialty Care Center Referrals**

BlueCross BlueShield will authorize members with either a life-threatening or a degenerative and disabling condition/disease, which requires prolonged specialized medical care, to receive a referral to an accredited or designated specialty care center with expertise in treating the life-threatening or degenerative and disabling disease/condition.

The referral must be approved by BlueCross BlueShield and will be made pursuant to an approved treatment plan approved by BlueCross BlueShield, the member’s PCP and specialist. When such a need is identified, the member or specialist must contact the BlueCross BlueShield Utilization Management department. BlueCross BlueShield will review the request and submit it to the BlueCross BlueShield medical director. BlueCross BlueShield will notify the member and the provider of our determination in writing within 14 days of receiving the request. Based on the member’s condition, the request may expedited to three business days.

**Second Opinions**

A member, parent and/or legally appointed representative or the member’s PCP may request a second opinion in any situation where there is a question concerning a diagnosis or the options for surgery or other treatment of a health condition. The second opinion will be provided at no cost to the member.

The second opinion must be obtained from a network provider (see the provider referral directory), or a non-network provider, if there is no network provider with the expertise required for the condition. Authorization is required only if the provider is out-of-network. The PCP will notify the member of the date and time of the appointment and forward copies of all relevant records to the consulting provider. The PCP will notify the member of the outcome of the second opinion.
BlueCross BlueShield may also request a second opinion at our own discretion. This may occur under the following circumstances:

- Whenever there is a concern about care expressed by the member or the provider
- Whenever potential risks or outcomes of recommended or requested care are discovered by the plan during its regular course of business
- Before initiating a denial of coverage of service
- When denied coverage is appealed
- When an experimental or investigational service is requested

When BlueCross BlueShield requests a second opinion, we will make the necessary arrangements for the appointment, payment and reporting. BlueCross BlueShield will inform the member and the PCP of the results of the second opinion and the consulting provider’s conclusion and recommendation(s) regarding further action.

**Specialty Care Providers**

To participate in the Medicaid managed care model, the provider must have applied for enrollment and be a licensed provider by the state before signing a contract with BlueCross BlueShield.

BlueCross BlueShield contracts with a network of provider specialty types to meet the medical specialty needs of members and provide all medically necessary covered services. The specialty care provider is a network physician who is responsible for providing specialized care for members, usually upon appropriate referral from a PCP within the network. (See the Role and Responsibility of the Specialty Care Provider section of this manual for more information.)

In addition to sharing many of the same responsibilities to members as PCPs (see Responsibilities of the PCP section), the specialty care provider offers services that include:

- Allergy and immunology services
- Burn services
- Community behavioral health (for example, mental health and substance abuse) services
- Cardiology services
- Services provided by behavioral health clinical nurse specialists, psychologists and clinical social workers
- Critical care medical services
- Dermatology services
- Endocrinology services
- Gastroenterology services
- General surgery
- Hematology/oncology services
- Neonatal services
- Nephrology services
- Neurology services
- Neurosurgery services
- Ophthalmology services
- Orthopedic surgery services
- Otolaryngology services
- Perinatal services
- Pediatric services
- Psychiatry (adult) assessment services
- Psychiatry (child and adolescent) assessment services
- Trauma services
- Urology services

**Role and Responsibilities of the Specialty Care Provider**

Specialty care providers will only treat members who have been referred to them by network PCPs (with the exception of mental health and substance abuse providers and services for which the member may
self-refer) and will render covered services only to the extent and duration indicated on the referral. Obligations of specialty care providers include but are not limited to:

- Complying with all applicable statutory and regulatory requirements of the Medicaid program
- Accepting all members referred to them
- Submitting required claims information to BlueCross BlueShield, including source of referral
- Arranging for coverage with network providers while off-duty or on vacation
- Verifying member eligibility and precertification of services (if required) at each visit
- Providing consultation summaries or appropriate periodic progress notes to the member’s PCP on a timely basis following a referral or routinely scheduled consultative visit
- Notifying the member’s PCP when scheduling a hospital admission or scheduling any procedure requiring the PCP’s approval
- Coordinating care, as appropriate, with other providers involved in providing care for members, especially in cases where there are medical and behavioral health comorbidities or co-occurring mental health and substance abuse disorders

The specialist shall:

- Manage the medical and health care needs of members, including monitoring and following up on care provided by other providers, including those engaged on an FFS basis; provide coordination necessary for referrals to other specialists and FFS providers (both in and out of network); and maintain a medical record of all services rendered by the specialist and other providers.
- Provide 24-hour-a-day, 7-day-a-week coverage and maintain regular hours of operation that are clearly defined and communicated to members.
- Provide services ethically and legally, in a culturally competent manner and meet the unique needs of members with special health care requirements.
- Participate in the systems established by BlueCross BlueShield that facilitate the sharing of records, subject to applicable confidentiality and HIPAA requirements.
- Participate and cooperate with BlueCross BlueShield in any reasonable internal or external quality assurance, utilization review, continuing education or other similar programs established by BlueCross BlueShield.
- Make reasonable efforts to communicate, coordinate and collaborate with other specialty care providers, including behavioral health providers involved in delivering care and services to consumers.
- Participate in and cooperate with the BlueCross BlueShield complaint and grievance processes and procedures (BlueCross BlueShield will notify the specialist of any member grievance brought against the specialist).
- Not balance bill members.
- Continue care in progress during and after termination of his or her contract for up to 90 days until a continuity of care plan is in place to transition the member to another provider or through 60 days postpartum care for pregnant members in accordance with applicable state laws and regulations.
- Comply with all applicable federal and state laws regarding the confidentiality of patient records.
- Develop and have an exposure control plan regarding blood-borne pathogens in compliance with Occupational Safety and Health Administration (OSHA) standards.
- Make best efforts to fulfill the obligations under the ADA applicable to his or her practice location.
• Support, cooperate and comply with the BlueCross BlueShield Quality Improvement Program initiatives and any related policies and procedures designed to provide quality care in a cost-effective and reasonable manner.

• Inform BlueCross BlueShield if a member objects for religious reasons to the provision of any counseling, treatment or referral services.

• Treat all members with respect and dignity.

• Provide members with appropriate privacy and treat member disclosures and records confidentially, giving members the opportunity to approve or refuse their release as allowed under applicable laws and regulations.

• Provide members complete information concerning their diagnosis, evaluation, treatment and prognosis and give members the opportunity to participate in decisions involving their health care; except when contraindicated for medical reasons, the information will be made available to an appropriate person acting on the member’s behalf.

• Advise members about their health status, medical care or treatment options, regardless of whether benefits for such care are provided under the program, and advise members on treatments that may be self-administered.

• When clinically indicated, contact members as quickly as possible for follow-up regarding significant problems and/or abnormal laboratory or radiological findings.

• Have a policy and procedure to ensure proper identification, handling, transport, treatment and disposal of hazardous and contaminated materials and wastes to minimize sources and transmission of infection.

• Agree to maintain communication with the appropriate agencies such as local police, social services agencies and poison control centers to provide quality patient care.

• Agree that any notation in a patient’s clinical record indicating diagnostic or therapeutic intervention that is part of a clinical research study is clearly distinguished from entries pertaining to nonresearch-related care.

Note: BlueCross BlueShield does not cover the use of any experimental procedures or experimental medications except under certain preauthorized circumstances.

Specialty Care Providers’ Access and Availability

BlueCross BlueShield will maintain a specialty network to ensure access and availability to specialists for all members. A provider is considered a specialist if he or she has a provider agreement with BlueCross BlueShield to provide specialty services to members.

Specialists must adhere to the following access guidelines:

<table>
<thead>
<tr>
<th>Service</th>
<th>Access Requirement</th>
</tr>
</thead>
<tbody>
<tr>
<td>Urgent visit</td>
<td>Within 24 hours of request or sooner as clinically indicated</td>
</tr>
<tr>
<td>Nonurgent, nonemergency visits</td>
<td>Within 48 to 72 hours of request or sooner as clinically indicated</td>
</tr>
<tr>
<td>Routine nonurgent, preventive appointments</td>
<td>Within four to six weeks of request or sooner as clinically indicated</td>
</tr>
<tr>
<td>Prenatal care</td>
<td>Within two weeks of request</td>
</tr>
</tbody>
</table>

Note: For appointment and availability standards for behavioral health services, refer to the Behavioral Health Services chapter.
Obstetrical and/or Gynecological Providers

Obstetrical and/or gynecological (OB-GYN) providers may be any obstetrician, gynecologist, certified nurse midwife or family practitioner with training in obstetrics and gynecology who has been credentialed by BlueCross BlueShield to provide OB-GYN services. While an OB-GYN provider is not a PCP, members may choose to have an OB-GYN provider as their primary source of care. Members can access an OB-GYN provider for their reproductive health needs without a referral from their PCP.

All female members are eligible to receive two well-woman examinations each calendar year from the member’s provider of choice within the BlueCross BlueShield network, treatment for acute gynecological conditions, follow-up services related to these primary and preventive services, and pregnancy-related care without a referral from their PCP. The OB-GYN must notify the member’s PCP of the pregnancy and must notify BlueCross BlueShield at 1-866-231-0847. This will register the member in our New Baby, New Life℠ program.

Pregnancy testing and termination of pregnancy are considered care directly related to pregnancy and are therefore accessed directly. BlueCross BlueShield also requires that participating providers comply with the informed consent procedures for hysterectomy and sterilization specified in 42 CFR, Part 441, sub-part F and 18 NYCRR Section 505.14. OB-GYN providers must also comply with a prenatal care evidence-based standard of practice, such as the American Congress of Obstetricians and Gynecologists (ACOG) practice guidelines.

Risk Assessment

Every pregnant woman shall receive ongoing assessment of both maternal and fetal risk throughout the prenatal period. Such risk assessment shall include but not be limited to an analysis of individual characteristics affecting pregnancy, such as genetic, nutritional, psychosocial, historical and emerging obstetrical/fetal and medical-surgical risk factors. At the time of registration, a standardized written risk assessment shall be conducted using established criteria for determining high-risk pregnancies, based upon generally accepted standards of practice. This risk assessment shall be:

- Reviewed at each visit
- Formally repeated early in the third trimester
- Linked to the plan of care and clearly documented in the medical record
- A development of the care plan and coordination of care

A care plan that addresses the proper implementation and coordination of all services required by the pregnant woman shall be developed, routinely updated and implemented jointly by the pregnant woman and her family, mutually agreeable to the woman and all appropriate members of the health care team.

Care shall be coordinated to:

- Ensure relevant information is exchanged between the prenatal care provider and other providers or sites of care, including the anticipated birthing site.
- Ensure the pregnant woman and her family, with her consent, have continued access to information resources and are encouraged to participate in decisions involving the scope and nature of care and services being provided.
- Encourage and assist the pregnant woman in obtaining necessary medical, nutritional, psychosocial, drug and substance abuse services appropriate to her identified needs and provide follow-up to ensure ongoing access to services.
- Provide the pregnant woman with an opportunity to receive prenatal or postpartum home visitation when the woman may derive medical or psychosocial benefit from such visits, which shall identify familial and environmental factors that may produce increased risk to the woman or fetus. The relevant findings shall be incorporated into the care plan, and the pregnant woman will be provided or referred for needed services, including:
  - Inpatient care, specialty physician and clinical services which are necessary to ensure a healthy delivery and recovery
  - Genetic services
  - Drug treatment and screening services
  - Dental services
  - Mental health and related social services
  - Emergency room services
  - Home care
  - Pharmaceuticals
  - Transportation
- Provide special tests and services as may be recommended or required by the Commissioner of Health, who shall require such tests and/or services when necessary to protect maternal and/or fetal health. Women shall be provided appropriate medical care, counseling and education based on test results.
- Encourage continuity of care and client follow-up, including rescheduling of missed visits throughout the prenatal and postpartum period.

**Nutrition Services**

Prenatal providers will establish and implement a program of nutrition screening and counseling which includes:
- Individual nutrition risk assessment, including screening for specific nutritional risk conditions at the initial prenatal care visit and continuing reassessment as needed
- Professional nutrition counseling, monitoring and follow-up of all pregnant women at nutritional risk by a nutritionist or registered dietitian
- Documentation of nutrition assessment, risk status and nutrition care plan in the patient medical record
- Arrangements for services with funded nutrition programs available in the community, including provision for enrollment of all eligible women and infants in the Supplemental Food Program for Women, Infants and Children (WIC), at the initial visit

Provision of basic nutrition education and counseling for each pregnant woman should include the following topics:
- Appropriate dietary intake and recommended dietary allowances during normal pregnancy
- Appropriate weight gain
- Infant feeding choices, including individualized counseling regarding the advantages and disadvantages of breastfeeding

**Health Education**

Health and childbirth education services are given to each pregnant woman based on an assessment of her individual needs. Appropriate educational materials, including video and written information, are used. Culture, language, and health literacy are taken into account, to help ensure the understanding of
the information provided. Such services will be provided by professional staff, documented in the medical record and include but not be limited to the following:

- Orientation to procedures at prenatal facilities and at the expected site of birth
- Rights and responsibilities of the pregnant woman
- Signs of complications of pregnancy
- Physical activity and exercise during pregnancy
- Avoidance of harmful practices and substances, including alcohol, drugs, nonprescribed medications and nicotine
- Sexuality during pregnancy
- Occupational concerns
- Risks of HIV infection and risk reduction behaviors
- Signs of labor
- Labor and delivery process
- Relaxation techniques in labor
- Obstetrical anesthesia and analgesia
- Preparation for parenting, including infant development and care and options for feeding
- The newborn screening program with the distribution of newborn screening educational literature

**Family Planning**

A psychosocial assessment shall be conducted and shall include:
- Screening for social, economic, psychological and emotional problems
- Referral to the local Department of Social Services, community mental health resources, support groups or social/psychological specialists (as appropriate) for the needs of the woman or fetus

**Prenatal Diagnostic and Treatment Services**

Prenatal diagnostic and treatment services shall be provided by a qualified physician practicing in accordance with Article 131 of the NYS Education Law, a licensed midwife practicing in accordance with Article 140 of the NYS Education Law, a qualified nurse practitioner practicing in accordance with Article 139 of the NYS Education Law or a registered physician’s assistant practicing in accordance with Part 94 of this Title, Article 37 of the NYS Public Health Law and Article 131 of the NYS Education Law. Such services shall meet generally accepted standards of professional patient care and services.

Prenatal diagnostic and treatment services provided include the following:
- An initial comprehensive assessment, including history, review of systems and physical examination
- Standard laboratory tests and procedures
- Needed special laboratory tests as indicated by comprehensive assessment and initial or preliminary test findings
- Evaluation of risk
- Discussion of options for treatment, care and technological support expected to be available at the time of labor and delivery, together with the advantages and disadvantages of each option
- Obtaining the pregnant woman’s informed choice of mode of treatment, care and technological support expected
- Postpartum counseling, evaluation and referral to professional care and services, as required, to include preconception counseling as appropriate
• Establishing arrangements for availability of after-hours and emergency consultation and care for pregnant women

The prenatal provider shall develop and implement written agreements with planned sites of delivery, which address, at a minimum:

• Prebooking of women for delivery at 34 to 36 weeks gestation for low-risk pregnancies and 26 weeks gestation for high-risk pregnancies
• Arrangements for referral of women and neonates to appropriate alternate care sites for medically indicated care
• Special tests and procedures which may be required
• A plan detailing how hospitalization for medical or obstetrical problems will occur
• Arrangements with facilities for postpartum services
• A system for sharing medical records with the delivery site and for receiving information from referral sources and delivery sites

Prenatal providers will develop and implement written policies and procedures, designating the requirements for consultation with a qualified physician or other health care specialist when necessitated by specific medical conditions.

Prenatal providers will designate in writing those situations that require the transfer of the primary responsibility for patient care from a primary care professional who is a family practice physician, physician’s assistant, licensed midwife or qualified nurse practitioner to a qualified obstetrician.

HIV Services
The prenatal provider will:

• Routinely provide the pregnant woman with HIV counseling and education.
• Routinely offer the pregnant woman confidential HIV testing.
• Routinely recommend the pregnant woman to HIV counseling and testing as early as possible in the pregnancy, including a repeat third trimester test (preferably at 34-36 weeks).
• Provide the HIV-positive woman and her newborn infant the following services or make the necessary referrals for these services:
  o Management of HIV status
  o Psychosocial support
  o Case management to assist in coordination of necessary medical, social and drug treatment services

Records and Reports
The prenatal provider shall create and maintain records and reports in accordance with this subdivision that are complete, legible, retrievable and available for review by representatives of the Commissioner of Health upon request. Such records and reports shall include:

• A comprehensive prenatal care record for each pregnant woman, which documents the provision of care and services required by this section and is maintained in a manner consistent with medical record confidentiality requirements
• Special reports and data summaries necessary for the Commissioner of Health to evaluate the provider’s delivery of prenatal services
• Program reports, including financial, administrative, utilization and patient care data maintained in such a manner as to allow the identification of expenditure, revenue, utilization and patient care data associated with health care provided to prenatal clients
Records of all internal quality assurance activities
All written policies and procedures required by this section

Internal Quality Assurance
The prenatal provider shall develop and implement written policies and procedures establishing an internal quality assurance program to identify, evaluate, resolve and monitor actual and potential problems in patient care. Components of this program shall include but not be limited to:

- A documented and filed prenatal chart audit performed periodically on a statistically significant number of current prenatal client records
- An annual written summary evaluation of all components of such audits
- A system for determining patient satisfaction and for resolving patient complaints
- A system for developing and recommending corrective actions to resolve identified problems
- A follow-up process to assure that recommendations and plans of correction are implemented and are effective
- Safeguards to prevent the inappropriate breach of patient confidentiality requirements

Postpartum Services
The prenatal provider shall coordinate with the neonatal care provider to arrange for the provision of pediatric care services in accordance with generally accepted standards of practice and patient services. A postpartum visit with a qualified health professional shall be scheduled and conducted between 7 and 84 days after delivery. For the interim between delivery and the postpartum visit, the prenatal provider shall furnish each woman with a means of contacting the provider in case postpartum questions or concerns arise.

The postpartum visit shall include but not be limited to:

- Identifying any medical, psychosocial, nutritional, alcohol treatment and/or drug treatment needs of the mother or infant that are not being met
- Referring the mother or other infant caregiver to resources available for meeting such needs and providing assistance in meeting such needs where appropriate
- Assessing family planning needs and providing advice, services or referral, where indicated
- Providing preconception counseling and encouraging a preconception visit prior to subsequent pregnancies for women who might benefit from such a visit
- Referring infants to preventive and special care services appropriate to their needs
- Advising the mother of the availability of Medicaid eligibility for infants

For specific requirements regarding OB-GYN appointment access scheduling, office waiting time, telephone access after business hours and on-call coverage standards, please see the Specialty Care Providers Access and Availability section of this manual.

Cultural Competency

Cultural competency is the integration of congruent behaviors, attitudes, structures, policies and procedures that come together in a system, agency or among professionals to enable effective work in cross-cultural situations. Cultural competency assists providers to:

- Acknowledge the importance of culture and language
- Embrace cultural strengths with people and communities
- Assess cross-cultural relations
- Understand cultural and linguistic differences
Strive to expand cultural knowledge

The quality of the patient-provider interaction has a profound impact on the ability of a patient to communicate symptoms to his or her provider and to adhere to recommended treatment. Some of the reasons that justify a provider’s need for cultural competency include but are not limited to:

- The perception that illness, disease and their causes vary by culture
- The belief systems related to health, healing and wellness are very diverse
- Culture often influences help-seeking behaviors and attitudes toward health care providers
- Individual preferences affect traditional and nontraditional approaches to health care
- Health care providers from culturally and linguistically diverse groups are underrepresented in the current service delivery system

Cultural barriers between the provider and member can impact the patient-provider relationship in many ways, including but not limited to:

- The member’s level of comfort with the practitioner and the member’s fear of what might be found upon examination
- The differences in understanding amongst the diverse consumers in the U.S. health care system
- A fear of rejection of personal health beliefs
- The member’s expectation of the health care provider and of the treatment

**Cultural Awareness, Knowledge and Skills Needed**

To be culturally competent, BlueCross BlueShield expects providers serving members within this geographic location to demonstrate the following:

**Cultural Awareness**

- The ability to recognize the cultural factors (norms, values, communication patterns and world views) that shape personal and professional behavior
- The ability to modify one’s own behavioral style to respond to the needs of others, while at the same time maintaining a professional level of respect and objectivity
- Acceptance of ethnic differences among people and an understanding of how these differences affect the treatment process

**Knowledge**

- Culture plays a crucial role in the formation of health or illness beliefs.
- Different cultures have different attitudes about seeking help.
- Feelings about disclosure are culturally unique.
- There are differences in the acceptability and effectiveness of treatment modalities in various cultural and ethnic groups.
- Verbal and nonverbal language, speech patterns and communication styles vary by culture and ethnic groups.
- Resources, such as formally trained interpreters, should be offered to and utilized by members of various cultural and ethnic backgrounds.

**Skills**

- The ability to understand the basic similarities and differences between and among the cultures of the persons served
- The ability to recognize the values and strengths of different cultures
• The ability to interpret diverse cultural and nonverbal behavior
• The ability to develop perceptions and understanding of other’s needs, values and preferred means of having those needs met
• The ability to identify and integrate the critical cultural elements of a situation to make culturally consistent inferences and demonstrate consistency in actions
• The ability to recognize the importance of time and the use of group process to develop and enhance cross-cultural knowledge and understanding
• The ability to withhold judgment, action or speech in the absence of information about a person’s culture
• The ability to listen with respect
• The ability to formulate culturally competent treatment plans
• The ability to use culturally appropriate community resources
• The ability to know when and how to use interpreters and to understand the limitations of using interpreters
• The ability to treat each person uniquely
• The ability to recognize racial and ethnic differences and know when to respond to culturally-based cues
• The ability to seek out information
• The ability to use agency resources
• The capacity to respond flexibly to a range of possible solutions
• A willingness to work with clients of various ethnic groups

Member Records

Using nationally recognized standards of care, BlueCross BlueShield works with providers to develop clinical policies and guidelines of care for our membership. The medical advisory committee (MAC) oversees and directs BlueCross BlueShield in formalizing, adopting and monitoring guidelines. BlueCross BlueShield requires medical records to be maintained in a manner that is current, detailed, organized and permits effective and confidential patient care and quality review. BlueCross BlueShield, NYSDOH, CMS and Learning Development and Support Services (LDSS) may have the right to access members’ medical records for utilization review and quality management at any time.

Providers are required to maintain medical records that conform to good professional medical practice and appropriate health management. A permanent medical record will be maintained at the primary care site for every member and be available to the PCP and other providers. Medical records must be kept in accordance with BlueCross BlueShield and state standards as follows.

Medical Record Standards
The records reflect all aspects of patient care, including ancillary services. Documentation of each visit must include:
1. Date of service
2. Grievance or purpose of visit
3. Diagnosis or medical impression
4. Objective finding
5. Assessment of patient’s findings
6. Plan of treatment, diagnostic tests, therapies and other prescribed regimens
7. Medications prescribed
8. Health education provided
9. Signature and title, or initials, of the provider rendering the service; if more than one person documents in the medical record, there must be a record on file as to what signature is represented by which initials.

These standards will, at a minimum, meet the following medical record requirements:

1. **Patient identification information**: Each page or electronic file in the record must contain the patient’s name or patient ID number.
2. **Personal/biographical data**: The record must include age, sex, address, employer, home and work telephone numbers, and marital status.
3. **Date and corroboration**: All entries must be dated with the author identified.
4. **Legibility**: Each record must be legible to someone other than the writer. A second reviewer should evaluate any record judged illegible by one physician reviewer.
5. **Allergies**: Medication allergies and adverse reactions must be prominently noted on the record. Absence of allergies must be noted in an easily recognizable location (that is, no known allergies [NKA]).
6. **Past medical history** (for patients seen three or more times): Past medical history must be easily identified, including serious accidents, operations and illnesses. For children, the history must include prenatal care of the mother and birth.
7. **Immunizations**: For pediatric records age 13 and younger, a completed immunization record or a notation of prior immunization must be recorded, including vaccines and their dates of administration when possible.
8. **Diagnostic information**
9. **Medication information** (includes medication information/instruction to patient)
10. **Identification of current problems**: Significant illnesses, medical and behavioral health conditions and health maintenance concerns must be identified in the medical record.
11. **Instructions**: The record must include evidence that the patient was provided with basic teaching and instruction regarding physical and/or behavioral health condition.
12. **Smoking/alcohol/substance abuse**: A notation concerning cigarettes and alcohol use and substance abuse must be stated if present for patients age 12 and older. Abbreviations and symbols may be appropriate.
13. **Consultations, referrals and specialist reports**: Notes from any referrals and consultations must be in the record. Consultation, lab and X-ray reports filed in the chart must have the ordering physician’s initials or other documentation signifying review. Consultation and any abnormal lab and imaging study results must have an explicit notation in the record of follow-up plans.
14. **Emergencies**: All emergency care provided (directly by the contracted provider or through an emergency room) and the hospital discharge summaries for all hospital admissions while the patient is part of the PCP’s panel must be noted.
15. **Hospital discharge summaries**: Discharge summaries for all hospital admissions that occur while the patient is enrolled and for prior admissions, as appropriate. Prior admissions that may have occurred before the patient was enrolled may be pertinent to the patient’s current medical condition.
16. **Advance directive**: For adult patients, record whether or not the individual has executed an advance directive. An advance directive is a written instruction, such as a living will or durable power of attorney, which directs health care decision-making for individuals who are incapacitated.
17. **Security**: Providers must maintain a written policy as required to ensure that medical records are safeguarded against loss, destruction or unauthorized use. Additionally, a provider must develop
policies and procedures for his or her staff to ensure confidentiality of HIV-related information. The policy and procedure for HIV must include:

- Initial and annual in-service education of staff and/or contractors
- Identification of staff allowed access and limits of access
- Procedures to limit access to trained staff (including contractors)
- Protocol for secure storage (including electronic storage)
- Procedures for handling requests for HIV-related information
- Protocols to protect persons with or suspected of having HIV infection from discrimination.

18. **Release of information**: Written procedures are required for the release of information and obtaining consent for treatment.

19. **Documentation**: Documentation is required, setting forth the results of medical, preventive and behavioral health screening, all treatment provided, and results of such treatment.

20. **Multidisciplinary teams**: Documentation is required of the team members involved in the multidisciplinary team of a patient needing specialty care.

21. **Integration of clinical care**: Documentation of the integration of clinical care in both the physical and behavioral health records is required. Such documentation must include:

- Screening for behavioral health conditions (including those which may be affecting physical health care and vice versa) and referral to behavioral health providers when problems are indicated
- Screening and referral by behavioral health providers to PCPs when appropriate
- Receipt of behavioral health referrals from physical medicine providers and the disposition/outcome of those referrals
- A summary of the status/progress from the behavioral health provider to the PCP, at least quarterly (or more often if clinically indicated)
- A written release of information that will permit specific information sharing between providers
- Documentation that behavioral health professionals are included in primary and specialty care service teams described in this contract when a patient with disabilities or chronic or complex physical or developmental conditions has a co-occurring behavioral disorder

22. **Provider reporting obligations**: Documentation of reasonable efforts to assure timely and accurate compliance with NYC public health reporting requirements in the following areas:

- Infants and toddlers suspected of having a developmental delay or disability
- Suspected instances of child abuse
- Immunization Registry and Blood Lead Registry
- Communicable disease and conditions mandated in the New York City Health Code, pursuant to 24 RCNY § 11.03-11.07 and Article 21 of the NYS Public Health Law

**Patient Visit Data**

Documentation of individual encounters must provide adequate evidence of (at a minimum):

1. A history and physical exam that includes appropriate subjective and objective information obtained for the presenting complaints
2. For patients receiving behavioral health treatment, documentation that includes at-risk factors (danger to self/others, ability to care for self, affect, perceptual disorders, cognitive functioning and significant social health)
3. An admission or initial assessment that must include current support systems or lack of support systems
4. For patients receiving behavioral health treatment, a documented assessment that is done with each visit relating to client status/symptoms to the treatment process and that may indicate initial
symptoms of the behavioral health condition as decreased, increased or unchanged during the treatment period
5. A plan of treatment that includes activities/therapies and goals to be carried out
6. Diagnostic tests
7. Documented therapies and other prescribed regimens for patients who receive behavioral health treatment, including evidence of family involvement and evidence the family was included in therapy sessions, each as applicable
8. For follow-up care encounter forms or notes with a notation indicating follow-up care, a call or a visit that must note in weeks or months the specific time to return with unresolved problems from any previous visits being addressed in subsequent visits
9. Referrals and results, including all other aspects of patient care, such as ancillary services

BlueCross BlueShield will systematically review medical records to ensure compliance with the standards. We will institute actions for improvement when standards are not met.

BlueCross BlueShield maintains an appropriate recordkeeping system for services to members. This system will collect all pertinent information relating to the medical management of each member and make that information readily available to appropriate health professionals and appropriate state agencies. All records will be retained in accordance with the record retention requirements. A member’s medical record must be retained by his or her provider for six years after the date of service rendered to the member, and in the case of a minor, for three years after majority or six years after the date of the service, whichever is later. Prenatal care medical records will be centralized and for all other services.

**Clinical Practice Guidelines**

Using nationally recognized standards of care, BlueCross BlueShield works with providers to develop clinical policies and guidelines for the care of our membership. The medical advisory committee oversees and directs BlueCross BlueShield in formulating, adopting and monitoring guidelines.

BlueCross BlueShield selects at least four evidence-based clinical practice guidelines that are relevant to the member population. We will measure performance against at least two important aspects of each of the four clinical practice guidelines annually. The guidelines must be reviewed and revised at least every two years, or whenever the guidelines change.

To access the Clinical Practice Guidelines online, navigate to our website at [www.bcbswny.com/stateplans](http://www.bcbswny.com/stateplans). You can contact Provider Services at 1-866-231-0847 to receive a printed copy.

BlueCross BlueShield Clinical and Network staff is available to review these practices and guidelines. These reviews can occur in a group setting, via WebEx or in person.

Periodically, the plan’s quality team will request charts to ensure all providers (PCPs, behavioral health providers and all specialists) are following the guidelines and are incorporating evidence-based practices. Results of these audits and next steps will then be reviewed and shared with the provider.

**Advance Directives**

BlueCross BlueShield respects the right of the member to control decisions relating to his or her own medical care, including the decision to have provided, withheld or withdrawn the medical or surgical
means or procedures calculated to prolong his or her life. This right is subject to certain interests of society, such as the protection of human life and the preservation of ethical standards in the medical profession.

BlueCross BlueShield adheres to the Patient Self-Determination Act and maintains written policies and procedures regarding advance directives. Advance directives are documents signed by a competent person giving direction to health care providers about treatment choices in certain circumstances. There are two types of advance directives: 1) a durable power of attorney for health care, and 2) a living will. A durable power of attorney for health care (durable power) allows the member to name a patient advocate to act on behalf of the member. A living will allows the member to state his or her wishes in writing but does not name a patient advocate.

Member Services and Outreach associates encourage members to request an advance directive form and education from their PCP at their first appointment.

Members older than 18 years of age and emancipated minors are able to make advance directives. His or her response is to be documented in the medical record. BlueCross BlueShield will not discriminate or retaliate based on whether a member has or has not executed an advance directive.

While each member has the right without condition to formulate an advance directive within certain limited circumstances, a facility or an individual physician may conscientiously object to an advance directive.

Member Services and Outreach associates will assist members regarding questions about advance directives; however, no associate of BlueCross BlueShield may serve as witness to an advance directive or as a member’s designated agent or representative.

BlueCross BlueShield notes the presence of advance directives in the medical records when conducting medical chart audits.

**First Line of Defense Against Fraud**

**General Obligation to Prevent, Detect and Deter Fraud, Waste and Abuse**

As a recipient of funds from state and federally sponsored health care programs, we each have a duty to help prevent, detect and deter fraud, waste and abuse. Our commitment to detecting, mitigating and preventing fraud, waste and abuse is outlined in our Corporate Compliance program. As part of the requirements of the federal Deficit Reduction Act, each BlueCross BlueShield provider is required to adopt BlueCross BlueShield policies on detecting, preventing and mitigating fraud, waste and abuse in all the federally and state funded health care programs in which BlueCross BlueShield participates.

As a BlueCross BlueShield provider and a participant in government-sponsored health care, you and your staff are obligated to report suspected fraud, waste and abuse. We encourage our members and providers to report suspected instances by:

- Calling BlueCross BlueShield Customer Service at 1-866-231-0847.

No individual who reports violations or suspected fraud, waste or abuse will be retaliated against, and BlueCross BlueShield will make every effort to maintain anonymity and confidentiality.
In order to meet the requirements under the Deficit Reduction Act, you must adopt the BlueCross BlueShield fraud, waste and abuse policies and distribute them to any staff members or contractors who work with BlueCross BlueShield. If you have questions or would like more details concerning our fraud, waste and abuse detection, prevention and mitigation program, please contact the BlueCross BlueShield plan compliance officer.

Electronic copies of our policy and the BlueCross BlueShield Code of Business Conduct and Ethics are available at www.bcbswny.com/stateplans.

Importance of Detecting, Deterring and Preventing Fraud, Waste and Abuse
Health care fraud costs taxpayers increasingly more money every year. There are state and federal laws designed to crack down on these crimes and impose strict penalties. Fraud, waste and abuse in the health care industry may be perpetuated by every party involved in the health care process. There are several stages to inhibiting fraudulent acts, including detection, prevention, investigation and reporting. In this section, we educate providers on how to help prevent member and provider fraud by identifying the different types, so you can be the first line of defense.

Types of Fraud, Waste and Abuse
Examples of provider fraud, waste and abuse include:
- Billing for services not rendered
- Billing for services not medically necessary
- Double-billing
- Unbundling
- Upcoding

Providers can help prevent fraud, waste and abuse by ensuring the services rendered are medically necessary, accurately documented in the medical records and billed according to American Medical Association (AMA) guidelines.

Examples of member fraud, waste and abuse include:
- Benefit sharing
- Collusion
- Drug trafficking
- Forgery
- Illicit drug seeking
- Impersonation fraud
- Misinformation and/or misrepresentation
- Subrogation and/or third-party liability fraud
- Transportation fraud

Reporting Critical Incidents
BlueCross BlueShield monitors critical incidents and reports any occurrences and investigations of incidents to the state. This includes reports of wrongful death, restraints and medication errors resulting in injury. To report critical incidents, use any of the above listed methods for reporting suspected fraud, waste and abuse.
What can you do to help prevent fraud, waste and abuse?

- Carefully review each member’s BlueCross BlueShield member ID card to ensure the cardholder is the person named on the card; this is the first line of defense against fraud.
  - Note: BlueCross BlueShield may not accept responsibility for the costs incurred by providers rendering services to a patient who is not a member, even if that patient presents a BlueCross BlueShield member ID card.
- Educate members about the types of fraud and the penalties levied.
- Spend time with patients and review their records for prescription administration.
- Encourage members to protect their cards as they would a credit card or cash, carry their BlueCross BlueShield member ID card at all times, and report any lost or stolen cards to BlueCross BlueShield as soon as possible.

BlueCross BlueShield believes awareness and action are vital to keeping the state and federal programs safe and effective. Understanding the various opportunities for fraud, waste or abuse and working with members to protect their BlueCross BlueShield identification cards can help prevent fraud, waste and abuse.

False Claims Act
We are committed to complying with all applicable federal and state laws, including the federal False Claims Act (FCA). The FCA is a federal law allowing the government to recover money stolen through fraud by government contractors. Under the FCA, anyone who knowingly submits or causes another person or entity to submit false claims for payment of government funds is liable for three times the damages or loss to the government plus civil penalties of $5,500 to $11,000 per false claim.

The FCA also contains *qui tam* or whistleblower provisions. A whistleblower is an individual who reports in good faith an act of fraud or waste to the government, or files a lawsuit on behalf of the government. Whistleblowers are protected from retaliation from their employer under *qui tam* provisions in the FCA and may be entitled to a percentage of the funds recovered by the government.

Employee Education about the False Claims Act
As a requirement of the Deficit Reduction Act of 2005, contracted providers who receive Medicaid payments must comply with the following:

- Establish written policies for all employees, managers, officers, contractors, subcontractors and agents of the network provider. The policies must provide detailed information about the False Claims Act, administrative remedies for false claims and statements, any state laws about civil or criminal penalties for false claims, and whistleblower protections under such laws as described in Section 1902(a)(68)(A).
- Include as part of such written policies detailed provisions regarding policies and procedures for detecting and preventing fraud, waste and abuse.
- Include in any employee handbook a specific discussion of the laws described in Section 1902(a)(68)(A), the rights of employees to be protected as whistleblowers, and policies and procedures for detecting and preventing fraud, abuse and waste.
Health Insurance Portability and Accountability Act (HIPAA)

HIPAA, also known as the Kennedy-Kassebaum bill, was signed into law in August 1996. The legislation improves the portability and continuity of health benefits, ensures greater accountability in the area of health care fraud and simplifies the administration of health insurance.

BlueCross BlueShield strives to ensure both BlueCross BlueShield and contracted participating providers conduct business in a manner that safeguards patient/member information in accordance with the privacy regulations enacted pursuant to HIPAA. Contracted providers shall have the following procedures implemented to demonstrate compliance with HIPAA privacy regulations.

BlueCross BlueShield recognizes our responsibility under HIPAA privacy regulations to only request the minimum necessary member information from providers to accomplish the intended purpose. Conversely, network providers should only request the minimum necessary member information required to accomplish the intended purpose when contacting BlueCross BlueShield. However, please note that the privacy regulations allow the transfer or sharing of member information, which may be requested by BlueCross BlueShield to conduct business and make decisions about care, such as a member’s medical record, to make an authorization determination or resolve a payment appeal. Such requests are considered part of the HIPAA definition of treatment, payment or health care operations.

Fax machines used to transmit and receive medically sensitive information should be maintained in an environment with access that is restricted to individuals who need member information to perform their jobs. When faxing information to BlueCross BlueShield, verify the receiving fax number is correct, notify the appropriate staff at BlueCross BlueShield and verify the fax was appropriately received.

Email (unless encrypted) should not be used to transfer files containing member information to BlueCross BlueShield (for example, Excel spreadsheets with claim information). Such information should be mailed or faxed.

Please use professional judgment when mailing medically sensitive information such as medical records. The information should be in a sealed envelope marked confidential and addressed to a specific individual, post office box or department at BlueCross BlueShield.

The BlueCross BlueShield voice mail system is secure and password protected. When leaving messages for BlueCross BlueShield associates, providers should only leave the minimum amount of member information required to accomplish the intended purpose.

When contacting BlueCross BlueShield, please be prepared to verify the provider’s name, address, TIN, NPI or BlueCross BlueShield provider number.
9 MEDICAL MANAGEMENT

Medical Review Criteria

Amerigroup medical policies, which are publicly accessible at the BlueCross BlueShield website, are the primary benefit plan policies for determining whether services are considered to be a) investigational/experimental, b) medically necessary, and c) cosmetic or reconstructive.

MCG Care Guidelines will be used for non-behavioral health emergency and concurrent inpatient reviews. Amerigroup clinical utilization management (UM) guidelines will be used when no specific Amerigroup medical policies exist for elective inpatient and precertification reviews. A list of the specific Amerigroup clinical UM guidelines used will be posted and maintained on the BlueCross BlueShield website and can be obtained in hard copy by written request. The policies described above will support precertification requirements, clinical-appropriateness claims edits and retrospective review.

Federal law, state law, and contract language, including definitions and specific contract provisions/exclusions, take precedence over medical policy and must be considered first when determining eligibility for coverage. As such, in all cases, state Medicaid contracts or CMS requirements will supersede both MCG Care Guidelines, Amerigroup clinical UM guidelines and Amerigroup medical policy criteria. Medical technology is constantly evolving, and we reserve the right to review and periodically update medical policy and utilization management criteria.

BlueCross BlueShield follows established procedures for applying medical necessity criteria based on individual member needs and an assessment of the availability of services within the local delivery system. These procedures apply to precertification, concurrent reviews and retrospective reviews. Utilization Management (UM) clinicians collect and review relevant clinical information to determine if the level of service requested meets medical necessity criteria. Criteria can be accessed via criteria-specific software and/or Web applications.

BlueCross BlueShield, as a corporation and as individuals involved in Utilization Management (UM) decisions, is governed by the following statements:

- UM decision-making is based only on appropriateness of care and service and existence of coverage.
- BlueCross BlueShield does not specifically reward practitioners or other individuals for issuing denial of coverage or care. Decisions about hiring, promoting or terminating practitioners or other staff are not based on the likelihood or perceived likelihood that they support, or tend to support, denials of benefits.
- Financial incentives for UM decision-makers do not encourage decisions that result in underutilization, or create barriers to care and service.

BlueCross BlueShield does not employ utilization controls or other coverage limits to automatically place limits on the length of stay for members requiring hospitalization or surgery. Length of stay for a member’s request for hospitalization or surgery is based on the needs of the member rather than on arbitrary limits. Members who are hospitalized or receiving surgical services are managed by an assigned utilization manager. The clinical review for these services will specify authorization for coverage limits as determined by clinical guidelines and individual needs. Subsequently, the utilization
manager working with the hospital, PCP/attending physician and other parties will monitor and continually review the case to determine discharge readiness and facilitate discharge planning. For members found to require extended benefits, as identified by the concurrent review of individual needs, severity of illness and services being rendered, the utilization manager has the authority to extend the hospital stay or other services as needed.

In the application of criteria, it is generally understood that these criteria are designed for uncomplicated patients and for a complete delivery system. This may not be appropriate for patients with complications or for a delivery system with insufficient alternatives for care. BlueCross BlueShield will consider the following when applying criteria to a given individual:

- Age
- Comorbidities
- Complications
- Progress of treatment
- Psychosocial situation
- Home environment when applicable

The characteristics of the local delivery system available for specific patients will also be considered, such as:

- Availability of skilled nursing facilities, subacute care facilities or home care in the organization’s service area to support the patient after hospital discharge
- Coverage of benefits for alternative levels of care when needed
- Provider ability to provide all recommended services within the estimated length of stay

Utilization managers are required to discuss all cases with the medical director in which medical necessity is not met using established criteria, or in which there is a failure of the local delivery system to provide care for final review determination. Utilization managers can only make determinations for approvals of care, and only a licensed medical director makes any adverse determinations. Trained nonclinical associates under the direct supervision of licensed clinical team members have the authority to approve services under procedures designated by the health plan. BlueCross BlueShield health plans monitor the accuracy and consistency of review decisions through health plan audits and corporate annual Inter-Rater Reliability audits. Requests that do not meet criteria are referred to the medical director or clinical peer designee. All UM criteria used in rendering decisions are available upon request. Providers may request copies of criteria by calling Provider Services at 1-866-231-0847.

Medical necessity determinations are based on approved clinical criteria and are made by appropriate clinical staff with unrestricted licensure. BlueCross BlueShield expects nurses and physicians who make decisions on coverage of care and services to:

- Make decisions based on the right care and services the benefit covers.
- Understand BlueCross BlueShield does not reward providers or others if they deny coverage of care or services.
- Make sure the money paid to decision-makers does not end in the misuse of needed health care.

**HCBS Review and Criteria**

BlueCross BlueShield uses state and federal guidance and criteria for HCBS services. On completion of the InterRai, the Health Home is expected to give members a choice of at least three providers for the HCBS. Once linked to the service, the HCBS provider contacts the plan for authorization. Once HCBS
Authorization Request Process

BlueCross BlueShield may require members to obtain a referral from their PCP prior to accessing specialty care and out-of-network services. BlueCross BlueShield may also require providers to complete a notification or precertification process prior to providing certain medically necessary services to members. Medically necessary services are those health care services necessary to prevent, diagnose, manage or treat conditions that cause acute suffering, endanger life, result in illness or infirmity, interfere with such person’s capacity for normal activity or threaten some significant handicap. Providers may verify which services require notification or precertification by calling 1-866-231-0847 or visiting our website and using the Precertification Lookup tool online (PLUTO).

All precertification requests must be made within a minimum of 72 hours before service is scheduled to be rendered, or risk precertification denial. BlueCross BlueShield is available to respond to questions or provide specific information regarding requests for authorization Monday through Friday, between 8 a.m. and 5 p.m. ET. Voice messages left after business hours will be returned on the next business day.

Utilization Review Delegation

BlueCross BlueShield may delegate utilization review (UR) activities for select services to an approved, accredited UR agent.

In those instances, providers should refer to the provider web portal or review below to confirm the appropriate agent and contact information to initiate the authorization request process. All delegated agents follow the BlueCross BlueShield UR processing guidelines, including time frames and notification for authorization, in adherence with the state Medicaid contract.

Providers may call:

Liberty Dental at 1-888-352-7924 for the following:  
- Utilization Review  
- Provider Services  
- Member Services

AIM Specialty Health at 1-800-714-0040 for the following:  
- Utilization Review  
- Provider Services  
- Member Services

Notification

Notification is defined as the requirement for the provider to notify BlueCross BlueShield by telephone or fax of the intent to render covered medical services to a member. Member eligibility and provider
status (participating and nonparticipating) are verified. Notifications can be called in to 1-866-231-0847 or faxed to 1-800-964-3627.

**Review/Determination Time Frames**
Time frames summarized in the paragraph section below are Article 49 NYS regulatory requirements. As a quality-focused organization, BlueCross BlueShield has elected to attain NCQA accreditation. NCQA time frames differ from NYS regulatory requirements; therefore, in order to meet both NCQA and NYS regulatory requirements, BlueCross BlueShield will follow the most stringent time frames. See Tables 1 and 2 at the end of this section for a comparison between time frames.

**Precertification**
Precertification is the prospective process whereby licensed clinical associates apply designated criteria sets against the intensity of services to be rendered, a member’s severity of illness, medical history and previous treatment to determine the medical necessity and appropriateness of a given coverage request.

Prospective means the coverage request occurred prior to the service being provided. Medically necessary care is defined as services and supplies that are necessary to prevent, diagnose, correct or cure conditions in an individual that cause acute suffering, endanger life, result in illness or infirmity, interfere with such a person’s capacity for normal activity, or threaten some significant handicap.

Precertification requests can be submitted by phone at 1-866-231-0847, via fax to 1-800-964-3627 or via our website at [www.bcbswny.com/stateplans](http://www.bcbswny.com/stateplans). In the case of a standard or nonexpedited request, a decision and notification will be made within three business days of receipt of the necessary information but no later than 14 calendar days after the receipt of the request.

Precertification requests must be submitted, at a minimum, within 72 hours prior to the scheduled service/procedure. Failure to comply with procedure will result in an administrative denial.

**Expedited Review**
Expedited review of a precertification request must be conducted when BlueCross BlueShield or the provider indicates the delay would seriously jeopardize the member’s life, health or ability to attain, maintain or regain maximum functions. Members have the right to request an expedited review, but BlueCross BlueShield may deny and notify the member that the review will be processed under standard review time frames. In the case of an expedited review, a decision and notification will be made as fast as the member’s condition requires and no later than three calendar days after receipt of the request.

**Continued Services Review**
A review for continued services is the review of a request for continued, extended or more of an authorized service than what is currently authorized by BlueCross BlueShield. Continued services review requests can be submitted:
- By phone at 1-866-231-0847
- Via fax to 1-844-765-5162
- Via our website at [www.bcbswny.com/stateplans](http://www.bcbswny.com/stateplans)

In the case of a standard, nonurgent continued service review, a decision and notification will be made within one business day of receipt of the necessary information but no more than 14 calendar days after receipt of the request. Expedited review of a continued service review request must be conducted when BlueCross BlueShield or the provider indicate the delay would seriously jeopardize the member’s life,
health or ability to attain, maintain or regain maximum functions. Members have the right to request an expedited review, but BlueCross BlueShield may deny and notify the member the review will be processed under standard review time frames. In the case of an expedited continued service review, a decision and notification will be made within one business day of receipt of the necessary information, but no more than three calendar days after receipt of the request. Notice of determination shall include the number of continued or extended services approved, the new total of approved services, the date of onset of services and the next review date.

In cases of requests for home health care services following an inpatient hospital admission, notice of determination must be sent within one business day after receipt of the necessary information, except when the day subsequent to the request falls on a weekend or holiday, 72 hours after receipt of necessary information, but no more than three business days after receipt of the request. In all other cases, within one business day of receipt of necessary information, but no more than 14 days after receipt of the service authorization.

**Retrospective Review**
A retrospective review is the review of a request for services already rendered. Retrospective reviews will be processed by the claims department for services that were not precertified. A decision will be made within 24 hours of receipt of the necessary information, but no more than 30 calendar days after receipt of the request. Notification will be mailed to the member on the date of a payment denial, in whole or in part.

**Retrospective Review of Preauthorized Services**
BlueCross BlueShield may reverse a preauthorized treatment, service or procedure when and if all of the following occur:

- Relevant medical information presented to BlueCross BlueShield or the Utilization Review (UR) agent upon retrospective review is materially different from the information that was presented during the precertification review.
- Information existed at the time of the precertification review but was withheld or not made available.
- BlueCross BlueShield or the UR agent was not aware of the existence of the information at the time of the precertification review.
- BlueCross BlueShield had been aware of the information, the treatment, service or procedure being requested would not have been authorized.

Extension of expedited and standard review time frames for precertification and concurrent review requests may occur if the member, member’s designee or provider requests an extension, or if BlueCross BlueShield can demonstrate a need for more information and the extension is in the member’s best interest. An extension will extend the review turnaround time by 14 days. An extension notification will be mailed to the member. Failure to meet the service authorization request time frames as noted above is deemed to be an adverse determination subject to appeal. BlueCross BlueShield must send a notice of denial on the date the review time frames expire.

### Nonurgent, Preservice

| Once | Within 15 calendar days of receiving information |

### Post service/Retrospective

| Once | Within 15 calendar days of receiving information |

In the event we’re unable to make a nonurgent preservice or post-service decision due to matters beyond our control, or due to the lack of necessary information, we may extend the decision time frame once if we notify the member or member’s authorized representative within:

- 15 calendar days of a preservice request; **or**
- 30 calendar days of a post-service request, including date by which we expect to make a decision

In accordance with the New York state Medicaid contract, time frames for preservice and concurrent review determination for both standard and expedited request may be extended for up to 14 days if:

- The enrollee, the enrollee’s designee or the provider request an extension orally or in writing; **or**
- We demonstrate or substantiate there is a need for additional information, and the extension is in the member’s best interest. We will ensure there is supportive documentation to demonstrate justification for the extension and that it is made available upon NYSDOH request.

### Adverse Determinations/Reconsideration/Peer-to-Peer/Appeals

#### Adverse Determination

An adverse determination is the denial of a service authorization request or the approval of a service authorization request in an amount, duration or scope that is less than what was requested. Adverse determination decisions are made by a clinical peer reviewer whose credential is at least equal to that of the recommending clinician. Written notice of an initial adverse determination will be sent to the member and provider and will include:

- A description of the action taken or to be taken
- The reason for the decision, including any clinical rationale
- The member’s right to file an internal appeal, including a statement that BlueCross BlueShield will not retaliate or take discriminatory action against a member if an appeal is filed and a statement that the member has the right to designate someone to file an appeal on their behalf
- The process and time frame for filing an appeal, including an explanation that an expedited review can be requested
- A description of what additional information, if any, must be obtained by BlueCross BlueShield in order to make a decision on an appeal
- The time frames, including possible extensions of when the appeal decision must be made
- The notice entitled “Managed Care Action Taken” for denial of benefits or for termination or reduction in benefits, as applicable, containing the member’s fair hearing and aid continuing rights (for Medicaid and FHP members only)
- Notice of the availability, upon request by the member or member’s designee to obtain the review criteria or benefit provision used to make the decision
- Specification of what, if any, additional information must be provided to or obtained by BlueCross BlueShield to make a decision on an appeal
• Appeals will be reviewed by a person not involved in the initial determination
• The member’s right to contact the NYSDOH at 1-800-206-8125 to file a complaint at any time
• A fair hearing notice, including aid to continue rights if applicable
• Statement that the notice is available in other languages and formats for special needs and how to access these formats

Reconsideration
Reconsideration of an adverse determination can be made when a decision is made without provider input. The reconsideration will occur within one business day of receipt of the request and shall be conducted by the member’s health care provider and the clinical peer reviewer who made the initial decision. Reconsiderations cannot be done for retrospective services.

Peer-to-Peer Review
If a request for authorization results in an adverse determination, the servicing/treating provider may discuss the decision with the physician reviewer. The reviewer will have clinical experience relevant to the adverse determination (for example, a denial of rehabilitation services will be made by a clinician with experience providing such service, or at least in consultation with such a clinician, and a denial of specialized care for a child would not be made by a geriatric specialist). To arrange such a review, providers can call 1-877-269-5515 within seven business days of the date of the notice of action.

Appeals
A member or a member’s designee has 90 calendar days from the date of the notice of action to file an internal appeal. In cases of retrospective services, a provider may file an appeal on their own behalf. An appeal may be filed verbally by calling Member Services at 1-866-231-0847, or in writing to:

Medical Appeals
P.O. Box 62429
Virginia Beach, VA 23466-2429

All standard verbal appeal requests must be followed up with a written request.

In compliance with Federal Regulation 42 CFR 438, BlueCross BlueShield requires member consent for any member appeal filed by their provider. This applies to Medicaid Managed Care and Child Health Insurance Programs. For an appeal to be reviewed, it is imperative that providers supply documentation reflecting the member’s written consent when filing the appeal.

Please note that this requirement does not impact the process for providers to file plan appeals or complaints on their own behalf.

As published in the March 2018 New York State Medicaid Update, federal regulations now require the enrollee to sign an agreement that they wish the provider to represent them during the appeal and complaint process prior to the provider filing an appeal or complaint with the health plan on the enrollee’s behalf.

Appeals of adverse determinations may be processed under expedited or standard time frames. The time frame for BlueCross BlueShield to make an appeal decision begins when BlueCross BlueShield receives the necessary information. The clinical peer reviewer for all appeal reviews will not be the same clinical peer reviewer that made the initial decision. BlueCross BlueShield will send a written acknowledgment
of the appeal within fifteen calendar days of receipt of the appeal request. If a decision is made before the written acknowledgement is sent, the written acknowledgement may be included with the notice of appeal determination. Members will be given the opportunity to present evidence both before and during the appeal process and will be allowed to examine their case file and receive a free copy of their case file upon request.

**Expedited Review and Time Frames**
An appeal will automatically be processed as expedited if any of the following types of denials are issued:
- Denial for concurrent services or denial of an extension for concurrent services
- Denial for services that are part of a specific treatment plan as prescribed by the member’s physician
- Denial of a hospital admission while the member is still in-house at the time of the denial
- Denial of home care services following an admission to the hospital
- Denial of services that the member or member’s physician feel are urgent, and a delay in review would jeopardize the member’s life, health or the ability to attain, maintain or regain maximum function

Members have the right to request an expedited appeal, but BlueCross BlueShield may deny and notify the member immediately by phone, and also in writing within two days of the decision to deny an expedited review request, that the appeal will be processed under standard appeal time frames. If BlueCross BlueShield requires additional information to process the appeal, BlueCross BlueShield will immediately notify the member and the member’s health care provider by phone or fax, followed by a written notice.

An expedited appeal decision will be made as fast as the member’s condition requires and within two business days of receipt of the necessary information but no more than three business days after receipt of the appeal. A member may be eligible to file an external expedited appeal at the same time. Expedited appeals not resolved to the satisfaction of the appealing party may be reappealed via the standard appeal process or through an external appeal process. Written notification of an expedited appeal decision will be sent within 24 hours of rendering the decision. BlueCross BlueShield will make a reasonable effort to provide oral notice to the member and the provider at the time the decision is made.

**Standard Review and Time Frames**
A standard appeal decision will be made as fast as the member’s condition requires but no later than 30 days from receipt of the appeal.

If BlueCross BlueShield requires additional information to process the appeal, BlueCross BlueShield will notify the member and the member’s health care provider, in writing, within 15 days of receipt of the appeal of the need for additional information. In the case that only a portion of the necessary information is received, BlueCross BlueShield will request the missing information, in writing, within five business days of receipt of the partial information. Turnaround time for an appeal decision, whether expedited or standard, may be extended for up to 14 days when the member, member’s designee or provider requests an extension; or BlueCross BlueShield can demonstrate a need for more information and the extension is in the member’s best interest. An extension notification will be mailed to the member.
Written Notification of Appeal Decisions

Written notification of an appeal decision will be sent to the member, member’s designee and provider within two business days of rendering the decision. The written notification will include:

- The date, basis and clinical rationale for the decision
- The words “final adverse determination”
- The BlueCross BlueShield contact person and phone number
- The member’s coverage type
- The UR agent’s name, address, contact person and phone number
- The service that was denied, including facility/provider and developer/manufacturer of service as available
- A statement that the member may be eligible for an external appeal and the time frames for an external appeal
- A statement indicating that if a second level of internal appeal is offered, the member cannot be required to exhaust both levels and has only four months from receipt of the final adverse determination to file an external appeal. Note: Choosing to file for a second level of internal appeal may cause the time frame to file an external appeal to expire (BlueCross BlueShield does not offer a second level of internal appeal)
- The standard description of the external appeal process
- A summary of appeal and date filed
- The date appeal process was completed
- A description of the member’s fair hearing rights (if not included with the original denial; CHPlus members do not have fair hearing rights)
- The member’s right to contact the NYSDOH at 1-800-206-8125 and complain
- A statement that the notice is available in other languages and formats for special needs and how to access these formats

Failure to make an appeal decision within the time frames noted above is deemed to be a reversal (approval) of the adverse determination. BlueCross BlueShield and the member may jointly agree to waive the internal appeal process. If this occurs, BlueCross BlueShield will inform the member of the process to request an external appeal in writing within 24 hours of the agreement to waive the internal appeal process.

In order to comply with both NYS regulatory requirements and NCQA standards, BlueCross BlueShield will follow the most stringent time frames for appeals. See the following table for comparison:

### External Appeal Process

As the provider, you may be eligible to request an external appeal, an independent review of a coverage denial made by a third-party agent known as an External Review agent. You may request an external appeal if one of the following applies:

- The denial issued was based upon lack of medical necessity, and the member has exhausted the internal action appeal process through BlueCross BlueShield, or the member and BlueCross BlueShield both agree to waive the internal action appeal process.
- The denial was issued because the service is considered experimental or investigational, and the member has exhausted the internal action appeal process through BlueCross BlueShield, or the member and BlueCross BlueShield both agree to waive the internal action appeal process. In this case, a physician must certify that the member has a life-threatening or disabling disease or condition or a rare disease for which:
  - Standard medical treatment is not effective or medically inappropriate
  - Standard medical treatment does not exist
  - A licensed, board-certified or board-eligible doctor recommends either:
1. A treatment or medication including a pharmaceutical product within the meaning of PHL 4900(5)(b)(B) which, based on two documents of medical and scientific evidence, is likely to be more beneficial to the member than any covered standard treatment.

2. In the case of a rare disease, a treatment whose benefits to the member outweigh the risks.

3. In the case of a rare disease, a clinical trial for which the member is eligible.
   - The denial was issued because the service is being done by an out-of-network provider (outside of the BlueCross BlueShield network) and the member has exhausted the internal action appeal process through BlueCross BlueShield, or the member and BlueCross BlueShield both agree to waive the internal action appeal process. In this case, a physician must certify that:
     o The out-of-network service is materially different than the recommended in-network service.
     o A licensed, board-certified or board-eligible doctor recommends an out-of-network treatment or medication including a pharmaceutical product within the meaning of PHL 4900(5)(b)(B) which, based on two documents of medical and scientific evidence, is likely to be more beneficial to the member than any covered in-network treatment and whose benefits to the member outweigh the risks.

Providers may request an external appeal no later than 60 days from the date of the final adverse determination. A member has up to four months to request an external appeal.

Please note that in cases concerning ongoing (concurrent) services or services already provided to the member (retrospective), you may be eligible to request an external appeal on the member’s behalf.

To request an external appeal, submit an attestation for an external appeal to the New York State Department of Financial Services. The attestation form is located at [www.dfs.ny.gov/insurance/extapp/extappqa.htm](http://www.dfs.ny.gov/insurance/extapp/extappqa.htm).

The patient’s physician must complete this attestation for an external appeal of a denial of services as experimental/investigational, a clinical trial, a rare disease, out of network, or for an expedited appeal.

Send the attestation form via one of the following methods:
   - **Mail:** New York State Department of Financial Services
     99 Washington Ave., Box 177
     Albany, NY 12210
   - **Fax:** 1-800-332-2729

Note: The Department of Financial Services or the external appeal agent may need to request additional information, including the patient’s medical records.

**Medically Necessary**
Medically necessary health services are defined as health services that meet all or one of the following conditions:
   - Services are essential to prevent, diagnose, manage or treat conditions that cause acute suffering, endanger life, result in illness or infirmity, interfere with the capacity for normal activity, or threaten some significant handicap.
• For children and youth, services are necessary to promote normal growth and development and prevent, diagnose, treat, ameliorate or palliate the effects of a physical, mental, behavioral, genetic, or congenital condition, injury or disability.

• Services are essential to prevent, diagnose, prevent the worsening of, alleviate, correct or cure medical conditions that endanger life, cause suffering or pain, cause physical deformity or malfunction, threaten to cause or aggravate a handicap, result in illness or infirmity of a member or interfere with such person’s capacity for normal activity.

• Services are provided at an appropriate facility and at the appropriate level of care for the treatment of the member’s medical condition.

• Services are provided in accordance with generally accepted standards of medical practice.

Note: We do not cover the use of any experimental procedures or experimental medications, except under certain preauthorized circumstances.

Fair Hearing Process

A member or their designee may ask for a fair hearing and/or an external appeal. However, the decision of the fair hearing officer will supersede any external appeal decision. A member or their designee can request a fair hearing by sending a written request within 60 days from the adverse determination to:

New York State Office of Temporary and Disability Assistance
Fair Hearings
P.O. Box 22023
Albany, NY 12201-2023

They may also call toll-free at 1-800-342-3334 or fax to 1-518-473-6735.

Continuation of Benefits (Aid Continuing)

BlueCross BlueShield members may request a continuation of their benefits during the appeal process by contacting BlueCross BlueShield Member Services at 1-866-231-0847. To ensure continuation of currently authorized services, the member or person acting on behalf of the member must file a medical appeal on or before 10 calendar days following BlueCross BlueShield mailing the Notice of Action, or the intended effective date of the Action.

BlueCross BlueShield will continue the member’s coverage of benefits if the following conditions are met:

• The member or the provider files the appeal timely (as defined above).
• The appeal involves the termination, suspension or reduction of a previously authorized course of treatment.
• The services were ordered by an authorized provider.
• The original period covered by the original authorization has not expired.
• The member requests extension of benefits.

If, at the member’s request, BlueCross BlueShield continues or reinstates the member’s benefits while the appeal is pending, the benefits will be continued until one of the following occurs:
• The member withdraws the medical appeal or request for the state fair hearing.
• Ten calendar days pass after BlueCross BlueShield mails the medical appeal determination letter, unless the member has, within the 10 calendar days, requested a state fair hearing with continuation of benefits until a state fair hearing decision is reached.
• The time period or service limit of a previously authorized service has been met.

The member may be responsible for the continued benefits if the final determination of the appeal is not in the member’s favor. If the final determination of the medical appeal is in the member’s favor, BlueCross BlueShield will authorize coverage of and arrange for disputed services promptly and as expeditiously as the member’s health condition requires. If the final determination is in the member’s favor and the member received the disputed services, BlueCross BlueShield will pay for those services.
10 HOSPITAL AND ELECTIVE ADMISSION MANAGEMENT

Overview

BlueCross BlueShield requires precertification of all inpatient elective admissions. The referring primary care or specialist physician is responsible for precertification. The referring physician identifies the need to schedule a hospital admission and must submit the request to the BlueCross BlueShield Medical Management department.

Requests for precertification with all supporting documentation must be submitted at a minimum of 72 hours prior to the scheduled admission. Failure to comply with notification rules will result in an administrative denial.

Administrative denial: a denial of services based on reasons other than medical necessity

Administrative denials are made when a contractual requirement is not met, such as late notification of admissions, lack of precertification or failure by the provider to submit clinical information when requested. Appeals for administrative denials must address the reason for the denial (that is, why precertification was not obtained or why clinical information was not submitted). If BlueCross BlueShield overturns its administrative decision, the case will be reviewed for medical necessity. If approved, the claim will be reprocessed or the requestor will be notified of the action that needs to be taken.

This will allow BlueCross BlueShield to verify benefits and process the precertification request. For services that require precertification, BlueCross BlueShield makes case-by-case determinations that consider the individuals’ health care needs and medical histories in conjunction with Milliman Care Guidelines (MCG) criteria.

The hospital can confirm that an authorization is on file by calling 1-866-231-0847 (see Chapter 13 of this manual for instructions). If coverage of an admission has not been approved, the facility should call BlueCross BlueShield at 1-866-231-0847. BlueCross BlueShield will contact the referring physician directly to resolve the issue.

BlueCross BlueShield is available 24 hours a day, 7 days a week to accept precertification requests. When a request is received from the physician via telephone or fax for medical services, the care specialist will verify eligibility and benefits. This information will be forwarded to the precertification nurse.

The precertification nurse will review the coverage request and the supporting medical documentation to determine the medical appropriateness of diagnostic and therapeutic procedures. When appropriate, the precertification nurse will assist the physician in identifying alternatives for health care delivery as supported by the medical director.

When the clinical information received is in accordance with the definition of medical necessity and in conjunction with MCG criteria, a BlueCross BlueShield reference number will be issued to the referring physician. All utilization guidelines must be supported by an individualized determination of medical necessity based on the member’s needs and medical history.
If the precertification documentation is incomplete or inadequate, the precertification nurse will not approve coverage of the request but will notify the referring provider to submit the additional necessary documentation.

If the medical director denies coverage of the request, the appropriate denial letter (including the member’s appeal rights) will be mailed to the requesting provider, the member’s PCP and the member.

**Emergent Admission Notification Requirements**

BlueCross BlueShield prefers immediate notification by network hospitals of emergent admissions. All hospitals must notify BlueCross BlueShield of emergent admissions within one business day of admission or post-stabilization. Failure to comply with notification rules will result in an administrative denial. BlueCross BlueShield Medical Management staff will verify eligibility and determine benefit coverage.

BlueCross BlueShield is available 24 hours a day, 7 days a week to accept emergent admission notification at **1-866-231-0847**.

Coverage of emergent admissions is authorized based on review by a concurrent review nurse. When the clinical information received meets MCG criteria, a BlueCross BlueShield reference number will be issued to the hospital.

If the notification documentation provided is incomplete or inadequate, BlueCross BlueShield will not approve coverage of the request and will notify the hospital to submit the additional necessary documentation.

If the medical director denies coverage of the request, the appropriate denial letter will be mailed to the hospital, the member’s PCP and the member.

**Nonemergent Outpatient and Ancillary Services: Precertification/Notification Requirements**

BlueCross BlueShield requires precertification for coverage of selected nonemergent outpatient and ancillary services (see chart below). To ensure timeliness of the authorization, the facility and/or provider is expected to provide the following:

- Member name and ID
- Name, telephone number and fax number of physician performing the elective service
- Name of the facility and telephone number where the service is to be performed
- Date of service
- Member diagnosis
- Name of elective procedure to be performed with CPT-4 code
- Medical information to support requested services (medical information includes current signs/symptoms, past and current treatment plans, response to treatment plans and medications)

The provider must advise the member prior to initiating care if a service is not covered by BlueCross BlueShield and state the cost of the service.
If precertification is required, the request must be submitted, at a minimum, within 72 hours of the scheduled admission. Failure to comply with notification rules will result in an administrative denial.

| Behavioral Health/ Substance Abuse | Precertification | • Inpatient psychiatric, inpatient detoxification, inpatient substance abuse rehabilitation and ambulatory detoxification treatment require precertification and concurrent review.  
• No precertification is required for participating providers for coverage of traditional outpatient services such as individual, group and family therapy.  
• Precertification is required for coverage of psychological and neuropsychological testing.  
• Electroconvulsive therapy requires precertification.  
• Partial hospitalization – requires precertification  
• Rehabilitation services for residential SUD treatment supports (OASAS service)  
• Rehabilitation services for residents of community residences (year 2)  
• Precertification is required for the following services:  
  o Continuing day treatment  
  o PROS  
  o ACT  
  o Psychosocial rehabilitation  
  o Community psychiatric support and treatment (CPST)  
• No precertification required for the following:  
  o Medically supervised outpatient withdrawal – Ambulatory Detox  
  o Outpatient SUD Services (OASAS BH Solo/ group practice)  
  o Opioid treatment program / Methadone Maintenance (OTP services)  
  o Outpatient services – MH (OMH services, BH solo/group practice)  
  o Comprehensive psychiatric emergency program  
  o Intensive case management/supportive case management  
  o Health Home care coordination and management |
<p>| Biofeedback                    |             | Precertification is not required.                                                                                                                                                                         |
| Cardiac Rehabilitation         | Precertification | Precertification is required.                                                                                                                                                                          |
| Chemotherapy                   |             | No precertification is required for outpatient chemotherapy services when performed in a participating facility, provider’s office or ambulatory surgery center. Precertification is required for coverage of inpatient chemotherapy services and for certain chemotherapy drugs. For information on coverage of chemotherapy drugs, please see the Pharmacy section of this grid. |
| Chiropractic Services          |             | Chiropractic is not a covered service for adults. This is a covered benefit under the FFS Medicaid program for children younger than age 21 as part of the EPSDT program, and only when ordered by a physician.                      |</p>

<tr>
<td>Laboratory Services</td>
<td>Precertification</td>
<td>All laboratory services furnished by non-network providers require precertification by BlueCross BlueShield, except for hospital laboratory services in the event of an emergency medical condition. For offices with limited or no office laboratory facilities, lab tests may be referred to one of the BlueCross BlueShield preferred lab vendors. See the provider referral directory for a complete listing of participating vendors.</td>
</tr>
<tr>
<td>Medical Supplies</td>
<td></td>
<td>Consumable medical supplies and equipment are items other than drugs, prosthetic or orthotic appliances or DME that have been ordered by a qualified practitioner in the treatment of a specific medical condition and are: consumable, nonreusable, disposable or for a specific rather than incidental purpose and generally have no salvageable value. Disposable medical supplies are disposed of after use by a single individual. Medicaid Managed Care members: Supplies do not require precertification and are covered and billable under medical benefits similar to DME. Some medical supplies, such as insulin syringes, are covered under pharmacy. Visit our website for code-specific information. Medical supplies used during home care services are covered as part of the home care service rate. A list of these supplies can be found in the Medicaid Management Information Systems (MMIS) Home Health Services provider manual. CHPlus members: Medical supplies are not covered with the exception of diabetic supplies and medical supplies that are routinely furnished as part of a clinic or office visit, which is covered by BlueCross BlueShield. Medical supplies used during home care services are covered as part of the home care service rate. A list of these supplies can be found in the MMIS Home Health Services provider manual.</td>
</tr>
<tr>
<td>Neurology</td>
<td>No precertification required for network provider for E&amp;M and testing</td>
<td>Precertification is required for neurosurgery, spinal fusion and artificial intervertebral disc surgery. See the Diagnostic Testing section of this grid.</td>

</table>
| Out-of-Area/Out-of-Network Care | Precertification | • Precertification is required with the exception of emergency care (including self-referral).  
• Out-of-area care is only covered for emergent services; elective services are not covered.  
• Out-of-network care is only covered in instances of continuity of care for new enrollees, instances where the provider leaves the network or if an in-network provider is not available to perform the service.  
• **CHPlus members**: This is not a covered benefit except for emergency services. |
| Outpatient/Ambulatory Procedure/Surgery | Precertification | • Precertification requirements are based on the services rendered. Please visit our website for code-specific requirements.  
• **Medicaid Managed Care members**: Knee arthroscopy when the primary diagnosis is osteoarthritis of the knee (without mechanical derangement of the knee) is not covered. |
| Pain Management               | Precertification | • Precertification is required for all services and procedures. Contact AIM for authorization of all pain management services related to spinal procedures at: **1-800-714-0040**.  
• **Medicaid Managed Care members**: Prolotherapy, intradiscal steroid injections, facet joint steroid injections, systemic corticosteroids and traction (continuous or intermittent) for lower back pain are not covered. |
| Pharmacy                      |              | The pharmacy benefit covers medically necessary prescription and over-the-counter (OTC) drugs prescribed by a licensed provider. Exceptions and restrictions exist as the benefit is provided under a closed formulary/Preferred Drug List (PDL).  

Please refer to the appropriate PDL and/or the Medicaid Medication Formulary for the preferred products within therapeutic categories as well as requirements around generics, prior authorization (PA), step therapy, quantity edits and the PA process.

Note: Be sure to check the back of the member’s ID card for applicable pharmacy information. The PDL and formulary are housed on our provider self-service site.  

• Prescription and OTC drugs are covered for Medicaid Managed Care and CHPlus members.  
• Enteral formula is covered under the DME benefit. See the DME section.  
• **Medicaid Managed Care and CHPlus members**: Growth hormone injections solely for Idiopathic Short Stature (ISS) in children are not covered.  
• PA is required for all nonformulary drugs and other certain medications.  
• Many self-injectable medications, self-administered oral specialty medications and office-administered specialty medications are available through IngenioRx or pharmacies in our specialty network and require PA.  
• To determine if a medical injectable requires precertification, please go to the Quick Tools section of our website and click on |

For a list of the specific revenue codes requiring precertification, please refer to our website.</td>
</tr>
</tbody>
</table>

For services that require precertification, we use MCG Care Guidelines to determine medical necessity for inpatient services and Amerigroup medical policies and clinical UM guidelines for outpatient services.

We’re staffed with clinical professionals who coordinate services provided to members and are available 24 hours a day, 7 days a week to accept precertification requests. When we receive your request for medical services via fax, the precertification assistant will verify eligibility and benefits, which will then be forwarded to the nurse reviewer.

The nurse will review the request and the supporting medical documentation to determine the medical appropriateness of diagnostic and therapeutic procedures. When appropriate, the nurse will assist you in identifying alternatives for health care delivery as supported by the medical director.

When the clinical information received meets medical necessity criteria, a BlueCross BlueShield reference number will be issued to you.

If the request is urgent (that is, an expedited service), the decision will be made within 24 hours.

If the precertification documentation is incomplete or inadequate, the nurse will not approve coverage of the request but will instead ask you to submit the additional necessary documentation.

If the medical director denies the request for coverage, the appropriate notice of proposed action will be mailed to the requesting provider, the member’s primary physician, the facility and the member.
Inpatient Reviews

Inpatient Admission Reviews
All inpatient hospital admissions, including urgent and emergent admissions, will be reviewed within one business day. A BlueCross BlueShield Utilization Review (UR) clinician determines the member’s medical status through communication with the hospital’s UR department. Appropriateness of stay is documented, and the concurrent review is initiated. Cases may be referred to the medical director, who renders a decision regarding the coverage of hospitalization. Diagnoses meeting specific criteria are referred to the medical director for possible coordination by the care management program.

Inpatient Concurrent Review
Each network hospital will have an assigned Utilization Management (UM) clinician. Each UM clinician will conduct a concurrent review of the hospital medical record via fax, phone or electronic medical record (EMR) to determine the precertification of coverage for a continued stay.

When one of our UM clinicians reviews the hospital’s medical record, he or she will conduct continued stay reviews and review discharge plans.

When the clinical information received meets medical necessity criteria, approved days and bed-level coverage will be communicated to the hospital for the continued stay.

Our UM clinicians will help coordinate discharge planning needs with the hospital utilizations review staff and attending physician. The attending physician is expected to coordinate with the member’s PCP regarding follow-up care after discharge. The PCP is responsible for contacting the member to schedule all necessary follow-up care. In the case of a behavioral health discharge, the attending physician is responsible for ensuring the consumer has secured an appointment for a follow-up visit with a behavioral health provider to occur within seven calendar days of discharge.

We will authorize covered length of stay based on the clinical information that supports the continued stay. Length of stay authorizations for confinements are based on the severity of the illness and subsequent course of treatment or if it is predetermined by state law. Exceptions are made by the medical director.

If, based upon appropriate criteria and after attempts to speak to the attending physician, the medical director denies coverage for an inpatient stay request, the appropriate notice of action will be mailed to the hospital, the attending provider and the member.

Discharge Planning
Discharge planning is designed to assist you in the coordination of the member discharge when acute care (hospitalization) is no longer necessary.

When long-term care is necessary, we work with you to plan the member’s discharge to an appropriate setting for extended services. These services can often be delivered in a nonhospital facility such as a:

- Hospice facility
- Convalescent facility
- Home health care program (for example, home IV antibiotics)
When you identify medically necessary and appropriate services for the member, we will assist you and the discharge planner in providing a timely and effective transfer to the next appropriate level of care.

Discharge plan authorizations follow MCG criteria guidelines. Authorizations include but are not limited to, transportation, home health, DME, pharmacy, follow-up visits to practitioners or outpatient procedures.

**Confidentiality of Information**

Utilization management, case management, disease management, discharge planning, quality management and claims payment activities are designed to ensure patient-specific information, particularly protected health information obtained during review. Information is kept confidential in accordance with applicable laws, including HIPAA, and is used for the purposes defined above. Information is shared only with entities who have the authority to receive such information and only with those individuals who need access to such information in order to conduct utilization management and related processes.

**Emergency Services**

We provide 24/7 NurseLine service with clinical staff to provide triage advice, referral and, if necessary, to make arrangements for treatment of the member. The staff has access to qualified behavioral health professionals to assess behavioral health emergencies.

We do not discourage members from using the 911 emergency system or deny access to emergency services. Emergency services are provided to members without requiring precertification. Emergency services coverage includes services needed to evaluate or stabilize an emergency medical condition. Criteria used to define an emergency medical condition are consistent with the prudent layperson standard and comply with federal and state requirements.

An emergency medical condition is defined as a physical or behavioral condition manifesting itself by acute symptoms of sufficient severity (including severe pain) that a prudent layperson, who possesses an average knowledge of health and medicine, could reasonably expect the absence of immediate medical attention to result in the following:

- Placing the health of the individual (or, with respect to a pregnant woman, the health of the woman and/or her unborn child) in serious jeopardy
- Serious impairment to bodily functions
- Serious dysfunction of any bodily organ or part

Emergency response is coordinated with community services, including the police, fire and EMS departments, juvenile probation, the judicial system, child protective services, chemical dependency, emergency services and local mental health authorities, if applicable.

When a member seeks emergency services at a hospital, the determination as to whether the need for those services exists will be made for purposes of treatment by a physician licensed to practice medicine or, to the extent permitted by applicable law, by other appropriately licensed personnel under the supervision of or in collaboration with a physician licensed to practice medicine. The physician or other appropriate personnel will indicate in the member’s chart the results of the emergency medical screening examination. We will compensate the provider for screening, evaluation and examination that is
reasonable and calculated and assist the provider with determining whether or not the patient’s condition is an emergency medical condition.

If there is concern surrounding the transfer of a patient (for example, whether the patient is stable enough for discharge or transfer, or whether the medical benefits of an unstable transfer outweigh the risks), the judgment of the attending physician(s) caring for the member at the treating facility prevails and is binding on BlueCross BlueShield. If the emergency department is unable to stabilize and release the member, we will assist in coordination of the inpatient admission, regardless of whether the hospital is network or non-network. All transfers from non-network to network facilities are to be conducted only after the member is medically stable and the facility is capable of rendering the required level of care.

If the member is admitted, the facility is required to notify us. Upon notification, our concurrent review nurse will implement the concurrent review process to ensure coordination of care.

**Urgent Care**

We require our members to contact their PCPs in situations where urgent, unscheduled care is necessary. Precertification with us is not required for a member to access a participating urgent care center.
Overview

We operate and maintain a comprehensive Quality Management program with methods and procedures to control the utilization of services (per Article 49 of the PHL and 42 CFR Part 456); to objectively monitor and systematically evaluate the care and service provided to adult and children/youth members. The scope and content of the program reflects the demographic and epidemiological needs of the population served; we’ll amend it as needed to address the specific monitoring requirements for the benefits and services we manage and the populations we serve. Members and providers have opportunities to make recommendations for areas of improvement. The Quality Management program evaluation, including the goals and outcomes, is kept on file in written form and is available to providers and members upon request. To request a copy of our Quality Management program evaluation, please call the New York State Quality Management (QM) department at 1-866-231-0847.

The initial program development was based on a review of the needs of the population served to include adult and children/youths. Systematic re-evaluation of the needs of the plan’s specific population occurs on an annual basis. This includes not only age/sex distribution but also a review of utilization data or the information needed to perform utilization — inpatient, emergent/urgent care and office visits by type, cost and volume. This information is used to define areas that are high volume or that are problem prone. Studies are planned across the continuum of care and service, with ongoing proactive evaluation and refinement of the program.

There is a comprehensive committee structure in place with oversight from our governing body. This includes but is not limited to the Quality Management Committee, Medical Operations Committee, and Credentialing Committee. Also included in the committee structure is the Children’s Advisory Subcommittee which is a collaborative interdisciplinary group whose goal is to promote and support quality of care and services. The committee reviews and analyzes data and information, provides feedback and recommends action plans to improve quality performance impacting members and providers. The committee establishes measureable objectives and assesses the evidence through quality improvement initiatives to solve problems and pursue opportunities to improve quality.

Use of Performance Data

Practitioners and providers must allow BlueCross BlueShield to use performance data in cooperation with our quality improvement program and activities. Practitioner/provider performance data refers to compliance rates, reports and other information related to the appropriateness, cost, efficiency and/or quality of care delivered by an individual health care practitioner (such as a physician) or a health care organization (such as a hospital). Common examples of performance data include the HEDIS quality of care measures maintained by the National Committee for Quality Assurance (NCQA) and the comprehensive set of measures maintained by the National Quality Forum (NQF).

Quality of Care

All physicians, advanced registered nurse practitioners and physician assistants are evaluated for compliance with pre-established standards as described in our credentialing program.

Review standards are based on medical community standards, external regulatory and accrediting agencies’ requirements and contractual compliance.
Reviews are accomplished by Quality Management (QM) coordinators and associate professionals who strive to develop relationships with providers and hospitals that will positively impact the quality of care and services provided to our members. Results are then submitted to our QM department and incorporated into a profile.

Our quality program includes review of quality of care issues identified for all care settings. QM staff use member complaints, reported adverse events and other information to evaluate the quality of service and care provided to our members.

**Communicable Disease Reporting**
The NYS and NYC Departments of Health require the reporting of all cases of communicable diseases. We will assist in this process by notifying PCPs when there has been a report of a potential communicable disease to us through our claim system. The diagnosis will be clarified, and for those members with a confirmed diagnosis of tuberculosis, sexually transmitted disease, hepatitis or HIV, we will help the PCP with case management services if necessary.

**Accreditation**
Accreditation is a process for an impartial organization to review a company's operations and ensure it is conducting business consistent with national standards. It also supports continuous improvement, guiding the plan to measure, analyze, report and improve the quality of services provided to members.

National evaluations of health plan performance and customer satisfaction are driven by the NCQA and used in the accreditation process. Two of the most important measures of performance and member satisfaction are HEDIS and CAHPS. HEDIS is a set of standardized performance measures used to compare the performance of managed care plans and measures for physicians based on value rather than cost. More than 90% of America’s health plans use HEDIS and report rates annually. The CAHPS survey is a member satisfaction survey administered annually to a random sample of BlueCross BlueShield members.

Our plan scores are compared to other health plans’ scores on specific measures for benchmarking purposes. Accreditation results are displayed on public websites to assist employers and individual consumers in making informed decisions about their health plan options. BlueCross BlueShield is currently accredited by the NCQA.

**CAHPS Member Satisfaction Survey**
In an effort to better serve our members, we conduct the CAHPS member satisfaction survey each year. The CAHPS survey asks our members to rate their experiences with their doctors and/or specialists and health plans throughout the previous six months. More specifically, the survey asks if we provide good access to care, how quickly members were able to get appointments with providers and specialists, and if members feel they are getting the care they need. You play a critical role in the CAHPS survey — we count on you to help us improve health care quality. We report the results of the survey on a yearly basis, as well as some of the activities and initiatives that have been implemented to improve our performance and member satisfaction with our plan. To request a copy of the member satisfaction survey results, call the Provider Services department at 1-866-231-0847.

**Quality Assurance Reporting Requirements**
The Quality Assurance Reporting Requirements (QARR) program applies to Child Health Plus and Medicaid Managed Care.

QARR is a program overseen by the NYSDOH that monitors health plan quality in NYS. The program consists of a series of age-specific and/or health-specific measures designed to examine managed care plan...
performance in several key areas. QARR data is collected through encounter (claims) data from inpatient or outpatient visits, pharmacy data, laboratory claims or from the member’s medical record. The DOH uses QARR data to work with plans and providers to enhance the health care outcomes of managed care members through performance feedback, quality improvement programs, technical assistance and highlighting of best practices. All Medicaid health plans in NYS are required to submit QARR data.

Examples of measures reported for QARR include:
- Well-child visits: 15 months, 3 to 6 years and 12 to 21 years
- Child/adult access to care
- Immunizations completed by age 2
- Lead testing prior to or at the age of 24 months
- Timeliness and frequency of prenatal care and timeliness of postpartum care
- Comprehensive Diabetes Care
- Screening of adolescents for alcohol/substance abuse and tobacco use
- Breast Cancer Screening
- Cervical Cancer Screening
- Appropriate treatment of asthma
- HIV/AIDS comprehensive care
- Cardiovascular Monitoring for People With Cardiovascular Disease and Schizophrenia
- Colorectal Cancer Screening
- Diabetes Screening For People With Schizophrenia or Bipolar Disorder Using Antipsychotic Medications
- Antidepressant Medication Monitoring
- Initiation and Engagement of Alcohol and Other Drug Dependence Treatment
- Metabolic Monitoring for Children and Adolescents on Antipsychotics

Our internal claims system will collect pertinent QARR information as it is received. The balance of information will be extracted from member medical records, as necessary. Health care professionals from our Quality Management department will contact your office or facility to gain access to the medical records needed to collect the required information. All efforts will be made not to inconvenience you or your staff in the process. It is important to remember that the more information that can be extracted from claims data, the less likely a medical record review will be necessary.

**Provider Profiling**

The Quality Management department uses provider-profiling methodology, rationale and processes for classifying physician performance. The method applies to the following key measures: access and availability to care, member complaints, ER utilization and PCP turnover rates.

The principal features of the methodology ensure:
- Clearly defined goals and objectives for the profiling activity have been developed, including the communication of a profiling summary to providers and the provision of provider/office manager education, based on findings and corrective action plans with time tables and measurable benchmarks of success, as indicated.
- Descriptions and rationale for each measure have been developed, and supporting clinical documentation is included, when appropriate.
- The measures selected for the profile meet criteria for valid and reliable measurement and when analyzed as a whole, will be used as a tool to target opportunities for improvement. Additionally, a summary of these results will be shared with the involved physicians to promote continuous quality improvement activities.
Quality profiles examine a broad range of practice measures and have some adjustments for risk, and similar cohorts are analyzed across practices to fairly compare each provider.

Profiles include data from multiple sources, including claims, QARR, medical record review data, utilization management and pharmacy data, member satisfaction surveys, enrollment and PCP assignment data, member complaints and provider-supplied information, such as office hours, walk-in policies, etc.

Measure Selection Criteria
The measures selected for the physician quality profile met the following criteria:

- The definition of the measure has been consistent over one year, meaning that the measurement methodology has not changed appreciably.
- Data has been reported in the measurement area for a minimum of one year.
- The measure is readily understood and its validity accepted.
- The data for the measure are available and meet accepted standards for completeness.
- The size of the population for selecting a measure is adequate. A panel size limit (completed only for panels of 100 or more) has been selected. In relation to QARR scores when reviewed by an individual provider, the population will often be too small to provide a statistically significant result but will nonetheless be reviewed as one measure of the provision of services.

Description and Definition of the Measures

QARR Indicator: A summary of applicable QARR measurement scores. The report details the population reviewed for each measure and the pass/fail experience of each member enrolled in the plan for at least one year. QARR scores for each group practice, individual PCP and/or IPA are reported with the associated BlueCross BlueShield average as an indication of PCP performance in relation to one’s peer group. This data is presented in its raw form, with no interpretation or comparative narration provided.

The following QARR measures are some of the components of this indicator:

- Adult access to primary care
- Child access to primary care
- Cervical cancer screening
- Breast cancer screening
- Immunizations
- Lead screening
- Well care

Physician Indices (Utilization Metrics): Includes the utilization experience of members as both a volume statistic and proportion of total panel membership. It includes provider visits as well as emergency room, inpatient and nonparticipating provider/facility utilization.

Utilization:

- The proportion of members with a PCP visit during the year
- The proportion of members with an ER visit during the year
- The proportion of members with a well-care visit during the year
- The proportion of members with a visit to a nonparticipating provider/facility during the year
- The proportion of members admitted with conditions that are considered avoidable when managed effectively in an outpatient setting

Member Complaints: Reviewed by providers; complaint categories determined to be provider-related are reviewed for volume, severity and substantiation. Those related to access and availability, quality of care/treatment, physician office environment, reimbursement/billing disputes or communication with PCP
and/or office staff will be reviewed for the previous 12 months and reported as a raw score of complaints assigned to the PCP, as well as a ratio of complaints per 100 members for comparative purposes.

The following NYS reportable complaint categories will be reviewed for this purpose:

- Appointment availability
- Excessive wait time at provider’s office
- Denial of clinical treatment
- Dissatisfaction with quality of care
- Dissatisfaction with provider services (nonmedical)
- Dissatisfaction with obtaining provider services after hours
- Difficulty obtaining referrals
- Communication/physical barriers
- Reimbursement/billing issues

Complaints will be identified as total complaints lodged and total substantiated complaints.

**Outcomes:** All indices included in our provider-profiling summary will be presented in a standardized reporting format accessible to you upon request. Formal assessment of provider performance will be evaluated on a periodic basis using the previously stated criteria and an appropriate group of health care professionals using similar treatment modalities and serving a comparable patient population. The resulting report will be reviewed by the provider-profiling oversight committee, who will schedule onsite appointments with PCPs to present results and afford PCPs the opportunity to engage in dialogue regarding the report findings, discuss the unique nature of their practices and work cooperatively and collaboratively with the plan to assess opportunities to improve performance and/or identify practice areas that are working well. We reserve the right to use data about provider performance for business purposes.

**Public Health Issues**

We work with the NYC and NYS Departments of Health to identify, track and, when possible, address any public health issues that may arise in our member population. Some areas of focus are communicable disease reporting, lead testing and reporting, accessing and reporting to the City Immunization Registry (CIR), and child abuse and domestic violence identification and follow-up.

**Domestic Violence**

You’re expected to screen for cases of domestic violence as part of routine assessments and provide members with appropriate referrals when indicated. Questions regarding domestic violence should be referred to the Associate Vice President of Behavioral Health or the Domestic Violence Coordinator at 1-866-231-0847. In addition, you may contact the NYS Domestic Violence Hotline at 1-800-942-6906.

**HIV Testing**

New York requires that HIV testing is offered to all individuals between the ages of 13 and 64 receiving hospital or primary care services and diagnosis and treatment services; services include pre- and post-counseling and coordination for medical care for individuals confirmed as positive. Facilities can create their own consent form as long as the language is consistent with standardized, DOH-created model forms. Consent may be part of a general consent to medical care, though specific opt-out language for HIV testing must be included. Consent for rapid HIV testing can be oral (except in correctional facilities) and noted in the medical record. Additional information regarding HIV testing laws can be found at [www.health.ny.gov/diseases/aids/testing/law/faqs.htm](http://www.health.ny.gov/diseases/aids/testing/law/faqs.htm).
Credentialing

The credentialing summary, criteria, standards, and requirements set forth herein are not intended to limit BlueCross BlueShield of Western New York (BlueCross BlueShield) discretion in any way to amend, change or suspend any aspect of its credentialing program nor is it intended to create rights on the part of practitioners who seek to provide healthcare services to our Members. BlueCross BlueShield further retains the right to approve, suspend, or terminate individual physicians and health care professional, and sites in those instances where it has delegated credentialing decision making.

Credentialing Scope

BlueCross BlueShield credentials the following licensed/state certified independent health care practitioners, including but not limited to:

- Medical Doctors (MD)
- Doctors of Osteopathic Medicine (DO)
- Doctors of Podiatry
- Chiropractor
- Optometrists providing Health Services covered under the Health Benefit Plan
- Doctors of dentistry providing Health Services covered under the Health Benefit Plan including oral and maxillofacial surgeons
- Telemedicine practitioners who provide treatment services under the Health Benefit Plan
- Medical therapists (e.g., physical therapists, speech therapists, and occupational therapists)
- Audiologists
- Nurse practitioners
- Certified nurse midwives
- Physician assistants (as required locally)
- Registered Dieticians

BlueCross BlueShield credentials the following health delivery organizations (HDOs), including but not limited to:

- Hospitals
- Home Health Agencies
- Skilled Nursing Facilities (Nursing Homes)
- Ambulatory Surgical Centers
- Birthing Centers
- Home Infusion Therapy when not associated with another currently credentialed HDO

The following Health Delivery Organizations are not subject to professional conduct and competence review under BlueCross BlueShield credentialing program, but are subject to a certification requirement process including verification of licensure by the applicable state licensing agency and/or compliance with regulatory or state/federal contract requirements for the provision of services:

- Clinical laboratories (CLIA Certification of Accreditation or CLIA Certificate of Compliance)
- End Stage Renal Disease (ESRD) service providers (dialysis facilities) (CMS Certification)
- Portable x-ray Suppliers (FDA Certification)
- Home Infusion Therapy when associated with another currently credentialed HDO (CMS Certification)
- Hospice (CMS Certification)
- Federally Qualified Health Centers (FQHC) (CMS Certification)
- Rural Health Clinics (CMS Certification)
Credentials Committee

The decision to accept, retain, deny or terminate a practitioner’s participation in a Network or Plan Program is conducted by a peer review body, known as BlueCross BlueShield Credentials Committee (“CC”).

The CC will meet at least once every 45 calendar days. The presence of a majority of voting CC members constitutes a quorum. The chief medical officer, or a designee appointed in consultation with the vice president of Medical and Credentialing Policy, will designate a chair of the CC, as well as a vice-chair in states or regions where both Commercial and Medicaid contracts exist. The chair must be a state or regional lead medical director, or an BlueCross BlueShield medical director designee and the vice-chair must be a lead medical officer or an BlueCross BlueShield medical director designee, for that line of business not represented by the chair. In states or regions where only one line of business is represented, the chair of the CC will designate a vice-chair for that line of business also represented by the chair. The CC will include at least five, but no more than ten external physicians representing multiple medical specialties (in general, the following specialties or practice-types should be represented: pediatrics, obstetrics/gynecology, adult medicine (family medicine or internal medicine); surgery; behavioral health, with the option of using other specialties when needed as determined by the chair/vice-chair). CC membership may also include one to two other types of credentialed health providers (e.g. nurse practitioner, chiropractor, social worker, podiatrist) to meet priorities of the geographic region as per chair/vice-chair’s discretion. At least two of the physician committee members must be credentialed for each line of business (e.g. Commercial, Medicare, and Medicaid) offered within the geographic purview of the CC. The chair/vice-chair will serve as a voting member(s) and provide support to the credentialing/re-credentialing process as needed.

The CC will access various specialists for consultation, as needed to complete the review of a practitioner’s credentials. A committee member will disclose and abstain from voting on a practitioner if the committee member (i) believes there is a conflict of interest, such as direct economic competition with the practitioner; or (ii) feels his or her judgment might otherwise be compromised. A committee member will also disclose if he or she has been professionally involved with the practitioner. Determinations to deny an applicant’s participation, or terminate a practitioner from participation in one or more Networks or Plan Programs, require a majority vote of the voting members of the CC in attendance, the majority of whom are Network practitioners.

During the credentialing process, all information that is obtained is confidential and not subject to review by third parties except to the extent permitted by law. Access to information will be restricted to those individuals who are deemed necessary to attain the objectives of BlueCross BlueShield credentialing program. In particular, information supplied by the practitioner or HDO in the application, as well as other non-publicly available information will be treated as confidential. Confidential written records regarding deficiencies found, the actions taken, and the recommended follow-up will be kept in a secure fashion. Security mechanisms include secured office facilities and locked filing cabinets, a protected computer infrastructure with password controls and systematic monitoring, and staff ethics and compliance training programs. The procedures and minutes of the CC will be open to review by state and federal regulating agencies and accrediting bodies to the extent permitted by law.

Practitioners and HDOs are notified that they have the right to review information submitted to support their credentialing applications. In the event that credentialing information cannot be verified, or if there is a discrepancy in the credentialing information obtained, the Credentialing staff will contact the practitioner or HDO within 30 calendar days of the identification of the issue. This communication will notify the
practitioner or HDO of the right to correct erroneous information or provide additional details regarding the issue in question. This notification will also include the process for submission of this additional information, including where it should be sent. Depending on the nature of the issue in question, this communication may occur verbally or in writing. If the communication is verbal, written confirmation will be sent at a later date. All communication on the issue(s) in question, including copies of the correspondence or a detailed record of phone calls, will be documented in the practitioner’s credentials file. The practitioner or HDO will be given no less than 14 calendar days in which to provide additional information. On request, the practitioner will be provided with the status of their credentialing or recredentialing application.

BlueCross BlueShield may request and will accept additional information from the applicant to correct or explain incomplete, inaccurate, or conflicting credentialing information. The CC will review the information and rationale presented by the applicant to determine if a material omission has occurred or if other credentialing criteria are met.

**Nondiscrimination Policy**

BlueCross BlueShield will not discriminate against any applicant for participation in its programs or provider network(s) on the basis of race, gender, color, creed, religion, national origin, ancestry, sexual orientation, age, veteran, or marital status or any unlawful basis not specifically mentioned herein. Additionally, BlueCross BlueShield will not discriminate against any applicant on the basis of the risk of population they serve or against those who specialize in the treatment of costly conditions. Other than gender and language capabilities which are provided to the members to meet their needs and preferences, this information is not required in the credentialing and re-credentialing process. Determinations as to which practitioners and providers require additional individual review by the Credentials Committee are made according to predetermined criteria related to professional conduct and competence. Credentials Committee decisions are based on issues of professional conduct and competence as reported and verified through the credentialing process. BlueCross BlueShield will audit credentialing files annually to identify discriminatory practices, if any, in the selection of practitioners. Should discriminatory practices be identified through audit or through other means, BlueCross BlueShield will take appropriate action(s) to track and eliminate those practices.

**Initial Credentialing**

Each practitioner or HDO must complete a standard application form deemed acceptable by BlueCross BlueShield when applying for initial participation in one or more of BlueCross BlueShield networks or plan programs. For practitioners, the Council for Affordable Quality Healthcare (CAQH) ProView system is utilized.

To join CAQH ProView:
1. Go to [https://proview.caqh.org/pr](https://proview.caqh.org/pr).
2. Select **Register Now** on the bottom right and follow the instructions.

If you already participate with CAQH and have completed your online application, ensure you authorized Amerigroup access to your credentialing information.

Note: If you have selected **Global Authorization**, Amerigroup will already have access to your data. To authorize Amerigroup:
1. Go to [https://proview.caqh.org/pr](https://proview.caqh.org/pr) and enter your username and password.
2. Select the cog wheel in the upper right and then select **Authorize**.
3. Scroll down, locate **Amerigroup** and check the box beside Amerigroup.
4. Select **Save** to submit your changes.

For questions about ProView, call the CAQH help desk at **1-888-599-1771** or email providerhelp@provieview.CAQH.org.

For HDO and paper applications, please [https://providers.amerigroup.com/pages/md-join-network.aspx](https://providers.amerigroup.com/pages/md-join-network.aspx) or contact your Provider Solutions representative.

BlueCross BlueShield will verify those elements related to an applicants’ legal authority to practice, relevant training, experience and competency from the primary source, where applicable, during the credentialing process. All verifications must be current and verified within the one hundred eighty (180) calendar day period prior to the CC making its credentialing recommendation or as otherwise required by applicable accreditation standards.

During the credentialing process, BlueCross BlueShield will review, among other things, verification of the credentialing data as described in the following tables unless otherwise required by regulatory or accrediting bodies. These tables represent minimum requirements.

A. Practitioners

<table>
<thead>
<tr>
<th>Verification element</th>
</tr>
</thead>
<tbody>
<tr>
<td>License to practice in the state(s) in which the practitioner will be treating Members.</td>
</tr>
<tr>
<td>Hospital admitting privileges at a TJC, NIAHO or AOA accredited hospital, or a Network hospital previously approved by the committee.</td>
</tr>
<tr>
<td>DEA/CDS and state controlled substance registrations</td>
</tr>
<tr>
<td>a. The DEA/CDS registration must be valid in the state(s) in which practitioner will be treating Members. Practitioners who see Members in more than one state must have a DEA/CDS registration for each state.</td>
</tr>
<tr>
<td>Malpractice insurance</td>
</tr>
<tr>
<td>Malpractice claims history</td>
</tr>
<tr>
<td>Board certification or highest level of medical training or education</td>
</tr>
<tr>
<td>Work history</td>
</tr>
<tr>
<td>State or Federal license sanctions or limitations</td>
</tr>
<tr>
<td>Medicare, Medicaid or FEHBP sanctions</td>
</tr>
<tr>
<td>National Practitioner Data Bank report</td>
</tr>
<tr>
<td>State Medicaid Exclusion Listing, if applicable</td>
</tr>
</tbody>
</table>

B. HDOs
Recredentialing

The recredentialing process incorporates re-verification and the identification of changes in the practitioner’s or HDO’s licensure, sanctions, certification, health status and/or performance information (including, but not limited to, malpractice experience, hospital privilege or other actions) that may reflect on the practitioner’s or HDO’s professional conduct and competence. This information is reviewed in order to assess whether practitioners and HDOs continue to meet BlueCross BlueShield credentialing standards.

All applicable practitioners and HDOs in the Network within the scope of BlueCross BlueShield Credentialing program are required to be recredentialed every 3 years unless otherwise required by contract or state regulations.

Health Delivery Organizations

New HDO applicants will submit a standardized application to BlueCross BlueShield for review. If the candidate meets BlueCross BlueShield screening criteria, the credentialing process will commence. To assess whether Network HDOs, within the scope of the Credentialing Program, meet appropriate standards of professional conduct and competence, they are subject to credentialing and recredentialing programs. In addition to the licensure and other eligibility criteria for HDOs, as described in detail in BlueCross BlueShield Credentialing Program Standards, all Network HDOs are required to maintain accreditation by an appropriate, recognized accrediting body or, in the absence of such accreditation, BlueCross BlueShield may evaluate the most recent site survey by Medicare, the appropriate state oversight agency, or a site survey performed by a designated independent external entity within the past 36 months for that HDO.

Recredentialing of HDOs occurs every 3 years unless otherwise required by regulatory or accrediting bodies. Each HDO applying for continuing participation in Networks or Plan Programs must submit all required supporting documentation.

On request, HDOs will be provided with the status of their credentialing application. BlueCross BlueShield may request, and will accept, additional information from the HDO to correct incomplete, inaccurate, or conflicting credentialing information. The CC will review this information and the rationale behind it, as presented by the HDO, and determine if a material omission has occurred or if other credentialing criteria are met.
Ongoing Sanction Monitoring

To support certain credentialing standards between the recredentialing cycles, BlueCross BlueShield has established an ongoing monitoring program. Credentialing performs ongoing monitoring to help ensure continued compliance with credentialing standards and to assess for occurrences that may reflect issues of substandard professional conduct and competence. To achieve this, the credentialing department will review periodic listings/reports within thirty (30) calendar days of the time they are made available from the various sources including, but not limited to, the following:

1. Office of the Inspector General (“OIG”)
2. Federal Medicare/Medicaid Reports
3. Office of Personnel Management (“OPM”)
4. State licensing Boards/Agencies
5. Member/Customer Services Departments
6. Clinical Quality Management Department (including data regarding complaints of both a clinical and non-clinical nature, reports of adverse clinical events and outcomes, and satisfaction data, as available)
7. Other internal BlueCross BlueShield Departments
8. Any other information received from sources deemed reliable by Anthem.

When a practitioner or HDO within the scope of credentialing has been identified by these sources, criteria will be used to assess the appropriate response.

Appeals Process

BlueCross BlueShield has established policies for monitoring and re-credentialing practitioners and HDOs who seek continued participation in one or more of BlueCross BlueShield Networks or Plan Programs. Information reviewed during this activity may indicate that the professional conduct and competence standards are no longer being met, and BlueCross BlueShield may wish to terminate practitioners or HDOs.

BlueCross BlueShield also seeks to treat Network practitioners and HDOs, as well as those applying for participation, fairly and thus provides practitioners and HDOs with a process to appeal determinations terminating/denying participation in BlueCross BlueShield Networks for professional competence and conduct reasons, or which would otherwise result in a report to the National Practitioner Data Bank (“NPDB”).

Additionally, BlueCross BlueShield will permit practitioners and HDOs who have been refused initial participation the opportunity to correct any errors or omissions which may have led to such denial (informal/reconsideration only). It is the intent of BlueCross BlueShield to give practitioners and HDOs the opportunity to contest a termination of the practitioner’s or HDO’s participation in one or more of BlueCross BlueShield Networks or Plan Programs and those denials of request for initial participation which are reported to the NPDB that were based on professional competence and conduct considerations. Immediate terminations may be imposed due to the practitioner’s or HDO’s license suspension, probation or revocation, or if a practitioner or HDO has been sanctioned, debarred or excluded from the Medicare, Medicaid or FEHB programs, or has a criminal conviction, or BlueCross BlueShield determination that the practitioner’s or HDO’s continued participation poses an imminent risk of harm to Members. Participating practitioners and HDOs whose network participation has been terminated due to the practitioner’s suspension or loss of licensure or due to criminal conviction are not
eligible for Informal Review/Reconsideration or Formal Appeal. Participating practitioners and HDOs whose network participation has been terminated due to sanction, debarment or exclusion from the Medicare, Medicaid or FEHB are not eligible for Informal Review/Reconsideration or Formal Appeal.

**Reporting Requirements**

When BlueCross BlueShield takes a professional review action with respect to a practitioner’s or HDO’s participation in one or more of its Networks or Plan Programs, BlueCross BlueShield may have an obligation to report such to the NPDB, state licensing board and legally designated agencies. In the event that the procedures set forth for reporting reportable adverse actions conflict with the process set forth in the current NPDB Guidebook, the process set forth in the NPDB Guidebook will govern.

**BlueCross BlueShield Credentialing Program Standards**

I. Eligibility Criteria

Health care practitioners:

Initial applicants must meet the following criteria in order to be considered for participation:

A. Must not be currently federally sanctioned, debarred or excluded from participation in any of the following programs: Medicare, Medicaid or FEHBP; and

B. Possess a current, valid, unencumbered, unrestricted, and non-probationary license in the state(s) where he/she provides services to Members; and

C. Possess a current, valid, and unrestricted Drug Enforcement Agency (DEA) and/or Controlled Dangerous Substances (CDS) registration for prescribing controlled substances, if applicable to his/her specialty in which he/she will treat Members; the DEA/CDS registration must be valid in the state(s) in which the practitioner will be treating Members. Practitioners who see Members in more than one state must have a DEA/CDS registration for each state.

Initial applications should meet the following criteria in order to be considered for participation, with exceptions reviewed and approved by the CC:

A. For MDs, DOs, DPMs, and DMDs/DDSs practicing oral and maxillofacial surgery, the applicant must have current, in force board certification (as defined by the American Board of Medical Specialties (ABMS), American Osteopathic Association (AOA), Royal College of Physicians and Surgeons of Canada (RCPSC), College of Family Physicians of Canada (CFPC), American Board of Foot and Ankle Surgery (ABFAS), American Board of Podiatric Medicine (ABPM), or American Board of Oral and Maxillofacial Surgery (ABOMS) in the clinical discipline for which they are applying.

B. If not certified, MDs and DOs will be granted five years or a period of time consistent with ABMS or AOA board eligibility time limits, whatever is greater, after completion of their residency or fellowship training program to meet the board certification requirement.

C. If not certified, DPMs will be granted five years after the completion of their residency to meet this requirement for the ABPM. Non-certified DPMs will be granted seven years after completion of their residency to meet this requirement for ABFAS.

D. Individuals no longer eligible for board certification are not eligible for continued exception to this requirement.
1. As alternatives, MDs and DOs meeting any one of the following criteria will be viewed as meeting the education, training and certification requirement:
   a. Previous board certification (as defined by one of the following: ABMS, AOA, RCPSC, CFPC, ABFAS, ABPM, or ABOMS) in the clinical specialty or subspecialty for which they are applying which has now expired AND a minimum of ten (10) consecutive years of clinical practice. OR
   b. Training which met the requirements in place at the time it was completed in a specialty field prior to the availability of board certifications in that clinical specialty or subspecialty. OR
   c. Specialized practice expertise as evidenced by publication in nationally accepted peer review literature and/or recognized as a leader in the science of their specialty AND a faculty appointment of Assistant Professor or higher at an academic medical center and teaching facility in BlueCross BlueShield Network AND the applicant’s professional activities are spent at that institution at least fifty percent (50%) of the time.

2. Practitioners meeting one of these three (3) alternative criteria (a, b, c) will be viewed as meeting all BlueCross BlueShield education, training and certification criteria and will not be required to undergo additional review or individual presentation to the CC. These alternatives are subject to BlueCross BlueShield review and approval. Reports submitted by delegate to BlueCross BlueShield must contain sufficient documentation to support the above alternatives, as determined by BlueCross BlueShield.

E. For MDs and DOs, the applicant must have unrestricted hospital privileges at a The Joint Commission (TJC), National Integrated Accreditation for Healthcare Organizations (“NIAHO”), Center for Improvement in Healthcare Quality (CIHQ), a Healthcare Facilities accreditation Program (HFAP) accredited hospital, or a Network hospital previously approved by the committee. Some clinical disciplines may function exclusively in the outpatient setting, and the CC may at its discretion deem hospital privileges not relevant to these specialties. Also, the organization of an increasing number of physician practice settings in selected fields is such that individual physicians may practice solely in either an outpatient or an inpatient setting. The CC will evaluate applications from practitioners in such practices without regard to hospital privileges. The expectation of these physicians would be that there is an appropriate referral arrangement with a Network practitioner to provide inpatient care.

II. Criteria for Selecting Practitioners

A. New Applicants (Credentialing)
   1. Submission of a complete application and required attachments that must not contain intentional misrepresentations or omissions;
   2. Application attestation signed date within one hundred eighty (180) calendar days of the date of submission to the CC for a vote;
   3. Primary source verifications within acceptable timeframes of the date of submission to the CC for a vote, as deemed by appropriate accrediting agencies;
   4. No evidence of potential material omission(s) on application;
   5. Current, valid, unrestricted license to practice in each state in which the practitioner would provide care to Members;
   6. No current license action;
   7. No history of licensing board action in any state;
   8. No current federal sanction and no history of federal sanctions (per System for Award Management (“SAM”), OIG and OPM report nor on NPDB report);
9. Possess a current, valid, and unrestricted DEA/CDS registration for prescribing controlled substances, if applicable to his/her specialty in which he/she will treat Members. The DEA/CDS registration must be valid in the state(s) in which the practitioner will be treating Members. Practitioners who treat Members in more than one state must have a valid DEA/CDS registration for each applicable state.

Initial applicants who have NO DEA/CDS registration will be viewed as not meeting criteria and the credentialing process will not proceed. However, if the applicant can provide evidence that he/she has applied for a DEA/CDS registration, the credentialing process may proceed if all of the following are met:

a. It can be verified that this application is pending.

b. The applicant has made an arrangement for an alternative practitioner to prescribe controlled substances until the additional DEA/CDS registration is obtained.

c. The applicant agrees to notify BlueCross BlueShield upon receipt of the required DEA/CDS registration.

d. BlueCross BlueShield will verify the appropriate DEA/CDS registration via standard sources.

i. The applicant agrees that failure to provide the appropriate DEA/CDS registration within a ninety (90) calendar day timeframe will result in termination from the Network.

ii. Initial applicants who possess a DEA certificate in a state other than the state in which they will be seeing BlueCross BlueShield members will be notified of the need to obtain the additional DEA, unless the practitioner is delivering services in a telemedicine environment only and does not require a DEA or CDS registration in the additional location(s) where such telemedicine services may be rendered under federal or state law. If the applicant has applied for an additional DEA registration the credentialing process may proceed if all the following criteria are met:

(a) It can be verified that the applicant’s application is pending; and

(b) The applicant has made an arrangement for an alternative provider to prescribe controlled substances until the additional DEA registration is obtained; and

(c) The applicant agrees to notify BlueCross BlueShield upon receipt of the required DEA registration; and

(d) BlueCross BlueShield will verify the appropriate DEA/CDS registration via standard sources; and

(e) The applicant agrees that failure to provide the appropriate DEA registration within a 90 day timeframe will result in termination from the network.

iii. Office-based practitioners who voluntarily choose to have a DEA/CDS registration that does not include all Controlled Substance Schedules (for example, Schedule, II, III or IV), if that practitioner certifies the following:

(a) controlled substances from these Schedules are not prescribed within his/her scope of practice; and

(b) he/she must provide documentation that an arrangement exists for an alternative provider to prescribe controlled substances from these Schedules should it be clinically appropriate; and
(c) DEA/CDS registration is or was not suspended, revoked, surrendered or encumbered for reasons other than those aforementioned.

10. No current hospital membership or privilege restrictions and no history of hospital membership or privileges restrictions;

11. No history of or current use of illegal drugs or history of or current alcoholism;

12. No impairment or other condition which would negatively impact the ability to perform the essential functions in their professional field.

13. No gap in work history greater than six (6) months in the past five (5) years with the exception of those gaps related to parental leave or immigration where twelve (12) month gaps will be acceptable.

14. No convictions, or pleadings of guilty or no contest to, or open indictments of, a felony or any offense involving moral turpitude or fraud. In addition, no other criminal or civil litigation history that together with any other relevant facts, raises a reasonable suspicion of future substandard professional conduct and/or competence. A minimum of the past ten (10) years of malpractice case history is reviewed.

15. Meets Credentialing Standards for education/training for the specialty(ies) in which practitioner wants to be listed in BlueCross BlueShield Network directory as designated on the application. This includes board certification requirements or alternative criteria for MDs and DOs and board certification criteria for DPMs, and oral and maxillofacial surgeons;

16. No involuntary terminations from an HMO or PPO;

17. No "yes" answers to attestation/disclosure questions on the application form with the exception of the following:
   a. investment or business interest in ancillary services, equipment or supplies;
   b. voluntary resignation from a hospital or organization related to practice relocation or facility utilization;
   c. voluntary surrender of state license related to relocation or nonuse of said license;
   d. a NPDB report of a malpractice settlement or any report of a malpractice settlement that does not meet the threshold criteria.
   e. non-renewal of malpractice coverage or change in malpractice carrier related to changes in the carrier’s business practices (no longer offering coverage in a state or no longer in business);
   f. previous failure of a certification exam by a practitioner who is currently board certified or who remains in the five (5) year post residency training window;
   g. actions taken by a hospital against a practitioner’s privileges related solely to the failure to complete medical records in a timely fashion;
   h. history of a licensing board, hospital or other professional entity investigation that was closed without any action or sanction.

Note: the CC will individually review any practitioner that does not meet one or more of the criteria required for initial applicants.

   1. Process, requirements and Verification – Nurse Practitioners:
      a. The nurse practitioner applicant will submit the appropriate application and supporting documents as required of any other Practitioners with the exception of differing information regarding education/training and board certification.
b. The required education/training will be, at a minimum, the completion of an education program leading to licensure as a Registered Nurse, and subsequent additional education leading to licensure as a NP. Verification of this will occur either via verification of the licensure status from the state licensing agency provided that that agency verifies the education or from the certification board if that board provides documentation that it performs primary verification of the professional education and training. If the licensing agency or certification board does not verify highest level of education, the education will be primary source verified in accordance with policy.

c. The license status must be that of NP as verified via primary source from the appropriate state licensing agency. Additionally, this license must be active, unencumbered, unrestricted and not subject to probation, terms or conditions. Any applicants whose licensure status does not meet these criteria, or who have in force adverse actions regarding Medicare or Medicaid will be notified of this and the applicant will be administratively denied.

d. If the NP has prescriptive authority, which allows the prescription of scheduled drugs, their DEA and/or state certificate of prescriptive authority information will be requested and primary source verified via normal BlueCross BlueShield procedures. If there are in force adverse actions against the DEA, the applicant will be notified of this and the applicant will be administratively denied.

e. All NP applicants will be certified in the area which reflects their scope of practice by any one of the following:
   
   i. Certification program of the American Nurse Credentialing Center (www.nursecredentialing.org), a subsidiary of the American Nursing Association (http://www.nursingcertification.org/exam_programs.htm); or
   
   ii. American Academy of Nurse Practitioners – Certification Program (www.aanpcertification.org); or
   
   iii. National Certification Corporation (http://www.nccwebsite.org); or
   
   iv. Pediatric Nurse Certification Board (PNCB) Certified Pediatric Nurse Practitioner – (note: CPN – certified pediatric nurse is not a nurse practitioner) (http://www.pncb.org/ptistore/control/exams/ac/progs); OR
   
   v. Oncology Nursing Certification Corporation (ONCC) – Advanced Oncology Certified Nurse Practitioner (AOCNP®) – ONLY (http://oncc.org);
   
   
   This certification must be active and primary source verified. This certification must be active and primary source verified. If the state licensing board primary sources verifies this certification as a requirement for licensure, additional verification by BlueCross BlueShield is not required. If the applicant is not certified or if his/her certification has expired, the application will be submitted for individual review.

f. If the NP has hospital privileges, they must have hospital privileges at a CIHQ, TJC, NIAHO, or HFAP accredited hospital, or a network hospital previously approved by the committee. Information regarding history of any actions taken
against any hospital privileges held by the NP will be obtained. Any adverse action against any hospital privileges will trigger a level II review.

g. The NP applicant will undergo the standard credentialing processes outlined in BlueCross BlueShield Credentialing Policies. NPs are subject to all the requirements outlined in these Credentialing Policies including (but not limited to): the requirement for Committee review of Level II files for failure to meet predetermined criteria, re-credentialing every three years, and continuous sanction and performance monitoring upon participation in the network.

h. Upon completion of the credentialing process, the NP may be listed in BlueCross BlueShield provider directories. As with all providers, this listing will accurately reflect their specific licensure designation and these providers will be subject to the audit process.

i. NPs will be clearly identified as such:
   i. On the credentialing file;
   ii. At presentation to the Credentialing Committee; and
   iii. On notification to Network Services and to the provider database.

2. Process, Requirements and Verifications – Certified Nurse Midwives:

   a. The Certified Nurse Midwife (CNM) applicant will submit the appropriate application and supporting documents as required of any other Practitioner with the exception of differing information regarding education, training and board certification.

   b. The required educational/training will be at a minimum that required for licensure as a Registered Nurse with subsequent additional training for licensure as a Certified Nurse Midwife by the appropriate licensing body. Verification of this education and training will occur either via primary source verification of the license, provided that state licensing agency performs verification of the education, or from the certification board if that board provides documentation that it performs primary verification of the professional education and training. If the state licensing agency or the certification board does not verify education, the education will be primary source verified in accordance with policy.

   c. The license status must be that of CNM as verified via primary source from the appropriate state licensing agency. Additionally, this license must be active, unencumbered, unrestricted and not subject to probation, terms or conditions. Any applicant whose licensure status does not meet these criteria, or who have in force adverse actions regarding Medicare or Medicaid will be notified of this and the applicant will be administratively denied.

   d. If the CNM has prescriptive authority, which allows the prescription of scheduled drugs, their DEA and/or state certificate of prescriptive authority information will be requested and primary source verified via normal BlueCross BlueShield procedures. If there are in force adverse actions against the DEA, the applicant will be notified and the applicant will be administratively denied.

   e. All CNM applicants will be certified by either:
      i. The National Certification Corporation for Ob/Gyn and Neonatal Nursing;
      or
      ii. The American Midwifery Certification Board, previously known as the American College of Nurse Midwives.

      This certification must be active and primary source verified. If the state licensing board primary source verifies one of these certifications as a requirement for licensure, additional verification by BlueCross BlueShield is not required. If the
applicant is not certified or if their certification has expired, the application will be submitted for individual review by the geographic Credentialing Committee.

d. If the CNM has hospital privileges, they must have unrestricted hospital privileges at a CIHQ, TJC, NIAHO, or HFAP accredited hospital, or a network hospital previously approved by the committee or in the absence of such privileges, must not raise a reasonable suspicion of future substandard professional conduct or competence. Information regarding history of any actions taken against any hospital privileges held by the CNM will be obtained. Any history of any adverse action taken by any hospital will trigger a Level II review. Should the CNM provide only outpatient care, an acceptable admitting arrangement via the collaborative practice agreement must be in place with a participating OB/Gyn.

g. The CNM applicant will undergo the standard credentialing process outlined in BlueCross BlueShield Credentialing Policies. CNMs are subject to all the requirements of these Credentialing Policies including (but not limited to): the requirement for Committee review for Level II applicants, re-credentialing every three years, and continuous sanction and performance monitoring upon participation in the network.

h. Upon completion of the credentialing process, the CNM may be listed in BlueCross BlueShield provider directories. As with all providers, this listing will accurately reflect their specific licensure designation and these providers will be subject to the audit process.

i. CNMs will be clearly identified as such:
   i. On the credentialing file;
   ii. At presentation to the Credentialing Committee; and
   iii. On notification to Network Services and to the provider database.

3. Process, Requirements and Verifications – Physician’s Assistants (PA):

   a. The PA applicant will submit the appropriate application and supporting documents as required of any other Practitioners with the exception of differing information regarding education/training and board certification.

   b. The required education/training will be, at a minimum, the completion of an education program leading to licensure as a PA. Verification of this will occur via verification of the licensure status from the state licensing agency provided that that agency verifies the education. If the state licensing agency does not verify education, the education will be primary source verified in accordance with policy.

   c. The license status must be that of PA as verified via primary source from the appropriate state licensing agency. Additionally, this license must be active, unencumbered, unrestricted and not subject to probation, terms or conditions. Any applicants whose licensure status does not meet these criteria, or who have in force adverse actions regarding Medicare or Medicaid will be notified of this and the applicant will be administratively denied.

   d. If the PA has prescriptive authority, which allows the prescription of scheduled drugs, their DEA and/or state certificate of prescriptive authority information will be requested and primary source verified via normal BlueCross BlueShield procedures. If there are in force adverse actions against the DEA, the applicant will be notified and the applicant will be administratively denied.

   e. All PA applicants will be certified by the National Commission on Certification of Physician’s Assistants. This certification must be active and primary source verified. If the state licensing board primary sources verifies this certification as a
requirement for licensure, additional verification by BlueCross BlueShield is not required. If the applicant is not certified or if their certification has expired, the application will be classified as a Level II according to geographic Credentialing Policy #8 and submitted for individual review by the Credentialing Committee.

f. If the PA has hospital privileges, they must have hospital privileges at a CIHQ, TJC, NIAHO, or HFAP accredited hospital, or a network hospital previously approved by the committee. Information regarding history of any actions taken against any hospital privileges held by the PA will be obtained. Any adverse action against any hospital privileges will trigger a level II review.

g. The PA applicant will undergo the standard credentialing process outlined in BlueCross BlueShield Credentialing Policies. PAs are subject to all the requirements described in these Credentialing Policies including (but not limited to): Committee review of Level II files failing to meet predetermined criteria, re-credentialing every three years, and continuous sanction and performance monitoring upon participation in the network.

h. Upon completion of the credentialing process, the PA may be listed in BlueCross BlueShield provider directories. As with all providers, this listing will accurately reflect their specific licensure designation and these providers will be subject to the audit process.

i. PA’s will be clearly identified such:
   i. On the credentialing file;
   ii. At presentation to the Credentialing Committee; and
   iii. On notification to Network Services and to the provider database.

C. Currently Participating Applicants (Recredentialing)

1. Submission of complete re-credentialing application and required attachments that must not contain intentional misrepresentations;

2. Re-credentialing application signed date within one hundred eighty (180) calendar days of the date of submission to the CC for a vote;

3. Must not be currently federally sanctioned, debarred or excluded from participation in any of the following programs; Medicare, Medicaid or FEHBP. If, once a Practitioner participates in BlueCross BlueShield programs or provider Network(s), federal sanction, debarment or exclusion from the Medicare, Medicaid or FEHBP programs occurs, at the time of identification, the Practitioner will become immediately ineligible for participation in the applicable government programs or provider Network(s) as well as BlueCross BlueShield other credentialed provider Network(s).

4. Current, valid, unrestricted, unencumbered, unprobated license to practice in each state in which the practitioner provides care to Members;

5. No new history of licensing board reprimand since prior credentialing review;

6. *No current federal sanction and no new (since prior credentialing review) history of federal sanctions (per SAM, OIG and OPM Reports or on NPDB report);

7. Current DEA/CDS registration and/or state controlled substance certification without new (since prior credentialing review) history of or current restrictions;

8. No current hospital membership or privilege restrictions and no new (since prior credentialing review) history of hospital membership or privilege restrictions; OR for practitioners in a specialty defined as requiring hospital privileges who practice solely in the outpatient setting there exists a defined referral relationship with a Network practitioner of similar specialty at a Network HDO who provides inpatient care to Members needing hospitalization;

9. No new (since previous credentialing review) history of or current use of illegal drugs or
alcoholism;
10. No impairment or other condition which would negatively impact the ability to perform the essential functions in their professional field;
11. No new (since previous credentialing review) history of criminal/felony convictions, including a plea of no contest;
12. Malpractice case history reviewed since the last CC review. If no new cases are identified since last review, malpractice history will be reviewed as meeting criteria. If new malpractice history is present, then a minimum of last five (5) years of malpractice history is evaluated and criteria consistent with initial credentialing is used.
13. No new (since previous credentialing review) involuntary terminations from an HMO or PPO;
14. No new (since previous credentialing review) "yes" answers on attestation/disclosure questions with exceptions of the following:
   a. voluntary resignation from a hospital or organization related to practice relocation or facility utilization;
   b. voluntary surrender of state license related to relocation or nonuse of said license;
   c. an NPDB report of a malpractice settlement or any report of a malpractice settlement that does not meet the threshold criteria;
   d. nonrenewal of malpractice coverage or change in malpractice carrier related to changes in the carrier’s business practices (no longer offering coverage in a state or no longer in business);
   e. previous failure of a certification exam by a practitioner who is currently board certified or who remains in the five (5) year post residency training window;
   f. actions taken by a hospital against a practitioner’s privileges related solely to the failure to complete medical records in a timely fashion;
   g. history of a licensing board, hospital or other professional entity investigation that was closed without any action or sanction.
15. No QI data or other performance data including complaints above the set threshold.
16. Recredentialed at least every three (3) years to assess the practitioner’s continued compliance with BlueCross BlueShield standards.

*It is expected that these findings will be discovered for currently credentialed Network practitioners and HDOs through ongoing sanction monitoring. Network practitioners and HDOs with such findings will be individually reviewed and considered by the CC at the time the findings are identified.

Note: the CC will individually review any credentialed Network practitioners and HDOs that do not meet one or more of the criteria for recredentialing.

III. HDO Eligibility Criteria

All HDOs must be accredited by an appropriate, recognized accrediting body or in the absence of such accreditation, BlueCross BlueShield may evaluate the most recent site survey by Medicare, the appropriate state oversight agency, or site survey performed by a designated independent external entity within the past 36 months. If a HDO has satellite facilities that follow the same policy and procedures, BlueCross BlueShield may limit site visits to the main facility. Non-accredited HDOs are subject to individual review by the CC and will be considered for Member access need only when the CC review indicates compliance with BlueCross BlueShield standards and there are no deficiencies noted on the Medicare or state oversight review which would adversely affect quality or
care or patient safety. HDOs are recredentialed at least every three (3) years to assess the HDO’s continued compliance with BlueCross BlueShield standards.

A. General Criteria for HDOs:
1. Valid, current and unrestricted license to operate in the state(s) in which it will provide services to Members. The license must be in good standing with no sanctions.
2. Valid and current Medicare certification.
3. Must not be currently federally sanctioned, debarred or excluded from participation in any of the following programs: Medicare, Medicaid or the FEHBP. Note: If, once an HDO participates in BlueCross BlueShield programs or provider Network(s), exclusion from Medicare, Medicaid or FEHBP occurs, at the time of identification, the HDO will become immediately ineligible for participation in the applicable government programs or provider Network(s) as well as BlueCross BlueShield other credentialed provider Network(s).
4. Liability insurance acceptable to BlueCross BlueShield
5. If not appropriately accredited, HDO must submit a copy of its CMS, state site or a designated independent external entity survey for review by the CC to determine if BlueCross BlueShield quality and certification criteria standards have been met.

B. Additional Participation Criteria for HDO by Provider Type:

**HDO Type and BlueCross BlueShield Approved Accrediting Agent(s)**

**Medical Facilities**

The decision to approve or deny initial participation will be communicated in writing within 60 days of receiving a completed application. The notification will inform you as to whether you are credentialed, whether additional time is needed or if we are at capacity to credential additional providers. If additional information is needed, we will notify you as soon as possible but no more than 60 days from the receipt of the application. To the extent allowed under applicable law or state agency requirements, per NCQA Standards and Guidelines, the medical director may render a decision regarding the approval of files meeting BlueCross BlueShield requirements without benefit of input from the credentialing committee. In the event your continued participation is denied, you will be notified by certified mail. If continued participation is denied, you will be allowed 30 days to appeal the decision.

Selective Contracting for Breast Cancer Surgery

We will provide breast cancer surgery only at hospitals and ambulatory surgery centers designated as meeting high volume thresholds as determined by the State Department of Health (SDOH). SDOH updates the list of eligible facilities annually. The list can be found at the following web site address: www.health.ny.gov/health_care/medicaid/quality/surgery/cancer/breast

Your organization will be notified either by telephone or in writing if any information obtained in support of the assessment or reassessment process varies substantially from the information your organization has submitted.

Your organization has the right to review the information submitted in support of the assessment process and to correct any errors in the documentation. This will be accomplished by submission of a written explanation or by appearance before the credentialing committee, if so requested.

Organizational providers are recredentialed every three years unless otherwise required by state regulations.

Delegated Credentialing

Provider groups with strong credentialing programs that meet our credentialing standards may be evaluated for delegation. As part of this process, we conduct a predelegation assessment of a group’s credentialing policy and program, as well as an onsite evaluation of credentialing files. A passing score is considered to be an overall average of 90% compliance. If deficiencies are identified, the group is expected to submit an acceptable corrective action plan within 30 days of receipt of the audit results. If there are serious deficiencies, we will deny the delegation or will restrict the level of delegation. We may waive the need for the predelegation onsite audit if the group’s credentialing program is NCQA-certified for all credentialing and recredentialing elements. We’re responsible for ongoing oversight of any delegated credentialing arrangement and will schedule appropriate reviews. The reviews are held at least annually.

Peer Review

The peer review process provides a systematic approach for monitoring the quality and appropriateness of care. Peer review responsibilities are:

- To participate in the implementation of the established peer review system
- To review and make recommendations regarding individual provider peer review cases
- To work in accordance with the executive medical director

Should investigation of a member grievance result in concern regarding a physician’s compliance with community standards of care or service, all elements of peer review will be followed.

Dissatisfaction severity codes and levels of severity are applied to quality issues. The medical director assigns a level of severity to the grievance. Peer review includes investigation of physician actions by, or at the discretion of, the medical director. The medical director takes action based on the quality issue and the level of severity, invites the cooperation of the physician and consults and informs the Medical Advisory and Peer Review committees. The medical director informs the physician of the committee’s decision, recommendations, follow-up actions and/or disciplinary actions to be taken. Outcomes are reported to the appropriate internal and external entities which include the Quality Management committee.

The peer review policy is available upon request.

**Reporting Obligations**

We’re legally obligated to report occurrences within 30 days to the state licensure board, the National Practitioner Data Bank (NPDB), Healthcare Integrity and Protection Data Bank (HIPDB), professional associations, CMS and any other applicable state or federal authority of termination for matters involving clinical competence or professional conduct.

Additionally, we’re obligated to report within days of obtaining knowledge of any information that reasonably appears to show that a health professional is guilty of professional misconduct as defined in education law.

**Provider Termination**

You cannot be prohibited from the following actions, nor may we terminate or refuse to renew a contract if you:
- Advocate on behalf of an enrollee.
- File a complaint against us.
- Appeal a decision we made.
- Provide information or file a report pursuant to PHL 4406-c regarding prohibitions of plans or request a hearing or review.

**Appeals Process**

In the event a participating provider receives notification of denial or limitation and/or restriction of credentials or termination for cause, we must provide you with a written explanation of the reason(s) for the proposed contract termination/restriction and an opportunity to appeal the decision. You have 30 days to appeal the decision in writing. A hearing or review, at the provider’s discretion, may be requested if you were terminated for cause. Appeals are heard by the credentialing appeals committee, a separate credentialing peer-review body not involved in the initial decision, within 30 days of receipt of the request for a hearing. The hearing panel will be comprised of three persons appointed by the health plan. At least one person on the panel will specialize in the same discipline or same specialty as the
person under review. The panel can consist of more than three members, provided the number of clinical peers constitute one-third or more of the total membership.

The provider is informed the request for appeal has been received. If an informal hearing is being offered, the time, date and location of the informal hearing is also communicated to you no less than fourteen (14) calendar days prior to the date of the informal hearing. You have the right to be represented by an attorney or other representative of your choice.

The appeals process lets you exercise your right to appear in person before the credentialing fair hearing committee or appointed hearing officer, at which time you have the right to present his or her case.

You are notified in writing of the final decision, setting forth the reasons for the decision, within 15 days of the credentialing fair hearing committee or appointed hearing officer meeting.

If the credentialing fair hearing committee or appointed hearing officer upholds a denial, the recommendation is made to initiate termination procedures for your participation with us. It is the responsibility of our duly authorized senior management to accept the committee’s decision.

The final decision will be provided to you in writing, along with the specific reasons for the decision and will include one of the following:

- Reinstatement
- Provisional reinstatement with conditions we set forth
- Termination

Should the final decision result in a termination, action will be effective not less than 30 days after your receipt and not sooner than 60 days from receipt of the termination notice.

If you are terminated due to a case involving imminent harm to patient care, a determination of fraud or final disciplinary action by a state licensing board, you are not eligible for a hearing or a review.

**Advance Directives**

Recognizing a person's right to dignity and privacy, our members have the right to execute an advance directive, also known as a living will, to identify their wishes concerning health care services should they become incapacitated. Providers may be asked to assist members in procuring and completing the necessary forms. Advance directive documents should be on hand in the event a member requests this information. Any request should be properly noted in the medical record.
12 PROVIDER COMPLAINT PROCEDURES

Overview

We have a formal complaint and appeal process to handle disputes pertaining to administrative issues and nonpayment-related matters. For payment disputes, see the Provider Payment Disputes section of this manual.

You may access this process by filing a written complaint. Your complaints will be resolved fairly and consistently with our policies and covered benefits.

You aren’t penalized for filing complaints. Any supporting documentation should accompany the complaint. File grievances in writing to:

BlueCross BlueShield
Grievance and Appeals
Provider Relations – Central Intake Unit
9 Pine St., 14th Floor
New York, NY 10005

We’ll send you an acknowledgement letter within 10 business days of receipt. At no time will we cease coverage of care pending a grievance investigation.
13 CLAIM SUBMISSION AND ADJUDICATION PROCEDURES

Electronic Claims Submission

We encourage you to submit claims electronically through Electronic Data Interchange (EDI). Contracted providers must submit claims within 120 days from the date of service.

You may submit claims either using a clearinghouse or as a direct submitter through EDI. To become a trading partner, submit a Trading Partner Agreement Form and an Electronic Data Interchange Registration Form. An E-Solutions representative will provide outreach to assign a trading partner ID and establish connectivity with our enterprise clearinghouse.

The advantages of electronic claims submission are:

- Facilitates timely claims adjudication
- Acknowledges receipt and rejection notification of claims electronically
- Improves claims tracking
- Improves claims status reporting
- Reduces adjudication turnaround
- Eliminates paper
- Improves cost-effectiveness
- Allows for automatic adjudication of claims

The guide for EDI claims submission, including additional information related to the EDI claim process, is located on our website.

Paper Claims Submission

You also have the option of submitting paper claims. We use Optical Character Reading (OCR) technology as part of our front-end claims processing procedures. The benefits include:

- Faster turnaround times and adjudication
- Claims status availability within five days of receipt
- Immediate image retrieval by our staff for claims information, allowing more timely and accurate response to your inquiries

To use OCR technology, claims must be submitted on original red claim forms (not black and white or photocopied forms), laser printed or typed (not handwritten), and in a large, dark font. You must submit a properly completed UB-04 or CMS-1500 (08-05) within 120 days from the date of service.

CMS-1500 (08-05), UB-04 or CMS-1450 must include the following information (HIPAA compliant where applicable):

- Patient’s ID number
- Patient’s name
- Patient’s date of birth
- ICD diagnosis code/revenue codes
- Date of service
- Place of service
- Description of services rendered
- Itemized charges
- Days or units
- Provider tax ID number
- Provider name according to contract
- BlueCross BlueShield provider number
- NPI of billing provider when applicable
- State Medicaid ID number
- COB/other insurance information
- Authorization/precertification number
- Name of referring physician
- NPI of referring physician when applicable
- Any other state required data

We cannot accept claims with alterations to billing information. Claims that have been altered will be returned to you with an explanation of the reason for the return. We will not accept entirely handwritten claims.

Paper claims must be submitted within 120 days of the date of service and submitted to the following address:

BlueCross BlueShield
New York Claims
P.O. Box 62509
Virginia Beach, VA 23466-2509

International Classification of Diseases, 10th Revision (ICD-10) Description

As of October 1, 2015, ICD-10 became the code set for medical diagnoses and inpatient hospital procedures in compliance with HIPAA requirements and in accordance with the rule issued by the U.S. Department of Health and Human Services (HHS).

ICD-10 is a diagnostic and procedure coding system endorsed by the World Health Organization (WHO) in 1990. It replaces the International Classification of Diseases, 9th Revision (ICD-9) which was developed in the 1970s. Internationally, the codes are used to study health conditions and assess health management and clinical processes. In the United States, the codes are the foundation for documenting the diagnosis and associated services provided across health care settings.

Although we often use the term ICD-10 alone, there are actually two parts to ICD-10:
- Clinical modification (CM): ICD-10-CM is used for diagnosis coding
- Procedure coding system (PCS): ICD-10-PCS is used for inpatient hospital procedure coding; this is a variation from the WHO baseline and unique to the United States.

ICD-10-CM replaces the code sets ICD-9-CM, volumes one and two for diagnosis coding, and ICD-10-PCS replaces ICD-9-CM, volume three for inpatient hospital procedure coding.
Encounter Data

We maintain a system to collect member encounter data. Due to reporting needs and requirements, network providers who are reimbursed by capitation must send us encounter data for each member encounter. Encounter data can be submitted through EDI submission methods or on a CMS-1500 (08-05) claim form unless we approve other arrangements. Data will be submitted in a timely manner, but no later than 120 days from the date of service.

The encounter data will include the following:
- Member’s ID number
- Member’s name (first and last name)
- Member’s address
- Member’s date of birth
- Provider’s name according to contract
- BlueCross BlueShield provider number
- Coordination of benefit information
- Date of encounter
- Diagnosis code
- Types of services provided (using current procedure codes and modifiers if applicable)
- Provider’s tax ID number and state Medicaid ID number

Encounter data should be submitted to the following address:
BlueCross BlueShield
P.O. Box 62509
Virginia Beach, VA 23466-2509

HEDIS information is collected through claims and encounter data submissions. This includes but is not limited to:
- Preventive services (for example, childhood immunization, mammography, Pap smears)
- Prenatal care (for example, LBW, general first trimester care)
- Acute and chronic illness (for example, ambulatory follow-up and hospitalization for major disorders)

Compliance is monitored by our utilization and quality improvement staff, coordinated with the medical director and reported to the Quality Management committee on a quarterly basis. The PCP is monitored for compliance with utilization reporting. Lack of compliance will result in training and follow-up audits and could result in termination from the network.

Claims Adjudication

We’re dedicated to providing timely adjudication of your claims for services rendered to members. All network and non-network provider claims submitted for adjudication are processed according to generally accepted claims coding and payment guidelines. These guidelines comply with industry standards as defined by the CPT and ICD manuals. Institutional claims should be submitted using EDI submission methods or a UB-04 CMS-1450, and professional services using the CMS-1500.
Use HIPAA-compliant billing codes when billing us. This applies to both electronic and paper claims. When billing codes are updated, you’re required to use appropriate replacement codes for submitted claims. BlueCross BlueShield won’t pay any claims submitted using noncompliant billing codes.

We reserve rights to use code-editing software to determine which services are considered part of, incidental to or inclusive of the primary procedure.

For claims payment to be considered, adhere to the following time limits:
- Submit claims within 120 days from the date the service is rendered; or for inpatient claims filed by a hospital, within 120 days from the date of discharge.
- In the case of other insurance, submit the claim within 120 days of receiving a response from the third-party payer.
- Claims for members whose eligibility has not been added to the state’s eligibility system must be received within 120 days from the date the eligibility is added and we’re notified of the eligibility/enrollment.
- Claims submitted after the 120-day filing deadline will be denied.

After filing a claim with us, review the weekly Explanation of Payment (EOP). If the claim does not appear on an EOP within 30 business days as adjudicated or you have no other written indication that the claim has been received, check the status of your claim on our website or by calling Provider Services at 1-866-231-0847. If the claim is not on file with us, resubmit your claim within 90 days from the date of service. If filing electronically, check the confirmation reports that you receive from your EDI or practice management vendor for acceptance of the claim.

**Clean Claims Payment**

A clean claim is a request for payment for a service rendered by a provider that:
- Is submitted timely
- Is accurate
- Is submitted on a HIPAA-compliant standard claim form (CMS-1500 or CMS-1450), or successor forms thereto, or the electronic equivalent of such claim form
- Requires no further information, adjustment or alteration by the provider or by a third party in order for us to process and pay it

We adjudicate all clean electronic claims within 30 days and all clean paper claims within 45 calendar days of receipt of a clean claim. If we don’t adjudicate the clean claim within the time frame specified above, we’ll pay all applicable interest as required by law.

Biweekly, we produce and mail to you an EOP, which delineates the status of each of your claims that have been adjudicated during the previous check week cycle. Upon receipt of the requested information from you, we attempt to complete processing of the clean claims; contractually, we have 30 days for electronic claims and 45 days for paper claims.

Paper claims determined to be unclean will be returned to you along with a letter stating the reason for the rejection. Electronic claims determined to be unclean will be returned to our contracted clearinghouse that submitted the claim.
In accordance with state insurance requirements, except in a case where our obligation to pay is not reasonably clear or when there is a reasonable basis that the claim was submitted fraudulently, we’ll pay the electronic claim within 30 days or paper claims within 45 days of the date of receipt. In a case where our obligation to pay a claim is not reasonably clear, we’ll pay any undisputed portion of the claim and notify you in writing within the appropriate time frame above that we:

- Are not obligated to pay the claim, stating the specific reasons why we are not liable
- Need additional information to determine liability to pay the claim or make the payment

**Claims Status**

Log in to our website or call 1-866-231-0847 to check claims status.

**Reimbursement Policies**

Reimbursement policies serve as a guide to assist you in accurate claim submissions and to outline the basis for reimbursement if the service is covered by a member’s BlueCross BlueShield benefit plan. The determination that a service, procedure, item, etc. is covered under a member's benefit plan is not a determination that you will be reimbursed. Services must meet authorization and medical necessity guidelines appropriate to the procedure and diagnosis as well as to the member’s state of residence. You must follow proper billing and submission guidelines. You are required to use industry standard, compliant codes on all claim submissions. Services should be billed with Current Procedural Terminology (CPT) codes, Healthcare Common Procedure Coding System (HCPCS) codes and/or Revenue codes. The codes denote the services and/or procedures performed. The billed code(s) are required to be fully supported in the medical record and/or office notes. Unless otherwise noted within the policy, our policies apply to both participating and nonparticipating providers and facilities.

If appropriate coding, billing guidelines or current reimbursement policies are not followed, BlueCross BlueShield may:

- Reject or deny the claim.
- Recover and/or recoup claim payment.

BlueCross BlueShield reimbursement policies are based on nationally accepted industry standards and coding principles. These policies may be superseded by mandates in provider or state contracts, or state, federal or CMS requirements. System logic or set up may prevent the loading of policies into the claims platforms in the same manner as described; however, BlueCross BlueShield strives to minimize these variations.

BlueCross BlueShield reserves the right to review and revise its policies periodically when necessary. When there is an update, we will publish the most current policy at www.bcbswny.com/stateplans.

**Reimbursement Hierarchy**

Claims submitted for payment must meet all aspects of criteria for reimbursement. The reimbursement hierarchy is the order of payment conditions that must be met for a claim to be reimbursed. Conditions of payment could include benefit coverage, medical necessity, authorization or stipulations within a reimbursement policy. Neither payment rates nor methodology are considered to be conditions of payment.
Review Schedules and Updates
Reimbursement policies go through a review every two years for updates to state, federal or CMS contracts and/or requirements. Additionally, updates may be made at any time if we are notified of a mandate change or due to a BlueCross BlueShield business decision. When there is an update, we will publish the most current policy at www.bcbswny.com/stateplans.

Medical Coding
The Medical Coding department ensures that correct coding guidelines have been applied consistently throughout BlueCross BlueShield. Those guidelines include but are not limited to:

- Correct modifier use
- Analysis of codes, code definition and appropriate use
- Applying code-editing rules appropriately and within regulatory requirements
- Effective date of transaction code sets (CPT, HCPCS, ICD diagnosis/procedures, revenue codes, etc.)

Reimbursement by Code Definition
BlueCross BlueShield allows reimbursement for covered services based on their procedure code definition, or descriptor, as opposed to their appearance under a particular CPT category section unless otherwise noted by state, federal or CMS contracts and/or requirements. There are seven CPT sections:

- Evaluation and management
- Anesthesia
- Surgery
- Radiology (nuclear medicine and diagnostic imaging)
- Pathology and laboratory
- Medicine
- Temporary codes for emerging technology, service or procedure

Various procedure codes are located in particular CPT categories, although the procedure may not be classified within that particular category (for example, venipuncture is located in the CPT Surgical Section, although it is not a surgical procedure).

Provider Reimbursement

Electronic Funds Transfer and Electronic Remittance Advice
We offer electronic funds transfer (EFT) and electronic remittance advice (ERA). To register for ERA/EFT, please visit our website.
PCP Reimbursement
We reimburse PCPs according to their contractual arrangement.

Specialist Reimbursement
Reimbursement to network specialty care providers and network providers not serving as PCPs is based on their contractual arrangement with us.

Specialty care providers must obtain PCP approval and our approval prior to rendering or arranging any treatment that is beyond the specific treatment authorized by the PCP’s referral, or beyond the scope of self-referral permitted under this program.

Specialty care provider services will be covered only when there is documentation of appropriate notification or precertification, as appropriate, and receipt of the required claims and encounter information to us.

Dual Providers
We reimburse our dual providers based on the taxonomy codes billed on each claim. The Health Care Provider Taxonomy code set allows providers to identify their specialty categories. For capitated providers, claims billed with taxonomy codes appropriate for a PCP will finalize under capitation. Claims billed with any other taxonomy codes will be reimbursed at FFS specialty rates according to providers’ contractual arrangements.

Overpayment Process
Refund notifications may be identified by two entities: BlueCross BlueShield and its contracted vendors or the providers. BlueCross BlueShield researches and notifies the provider of an overpayment requesting a refund check. The provider may also identify an overpayment and proactively submit a refund check to reconcile the overpayment amount.

Once an overpayment has been identified by BlueCross BlueShield, BlueCross BlueShield will notify the provider of the overpayment. The overpayment notification will include instructions on how to refund the overpayment.

If a provider identifies an overpayment and submits a refund, a completed Refund Notification form specifying the reason for the return must be included. This form can be found on the provider website at www.bcbswny.com/stateplans. The submission of the Refund Notification form will allow Cost Containment to process and reconcile the overpayment in a timely manner.

The provider can also complete a Recoupment Notification form, which gives us the authorization to adjust claims and create claim offsets. This form can also be found on the provider website. For questions regarding the refund notification procedure, please call Provider Services at 1-866-231-0847 and select the appropriate prompt.

In instances where we are required to adjust previously paid claims to adhere to a new published rate, we will initiate a reconciliation of the affected claims. As such, we will determine the cumulative adjusted reimbursement amount based on the new rates. In the event the outcome of this reconciliation results in a net amount owed to us, we will commence recovery of such amounts through an offset against future claims payments. Such recoveries are not considered part of the overpayment recovery process described above or in the provider agreement.
Changes addressing the topic of overpayments have taken place with the passage of the Patient Protection and Affordable Care Act (PPACA), commonly known as the Healthcare Reform Act.

The provision directly links the retention of overpayments to false claim liability. The language of 42 U.S.C.A. § 1320a-7k makes explicit that overpayments must now be reported and returned to states or respective MCOs within 60 days of identification of the overpayment or by the date any corresponding cost report is due, whichever is later. After 60 days, the overpayment is considered a false claim, which triggers penalties under the False Claims Act, including treble damages. In order to avoid such liability, health care providers and other entities receiving reimbursement under Medicare or Medicaid should implement policies and procedures on reporting and returning overpayments that are consistent with the requirements in the PPACA.

The provision entitled “Reporting and Returning Overpayments – Deadline for Reporting and Returning Overpayments,” codified at 42 U.S.C.A. § 1320a-7k, clarifies the uncertainty left by the 2009 Fraud Enforcement and Recovery Act.

This provision of the HealthCare Reform Act applies to providers of services, suppliers, Medicaid managed care organizations, Medicare Advantage organizations and Medicare Prescription Drug Program sponsors. It does not apply to beneficiaries.

**Provider Payment Disputes**

**Claims payment reconsideration process:** If you do not agree with the outcome of a claim payment, and the claim payment is not a result of a medical necessity authorization decision, the provider may request an investigation, called a reconsideration, to determine and correct discovered processing errors.

Responses to itemized bill requests, submission of corrected claims and submission of coordination of benefits/third-party liability information are not considered payment disputes. These are considered correspondence and should be addressed to Claims Correspondence.

Please file payment disputes within 45 calendar days of the paid date of the EOP.

You may submit a reconsideration in one of three ways:

1. **In writing:** Submit a written reconsideration request, including all necessary supporting documentation, to:

   BlueCross BlueShield  
   Payment Dispute Unit  
   P.O. Box 61599  
   Virginia Beach, VA 23466-1599

2. **Verbally:** Call Provider Services to request a reconsideration.

3. **Online:** Access and submit a reconsideration through the secure provider website.

Upon receipt of the reconsideration request, an internal review is conducted. This includes a thorough investigation by a trained claims analyst utilizing all applicable statutory, regulatory, contractual and provider subcontract provisions, BlueCross BlueShield policies and procedures, and all pertinent facts submitted from all parties. The results are then communicated in a determination letter to the provider within 30 calendar days of the receipt of the reconsideration.
• If the determination requires an adjustment to the claim, the investigating representative will make the adjustment.

• If the determination of the reconsideration requires additional information to resolve, the determination may be extended by 15 calendar days. A written extension letter will be sent to the provider before the expiration of the initial, 30-day determination period.

• If the determination of a claim payment appeal requires clinical expertise, it will be reviewed by the appropriate clinical BlueCross BlueShield staff.

The determination letter includes:

• A statement of the provider's reconsideration request.

• The reviewer’s decision, along with an explanation of the contractual and/or medical basis for the decision.

• A description of the evidence or documentation which supports the decision.

Note: If the decision results in a claim adjustment, the payment and Explanation of Payment will be sent separately.

Claims payment appeals: If you are dissatisfied with the outcome of a reconsideration, you may submit a formal disagreement, called a claim payment appeal. File claims payment appeals within 30 days of the outcome of the reconsideration. You may submit a claim payment appeal in one of two ways:

1. Written: Submit a written claim payment appeal, including any necessary supporting documentation, to:

   BlueCross BlueShield
   Payment Dispute Unit
   P.O. Box 61599
   Virginia Beach, VA 23466-1599

2. Online: Access and submit a claim payment appeal through the secure provider website.

Upon receipt of the claim payment appeal, an internal review is conducted. This includes a thorough investigation by a trained claims appeal analyst utilizing all applicable statutory, regulatory, contractual and provider subcontract provisions, BlueCross BlueShield policies and procedures, and all pertinent facts submitted from all parties.

The results are then communicated in a determination letter to the provider within 30 calendar days of receipt of the claim payment appeal.

• If the determination requires an adjustment to the claim, the investigating representative will make the adjustment.

• If the determination requires additional information to resolve, the determination may be extended by 15 calendar days. A written extension letter will be sent to the provider before the expiration of the initial 30-day determination period.

• If the determination of a claim payment appeal requires clinical expertise, it will be reviewed by the appropriate clinical BlueCross BlueShield professionals.

The determination letter includes:

• A statement of the provider's claim payment appeal.

• The reviewer’s decision, along with an explanation of the contractual and/or medical basis for the decision.

• A description of the evidence or documentation which supports the decision.
Note: If the decision results in a claim adjustment, the payment and Explanation of Payment will be sent separately.

**Coordination of Benefits**

State-specific guidelines will be followed when Coordination of Benefits (COB) procedures are necessary. We agree to use covered medical and hospital services whenever available, or other public or private sources of payment for services rendered to members in our plan.

We and our providers agree the Medicaid program will be the payer of last resort when third-party resources are available to cover the costs of medical services provided to Medicaid members. When we obtain complete information regarding the responsible carrier prior to paying for a medical service, we will avoid payment by either rejecting your claim and redirecting you to bill the appropriate insurance carrier or, if we do not become aware of the resource until sometime after payment for the service was rendered, by pursuing post-payment recovery of the expenditure. You must not seek recovery in excess of the Medicaid payable amount.

We will avoid payment of trauma-related claims where third-party resources are identified prior to payment. Otherwise, we will investigate prospective and potential subrogation cases on behalf of the state. Paid claims are reviewed and researched post-payment to verify subrogation cases. This information is reported to the state on a regular basis for management of recoveries related to the health care expenses in these cases.

We require members to cooperate in the identification of any and all other potential sources of payment for services. In no instance will a member be held responsible for disputes over these recoveries.

Any questions or inquiries regarding paid, denied or pended claims should be directed to Provider Services at **1-866-231-0847**.

**Billing Members**

Before rendering services, always inform members that the cost of services not covered by us will be charged to the member.

If you choose to provide services we do not cover:

- Understand that we only reimburse for services that are medically necessary, including hospital admissions and other services
- Obtain the member’s signature on the Client Acknowledgment Statement specifying that the member will be held responsible for payment of services
- Understand that you may not bill for, or take recourse against, a member for denied or reduced claims for services that are within the amount, duration and scope of benefits of the Medicaid program

Our members must not be balance-billed or billed for the amount above that which we pay for covered services.

In addition, you may not bill a member if any of the following occurs:

- Failure to timely submit a claim, including claims we don’t receive
• Failure to submit a claim to us for initial processing within the 120-day filing deadline
• Failure to submit a corrected claim within the 90-day filing resubmission period
• Failure to appeal a claim within the 45-day administrative appeal period
• Failure to appeal a UR determination within 60 business days of notification of coverage denial
• Submission of an unsigned or otherwise incomplete claim
• Errors made in claims preparation, claims submission or the appeal process

**Client Acknowledgment Statement**
You may bill a BlueCross BlueShield member for a service that has been denied as not medically necessary or not a covered benefit only if both of the following conditions are met:

- The member requests the specific service or item
- You obtain and keep a written acknowledgement statement signed by you and the member stating:

  “I understand that, in the opinion of (provider’s name), the services or items that I have requested to be provided to me on (dates of service) may not be covered under BlueCross BlueShield as being reasonable and medically necessary for my care or that are not a covered benefit. I understand that BlueCross BlueShield has established the medical necessity standards for the services or items that I request and receive. I also understand that I am responsible for payment of the services or items I request and receive if these services or items are determined to be inconsistent with the BlueCross BlueShield medically necessary standards for my care or not a covered benefit.”
